Tramingha Unlock the WHERE in your data

Geographic Analysis

- Uncover trends in your Salesforce data
- Design balanced territories based on key business criteria
- Find event venues and create localized marketing campaigns

Territory Management

- Onboard sales people in a new territory faster
- Assess and reassign territories with ease as teams change
- Design and optimize trips to maximize field productivity

Automated Assignments

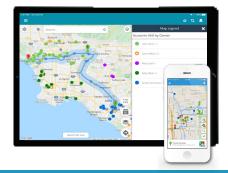

- Automate lead routing utilizing geographically defined areas
- Modify assignment rules simply by drawing lines on a map
- Eliminate cumbersome and manual assignment processes

Scheduling and Routing

- Intelligently create routes for upcoming weeks and months with Route Planner
 - Dramatically reduce time spent manually planning trips
 - Visualize scheduled travel plans and update events from the map with Calendar-Based Scheduling

Salesforce Mobile Integrated

- Plan, optimize and share routes
- Check-in to log notes and capture location in real-time
- Fill-in meeting cancellations while in the field
