

Enhance CRM With AI For Sales

Sufficient, timely and accurate information in CRM comes at the expense of time spent selling. Managers don't have the data they need to accurately forecast. The end-of-quarter is a mad scramble and there is no visibility into what deals to focus on.

TopOPPS solves these challenges by infusing Artificial Intelligence throughout the sales process to support:

-  Automated CRM Data Capture
-  Proactive Sales Process Enforcement
-  AI driven sales forecasting & pipeline management

TopOPPS allows you to spend less time managing your Sales Pipeline & Forecast and more time WINNING!

Automated CRM Data Capture

-  The email & calendar interface captures all contents into TopOPPS application and uses sentiment analysis to rate the interaction automatically updating the opportunity
-  The mobile interface allows the sales rep to work from their phone from anywhere

Proactive Sales Process Enforcement

-  The sales pipeline view provides an intuitive and visual sales pipeline.
-  Both predictive and prescriptive alerts keep the sales process on target and highlight problem areas.
-  Users update the status and activity in the same interface so accuracy and context is maintained.
