

Project Management

Equip your team with a robust project management solution. Build a project plan while having full insight and visibility throughout the project. With Mavenlink, your teams have all they need to deliver projects predictably and profitably.

Turn Every Project into a Success Story

Provide a 360 view of Projects

With Mavenlink you get a complete view of your project portfolio. Quickly assess the status and health of a given project or a portfolio of projects, at a glance or down to the task level.

Provide Real-Time Monitoring

Change is a constant. Mavenlink helps you quickly and flexibly manage projects, so you can quickly solve challenges without losing momentum.

Easy Adaptability and User Experience

Mavenlink provides a user experience that will help centralize project management activities, easily and efficiently. Provide a user experience your team will actually use.

Improve project execution
across your business

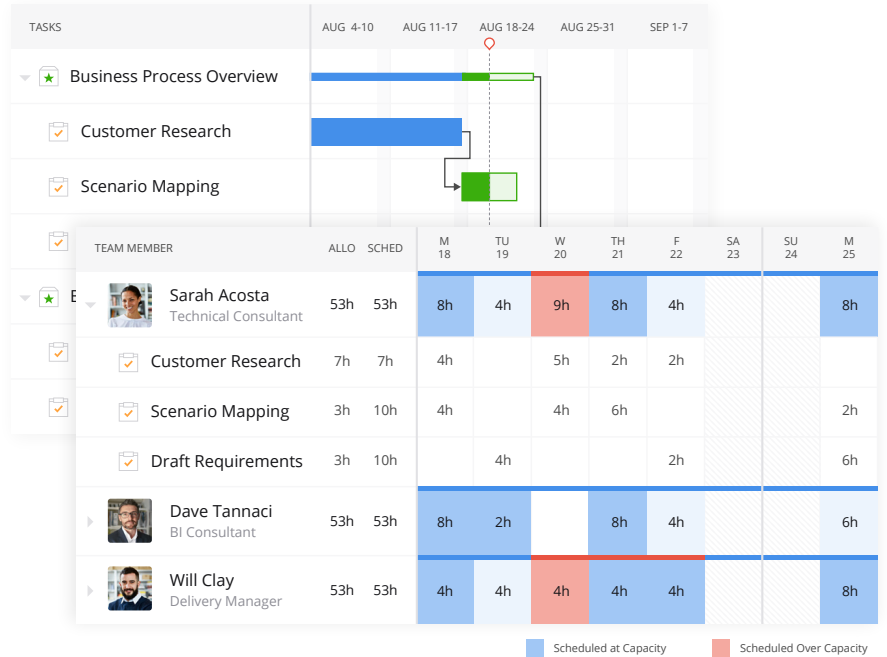

Get the Complete Story on Every Project

Imagine what you could accomplish if you knew the status of every task and deliverable for a project at any given time.

Mavenlink provides real-time visibility through detailed Gantt chart, task lists and threaded communications that help you understand your most pressing needs while an integrated view of the project resource plan provides a complete view of your project team members and their schedules.

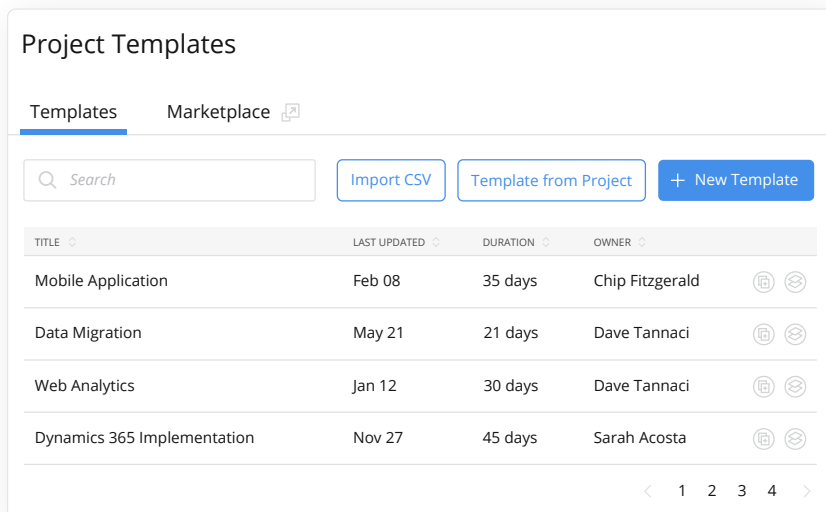

The result is a better understanding of both your people and your projects to make informed decisions, helping you finish on budget and on time, every time.

Deliver Projects Predictably, Consistently

Successfully completing a project is hard work, and replicating that success can be even more difficult. The powerful process automation and process governance features in Mavenlink enable you to implement world-class processes and turn the most successful project plans into reusable templates for future work.

