

## Potential ROI using WorkClout

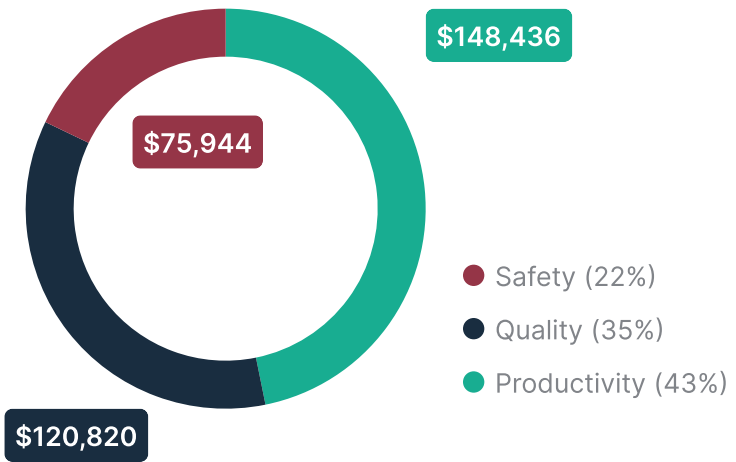

# WorkClout ROI Impact

The following use case provides an example of estimated savings and potential returns when using WorkClout.

