EONE

Super Star Car Wash Simplifies Multi-Company Reporting

Problems and Challenges

As a small business, Super Star Car Wash had always outsourced their accounting needs. While outsourcing worked for a while, the business continued to grow and thrive. Super Star Car Wash knew they needed to bring their accounting back in-house.

Eventually, they settled on utilizing Microsoft Dynamics 365 Business Central as their ERP of chose. Though D365BC was a great fit, they soon found it didn't provide an easy way to view reports on a daily or weekly basis across all 25 companies in Business Central.

The Solution – Popdock

"A consultant we were working with mentioned Popdock and its association with eOne. I had worked with eOne Solutions through their SmartList Builder product, so when I heard they had a solution that might fit the bill, I knew I need to see it," commented Dan Vaith, Chief Financial Officer.

After a small amount of training and working with a key support specialist at Popdock, Super Star Car Wash was able to begin producing the multi-company reports they needed with the help of Popdock.
