NordLayer® | Cybersecurity for business

Business cases

About NordLayer

NordLayer provides flexible and easy-to-implement cybersecurity tools for businesses of any size or work model developed by the standard of NordVPN.

We help organizations secure networks in a stress-free way. NordLayer enhances internet security and modernizes network and resource access with technical improvements aligning with the best regulatory compliance standards. Helping organizations to adopt **FWaaS**, **ZTNA**, and **SWG** principles, NordLayer is focused on the **Security Service Edge** of cybersecurity services.

NordLayer's ISMS is certified according to ISO 27001, is HIPAA compliant, and successfully validated with SOC 2 Type 2 audit report

Internet access security

NordLayer helps businesses to secure online connections while accessing and browsing the internet.

- Advanced encryption
- Shared gateways
- Deny access to malicious websites
- Web content filtering

Network & resources access management

NordLayer allows IT admins to control, secure and customize remote workforce access to internal company resources.

- Follows Zero Trust (ZTNA) principles
- Access control to certain content
- Elimination of attack vectors with IP allowlisting
- Flexible interconnection between endpoints and networks in controlled environments
- Granular network segmentation

Achieving compliance

NordLayer supports its clients pursuing various compliance certifications by providing technological solutions.

- Handling client data following best IT security management standards
- Compliance with data processing principles of different regions

Multi-layered network security features

NETWORK SECURITY

INTERNET ACCESS SECURITY

- Shared gateways
- Encryption
- IP masking
- NordLynx
- ThreatBlock
- DNS filtering by category
- Custom DNS
- Deep Packet Inspection

NETWORK MONITORING

- Activity monitoring
- Device Posture Monitoring
- Server usage analytics COMING SOON

NETWORK CONNECTORS

- Site-to-Site
- Smart Remote Access

USER AUTHENTICATION AND MANAGEMENT

- Multi-factor authentication
- Biometric authentication
- Single sign-on
- User provisioning

SECURITY CONTROLS

- Auto-connect
- Always On VPN
- Idle session timeout
- Custom session duration COMING SOON

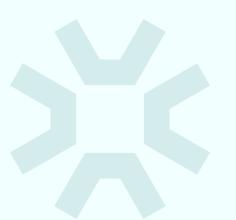

Cybersecurity to enable all ways of working

Compatibility with Identity & Access Management and Authentication systems

- JumpCloud
- OneLogin
- Google Workspace
- Azure AD
- Okta

A solution to resolve growing complexities of work in the most accessible and organization-friendly way

- Intuitive Control Panel
- Hardware-free SaaS solution
- Tech-savvy 24/7 live support
- Help Center & knowledge resources

Operating Systems

NordLayer app is compatible with

iOS	Android	macOS	Windows	Linux

Protected and secure connection on the device level

Browsers

NordLayer browser extension (NEW) is compatible with

Google Chrome	Mozilla Firefox	Microsoft Edge

Protected and secure connection within browser limits
