

SABIO INTEGRATOR

KNOWLEDGE COMES TO YOU WHEN YOU NEED IT

SABIO bundles the entire knowledge of a company in one software solution and is very easy to use. The SABIO Integrator fits seamlessly into your application environment. While you are working in your standard applications, you have access to your SABIO knowledge at any time without having to change the application. The SABIO Integrator is a browser plugin that integrates into almost any web application.

With the Integrator it is possible to display knowledge from SABIO directly in a web application, so that application-specific integrations no longer have to be developed.

USE CASES

- Search in SABIO directly from your CRM, ERP, ticket or e-mail systems without changing applications
- Display search results directly in the browser window

BENEFITS

- Reduction of machining time by eliminating the need to change the application
- Delivering SABIO knowledge content to web-based tools is simplified significantly
- Knowledge content is displayed in the current context, in the same browser window
- Increase of the usage rate of SABIO
- Display of unconfirmed messages directly on the browser icon

REQUIREMENTS

- Web-based applications
- An existing SABIO system
- Using the Chrome Browser
- Available in German and English
