ProImageExperts is a US company based out of Cleveland, Ohio. Equipped with a full-fledged state-of-the-art production facility in India. They are comprised of a team of highly qualified, focused and skilled design professionals with a readiness to turnaround a job in the shortest possible timeframes.

CHALLENGE

"I had problems with my hosting company getting IP addresses blacklisted on several spam websites for various reasons, and was spending a lot of time having to delist these IPs. Also, my customers were complaining that our emails were landing in their spam/junk folders. I needed a reliable platform where I could manage and track all of my emails and could have 24/7 support."

SOLUTION

"Switching to SMTP2GO made all our email delivery problems go away instantly. Now we don't have to deal with complex delivery issues and get buried in endless problems, doing hours and hours of troubleshooting. I don't have to waste time to get IPs delisted from different websites. I have detailed information of each email with a proper explanation within my SMTP2GO reports."
