Customers Speaks

We got the complete MyWipro App integrated with our SAP systems. Citizen developers are launching enterprise apps in our company for various operations and business processes.

My **Business team is enjoying building and launching apps** for work with DronaHQ's intuitive UI that is helping break down complex scenarios into simple task-based apps.

Got an exhaustive ERP based app built for our custom requirements that we can **tweak on our own, no wait time** or paying the programmers.

Material Request App **launched within 2 weeks** that helped speed up project-critical processes by 60%.

In **6 weeks** we transformed from paper to **25 apps** for our media and entertainment business **without going to any developers.**
