

# Taking the complicated out of compliance

DataGrail's Privacy Platform manages privacy regulations so you can stay continuously compliant. Minimize manual effort, reduce risk to your brand, and avoid hefty fines while helping customers prioritize their privacy.

## Data Discovery and Mapping

DataGrail's 200+ pre-built connectors and integrations automatically provide a live inventory and map of personal data.

## Extended Identity Verification

Use existing personal data to verify requestor identity and avoid collecting additional PII during the verification process.

## Process Requests In Minutes

DataGrail automates the manual and error-prone task of processing and fulfilling data subject requests.

## Instant Visibility

View the status of all requests and manage personal data for your business from one centralized system.

## No Code Onboarding

DataGrail's seamless and easy onboarding process ensures customers are up and running within 60 days or less.

## Reduce Unsubscribe Complaints

Unify customer email preferences with a company-wide preference management system.

## DataGrail Key Benefits

- ✓ Scale seamlessly with new privacy regulations
- ✓ Simplify continuous compliance
- ✓ Reduce business risk
- ✓ Build customer trust

## What our customers say about us...

"In DataGrail we saw a company that was highly focused on giving us a solution for managing CCPA and GDPR, providing a real live data map that no longer needs human intervention to stay compliant."

Christopher D  
NoRedInk

"It's really a fantastic tool and has made compiling data for data requests all out easy and light for our small team to manage. All of the integrations are awesome! And they pull data SO quickly!"
