## CLOUD SERVICES

WORK SMARTER, FASTER, MORE COMPETITIVELY

### / SOLUTIONS OVERVIEW

Next-generation configuration of hardware, networks, storage, services and interfaces that allows you to access data from any device, no matter where you are. Guided by Magna5 expertise, organizations use the cloud to work smarter, faster and more competitively.

The cloud allows organizations to experience inherent benefits such as flexibility, elasticity, ability to scale up or down, easy billing and usage metering. Designed to deliver the perfect fit for your hosting and business needs, Magna5 offers multiple different cloud options in several secure data centers ensuring high availability, agility, risk mitigation and cost savings.

### / KEY CAPABILITIES

- Fully managed
- Proactive support
- Scalable
- Cost savings
- True agility
- Risk mitigation
- Availability
- Flexibility
- Expert support

#### PRIVATE CLOUD

- Flexible, scalable, single-tenant environment with fully dedicated infrastructure
- Ideal for when you have large computing and storage requirements, strict security and compliance needs or want to accelerate innovation

#### HYBRID CLOUD

- Private and public computing infrastructures remain unique entities, but are connected through standardized technology for data and application portability
- Gain on-demand public cloud scalability while sensitive data can remain behind firewalls

#### CLOUD SERVICE

- Combines Magna5 infrastructure from two data centers with help desk, advanced managed IT services and cloud to offer true IT agility, efficiency and cost-savings
- Reduces operational waste while improving the utilization of equipment
