

Sciforma 7.1

Provides data intelligence to help managers and executives make smarter data-driven decisions.

Sciforma 7.1 delivers an integrated out-of-the-box suite of project management processes across the PPM lifecycle.

Functionally Scalable

Robust

Easy-to-use

Fast to Implement

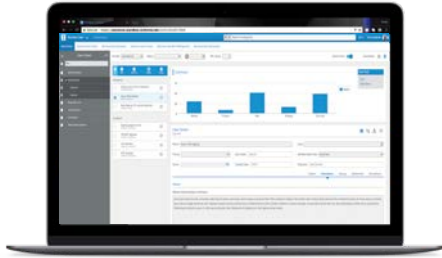

- ✓ Reduce project failure rates
- ✓ Reduce project cycle times

- ✓ Reduce cost overruns
- ✓ Avoid low/no-value projects

- ✓ Eliminate PM time spent on low-value tasks

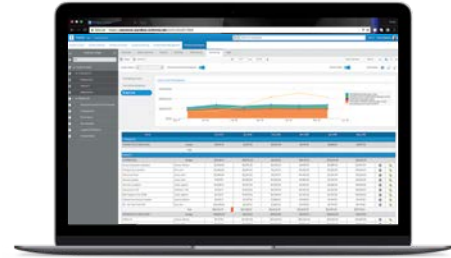

PRIORITIZE

Determine highest value projects
Organize and manage portfolios by aligned strategic initiatives

✓ Demand Management

Ensure selected projects are the result of only the best ideas leveraging the collective imagination and wisdom of the organization. New capabilities to create assessment and scoring templates tailored to the organization's needs.

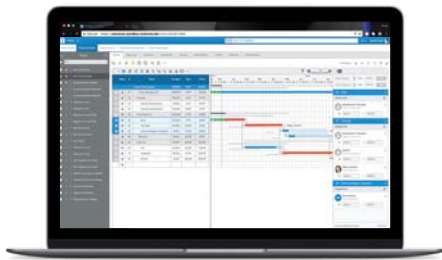

✓ Portfolio Management

Support business alignment along multiple dimensions, including alignment with strategic programs, portfolios, and initiatives: New Budget-driven Ranking and drill-down capabilities for Simulation.

DEPLOY AND MOBILIZE

Plan and manage your project in your methodology of choice
Identify best resources. Optimize resource's utilization

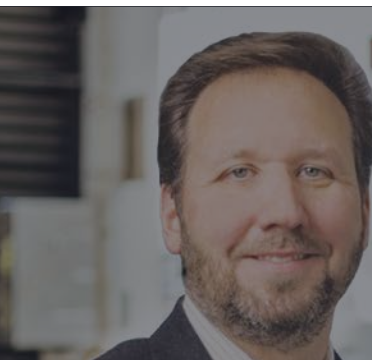

✓ Project Planning and Management

Strong Multi-Methodologies Integration: Project Managers can use the Sciforma solution to work either using Agile methodologies, more classic Waterfall approaches, Critical Chain, or other leading approaches – all at no additional cost.

✓ Resource Management

Get the right resources with the right skills available for the highest value projects thanks to new techniques based on the organization's maturity.

“Sciforma brought a couple of things to the table for us. One was that balance between resource management and scheduling, good strengths on both sides...”

- Ted Finlan, PMP, CSM | Sr. Vice President, Project Planning & Administration | Worldwide Clinical Trials

