

Fonts. Made. Simple.

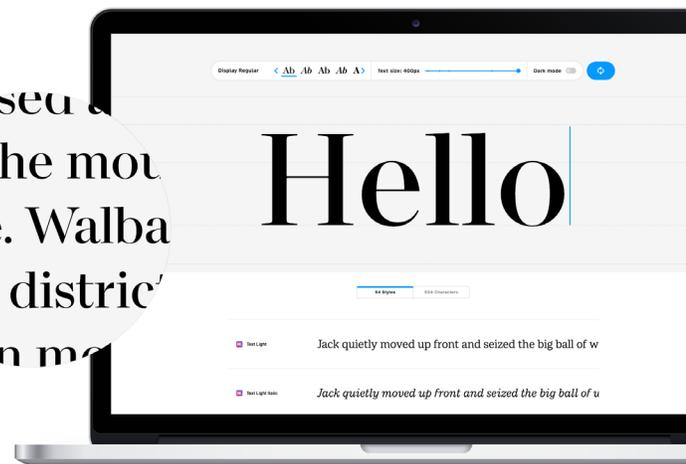

Monotype Fonts is the only on-demand font service developed by creatives, for creatives — making it easier than ever for you to create memorable designs.

Fonts for an inclusive world. The world's most diverse font library brings together all of Monotype's fonts, and renowned independent type designers and foundries. Plus you can add any font, from anywhere to personalize your library.

A better way to work. Favorite fonts, create custom lists and share fonts from the cloud to ensure distributed workflows and nimble teams stay organized and informed.

Expertise at your fingertips. From curating the library to powering search and navigation, Monotype Fonts ensures you have the perfect font for every project.

One library. One workspace. All your type.

Personalized access for everyone. Customize roles based on team or company preferences to ensure everyone has access to the fonts they need, when they need them.

Search for fonts like a professional typographer. Quickly and confidently narrow options by style, genre, foundry or language to easily find the right font for every project.

Sync fonts with the Monotype App. One click is all it takes for fonts to appear in your everyday creative programs. You'll never have to worry about chasing down font files again because missing fonts are automatically delivered to you.

Prototype limitlessly. With unlimited access to all weights and character sets, you're free to create mock-ups, proofs of concept and design iterations without hesitation.

Manage all your fonts in one place. In addition to the Monotype Fonts library, you can upload any font from anywhere. A trusted and secure system allows you to easily organize and track font usage, reducing the cost and complexity of traditionally managing fonts.

A single agreement for all fonts. Gone are the days of one-off requests and complex licensing agreements. Monotype Fonts streamlines the paperwork and approval process so you can work with the fonts you need when you need them.
