

FOND'S TRANSPARENT PRICING

At Fond, we believe having transparent pricing delivers the best experience for our customers. We built Fond's Rewards and Recognition platform to be as flexible and configurable as possible so you get exactly what you pay for. With Fond, you can purchase points, track your spending, and understand pricing without worrying about hidden fees or additional charges.

No Markups

Fond doesn't mark up items, add fulfillment charges, or include hidden fees at checkout. The price an item is listed for on Fond is the same as the retail price with absolutely no markup.

No Point Commitments

Tailor your rewards and recognition budget to fit your specific needs. Fond does not require any upfront budget commitments or minimum purchase orders, and you can adjust your rewards budget anytime.

No Point Breakage

Fond Rewards points never expire, and unused points are returned to your company, even if an employee leaves or is dismissed. Other platforms generate up to 30% of their revenue from unused points.

No Service Fees

Fond doesn't charge your company service fees when you order Rewards points. Other companies charge as much as 15% against Rewards points orders.

Easy Implementation

Fond charges a flat one-time implementation fee to onboard your company. This fee covers integrating with your HRIS, training your admins on how to use the Fond platform, and everything you need to get started.