EXECUTE

Streamline & automate workflows
Improve collaboration

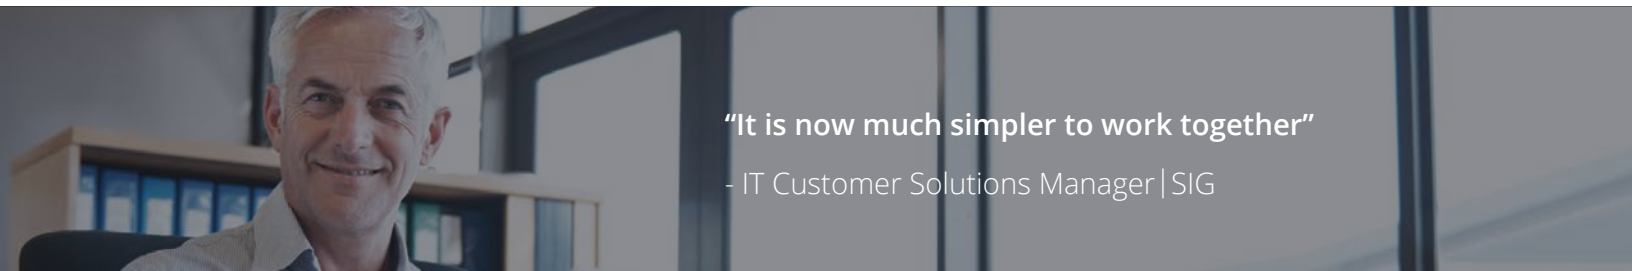

✓ Time Management

Strong time management and calendar management module:

- Time-off request process and full-featured weekly or monthly timesheets with 2-step approval workflow.
- Users can pin tasks they want to see week after week increasing ease-of-use of the tool.
- Integration with the Agile Activity Log.

✓ Work Management

Completely redesigned Work Management in Sciforma 7.1 featuring more collaborative capabilities: Inbox and Kanban views for managing issues, actions, deliverables, risks, etc. and seamlessly moving them around business cases, projects, products, programs, and portfolios.

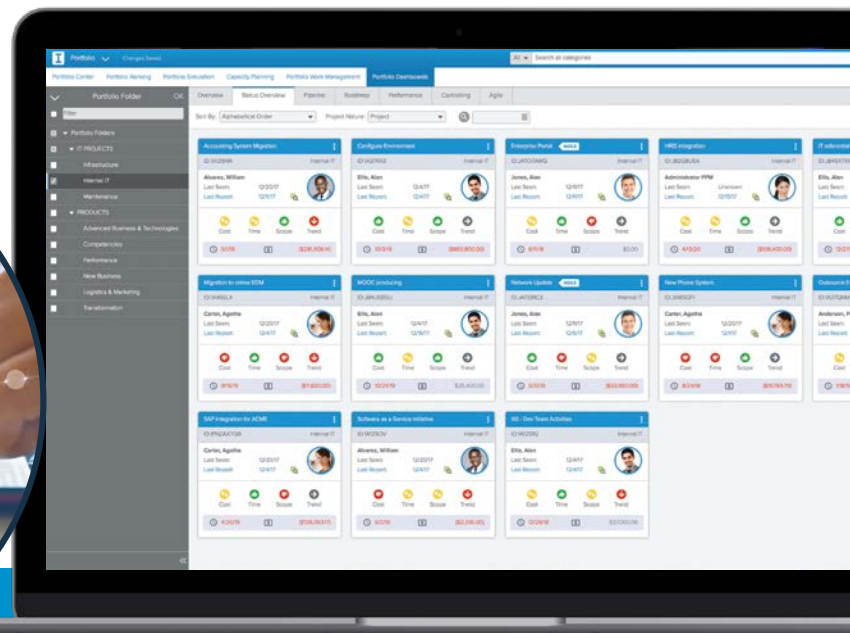

“It is now much simpler to work together”
- IT Customer Solutions Manager | SIG

ANALYZE AND OPTIMIZE

Drive maximum productivity
Increase initiative success rates

✓ Reporting - Analytics

Key project metrics available to upper management in clean and clear dashboards and reports.

I Sciforma

Project & Portfolio Management Software

Perhaps more important than choosing the right partner from a technology perspective is choosing a partner with a proven track record of successful implementations. Sciforma provides an array of services and flexibility in its sales, delivery, and on-going support approach to ensure your success.
