# MOZART DATA

# Get Faster, More Reliable Insights with the Modern Data Platform

## Use Mozart Data to:

✔ Centralize siloed data and create a universal source of truth

✔ Organize and clean messy data to answer complex questions faster

✔ Earn and maintain trust with accurate data

✔ Empower anyone to access, understand, and use their data

✔ Enable a culture of data-driven decision-making

Mozart Data provides an all-in-one modern data platform, giving you all the tools you need to manage your data. No engineering needed.

## Get the best-in-class modern data stack

### ETL

Combine all of your data with 300+ out-of-the-box connectors.

### SQL-based transform layer

Automate the process of preparing your data for analysis and create a universal source of truth.

### Data warehouse

Store and organize all your data in a Snowflake data warehouse.

### BI tool integration

Easily analyze and visualize data in the tool that works best for you, including major BI tools and Google Sheets.

mozartdata.com

# Improve every aspect of data management

### Data cataloging and observability

Data lineage, version history, and run history help you see what's happening in your pipelines for faster debugging.

### Data reliability

Set up proactive data and transform alerts to rapidly identify and address issues, keeping data quality and trust high.

### Analyst support

Mozart's expert analysts are available to help you efficiently approach problems and write SQL queries, so you get the most out of our platform.

# Experience scalable data infrastructure at a fraction of the time and cost

**1**
hour setup

**10x**
more employees accessing data

**76%**
decrease in time to insight

**30%**
cost savings compared to building your own data stack

Whether you're a start-up without a data stack or a company with an existing Snowflake database, Mozart helps you spend less time wrangling your data and more time analyzing it.

## Trusted by data-driven companies