With Mavenlink, you can say goodbye to manual processes, data silos, and workarounds, saving you time and money.

“Mavenlink allows us to get projects up and running faster and has saved us an immense amount of non-billable admin time in project set-up.”

Steve Buck, President, Black Tie Digital Marketing

Continually Improve Project Performance

Schedule, scope, budget, and client sentiment are all crucial to a project’s success, but can be difficult to control. Project Pulse reveals the real-time health of a project while task tracker and resource management tools make needed adjustments without delay.

Mavenlink helps you make both short- and long-term improvements in your project strategies.

The screenshot displays the Mavenlink interface. On the left is a dark blue navigation sidebar with icons and labels for Dashboard, Projects, Templates, Estimates, Tasks, Time & Expense, Billing, Planning, Analytics, Insights, and Settings. The main content area is split into two panels. The left panel, titled 'Master Planning', features a search bar and filters for 'Team Member', 'Department', and 'Location'. It lists team members and their tasks with progress bars: Front-End Developer (75%), Sarah Acosta (100%), Business Process Overview (70%), Build Integration Scenarios (30%), Draft Requirements (Active), Dave Tannaci (50%), Madeline Keefer (100%), and Will Clay (100%). The right panel, titled 'Data Center Migration', shows financial and health metrics. The Financial section includes a bar chart for EAC (\$125,256) and Actual Fees (\$115,700), with a remaining budget of \$24,700. The Health section shows a timeline from June 17 to August 19 with status indicators for Client and Budget.

“Cloudtech uses Mavenlink to perform all the functions of the other systems. They created and deployed project templates, Gantt charts, work breakdown structures and more to manage projects. We can quickly change project information by dragging and dropping, changing columns and directly entering information into columns.”

Tim Pullen, CEO, Cloudtech

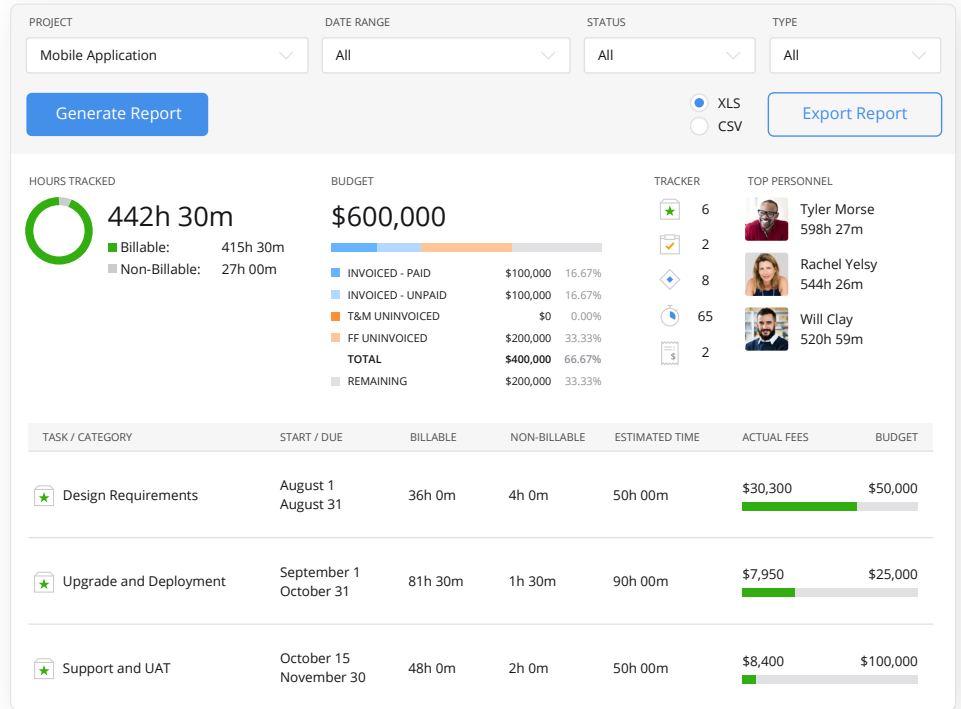

Help Your Business Prosper

Making regular process improvements and being able to reliably predict future needs is critical to sustaining profitability.

Mavenlink Insights reports give you the actionable data needed to improve financial performance and drive long-term success. Insights also provides forecasting and a better understanding of trends to strengthen business strategies.

Mavenlink is designed to unlock the potential of your team and help your business thrive into the future.

“Transparency is key. With Mavenlink, we are all looking at the same data and are all on the same page. With immediate insight into projects, no one in our business is looking at anything different.”

Erika Bellido, Operations Manager, Blue State
