

Hello G2 Track.

Goodbye Wasted SaaS Spend.

G2 TRACK

Businesses are growing — and so are their SaaS technology stacks. Use G2 Track to securely sync accounting, financial, and single sign-on systems — and automatically map detected expenses and licenses to products. Provide your finance, IT, and business ops teams with a unified way to manage vendors and consolidate data — increasing ROI by honing in on product usage, billing trends, contract renewals, and vendor compliance.

Automate Software Discovery

- Paint a comprehensive picture of your tech stack spend by department — and by the dollar — by securely integrating the expense, invoicing, and accounting systems you use and trust.

Manage Vendors & Compliance

- Unify vendor management and data consolidation for full visibility and management of the apps in your stack you know about, along with the ones you don't.

Collaborate on Internal IT

- Keep your team in the know — all of the time — by assigning contract ownership to stakeholders and collaborating live on contracts with key notes and details.

Optimize SaaS Spend

- Hone in on product usage, billing trends, and contract renewals in real time to streamline spend, business efficiency, and ROI.

Talk to us today about G2 Track today - and never leave money on the table again.
