Fiix BY ROCKWELL AUTOMATION + **LIBERTY**

The story of Liberty Oilfield Services and Fiix

How an industry leader in the oil and gas industry ditched a CMMS that couldn't deliver and used Fiix to cut downtime and inventory costs

Key facts about Liberty

A global leader in hydraulic fracturing services

Over 400 employees using Fiix

A Fiix customer for over four years

What problems was Liberty having before Fiix?

Little insight into parts spend or usage

No ability to diagnose failure

Lack of support from existing CMMS vendor

Why did Liberty choose Fiix?

They wanted a flexible solution

Custom reporting, maintenance workflows, and work request forms were high on Liberty's must-have list. They found it all with Fiix.

They needed a CMMS that technicians wanted to use

"Having Fiix feels like having an 'easy' button. The guys in my world love it."

- Joe Netherland, Parts Manager
Liberty Oilfield Services

They looked for a partner, not just software

The team at Liberty was able to test the CMMS and get input from Fiix's maintenance experts to design a plan for quick wins and long-term success.

They wanted a tool to impact the whole business

Fiix gave the maintenance team the data they needed to make better decisions, and the tools to easily share those insights with leaders across the company.

How Liberty uses Fiix to boost asset reliability and reduce inventory spending

Making parts purchasing predictable

Fiix's AI-powered parts forecaster allows the team to predict what parts are needed for upcoming maintenance. They've used this tool to reduce inventory spending by only purchasing parts when needed.

Diagnosing failure at a quick glance

The dashboards provide a quick overview of what's going on in each district. This allows the team to spot failure trends and address them in a fraction of the time.

Empowering technicians in the field

Technicians can see what work they need to do and how to do it in just a few clicks without going back and forth to an office, cutting repair times and costs.
