cloudm

Migrate to Google Workspace

Fast - seamless - secure

Migrate and move your data to wherever you want, whenever you want.

Our enterprise-grade platform is powered by our core migration technology. We are ISO 27001 certified and provide full end to end encryption (AES 256).

With over 12 years of data migration experience and over 45,000 customers worldwide, we are the partner of choice when it comes to migrating data, either from external systems or as a tenant to tenant migration within the Google ecosystem.

Our technical support teams offer skilled pre and post sales support, while our simple license structure offers competitive pricing with no data caps.

> "CloudM Migrate was invaluable in helping us migrate our staff to Google Workspace. The product was excellent and meant we reduced our migration time by about 30%. Where any problems did arise, the technical support response was first class."

Norbert Attard, Technology Project Leader, Macquarie University

Get off to a great start with our pre-migration environment scan

Get a better idea of your migration and avoid delays with our complimentary pre-migration environment scan.
Analyze your source environment, identify roadblocks such as corrupted files and gather key insights on item counts, data volume, permissions and folder depth.