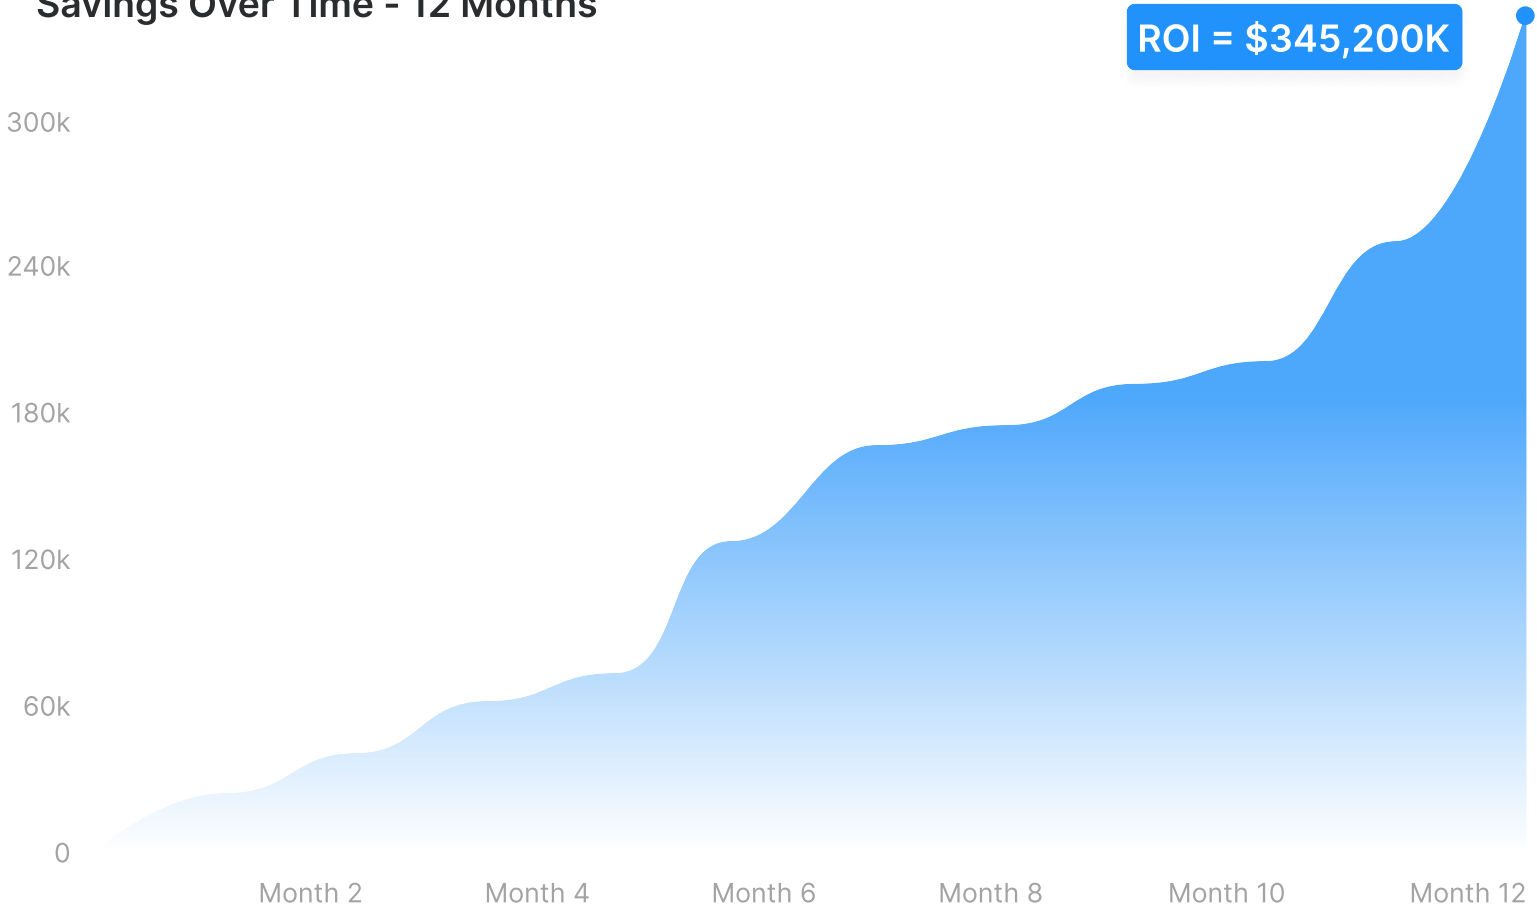

## Annual Savings

Save hundreds of thousands (\$) annually in Safety, Quality, and Productivity, when adopting modern connected process improvement software.

ROI: \$345,200 or 11X the cost of the software with a payback period that is well below 12 months.

## Savings Over Time - 12 Months

\*Calculated based on 300 employees making a national average salary of \$16/hour

## Total Productivity Savings **\$148,436**

### Monthly Time Savings - Productivity

WorkClout helps your organization redefine efficiency by centralizing your important data and knowledge and automating activities to significantly improve productivity.

The bar graph on the left shows an example of potential time saved per activity per month.

- Change overs
- Line production
- Machine downtime
- Preventive maintenance
- SOP adherence
- Daily work activities
- Data collection
- Trend analysis
- Team communication

### Annual Savings by Productivity Activity

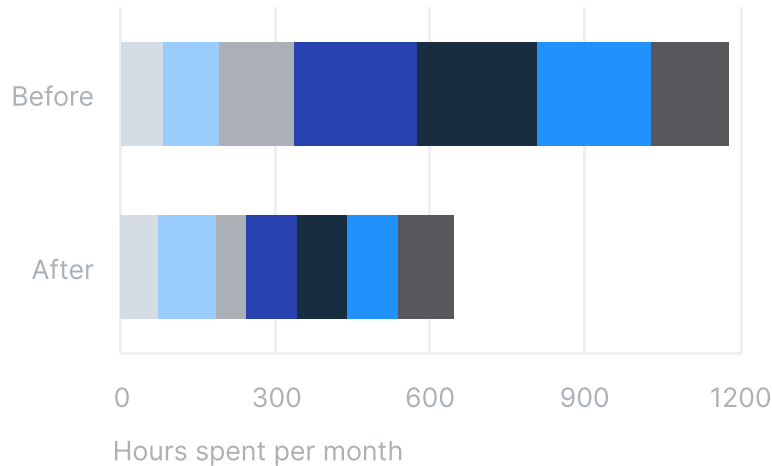

\*Calculated based on 300 employees making a national average salary of \$16/hour

## Total Quality Savings **\$120,820**

### Monthly Time Savings - Quality

The cost of quality is compounded exponentially over time (1-10-100 rule). WorkCloud helps with cost avoidance by reducing the time and error rate that comes with quality processes. By automating these processes as much as possible, your organization can get a boost in quality and customer satisfaction.

The bar graph on the left shows an example of potential time saved per quality activity per month.

### Annual Savings by Quality Activity

\*Calculated based on 300 employees making a national average salary of \$16/hour

## The Compounding Costs In Quality

Every deviation in quality that is identified results in thousands of dollars in savings. Over the course of a year, these identified quality deviations that are corrected compounds to hundreds of thousands of dollars in cost avoidance.

### Imagine catching these deviations in real-time?

Employee	Task	Deviation
 Zaire Philips	#233 - KBA 57' Print QC Score	FAIL - Confirm that there are no damages or nicked blades
 Zaire Philips	#234 - KBA 57' Print QC Score	FAIL - Confirm that shims behind the doctor blade and end seals and correct
 Mark Hu	#236 - KBA 57' Print QC Score	FAIL - Confirm that shims behind the doctor blade and end seals and correct
 Mark Hu	#213 - Daily Safety Walk	FAIL - Is there a non-conformity for the job?
 Tyrone Ch...	#215 - Shipping QC	FAIL - Does the shipping label reference the correct job number?
 Tyrone Ch...	#211 - Lockout / Tagout	FAIL - Is the emergency light still lit on the machine when the power is off?

A single inspection FAIL can cost upwards of

**\$1000**

Costs increase over time by a factor of 10x when unresolved

**X10**

Inspection FAIL cost overtime

**\$10,000**

\*Figures on this page do not represent real costs; the intent is to illustrate that capturing a quality problem later in the manufacturing process cost by a factor of at least 10x.

## Total Safety Savings **\$75,944**

### Monthly Time Savings - Safety

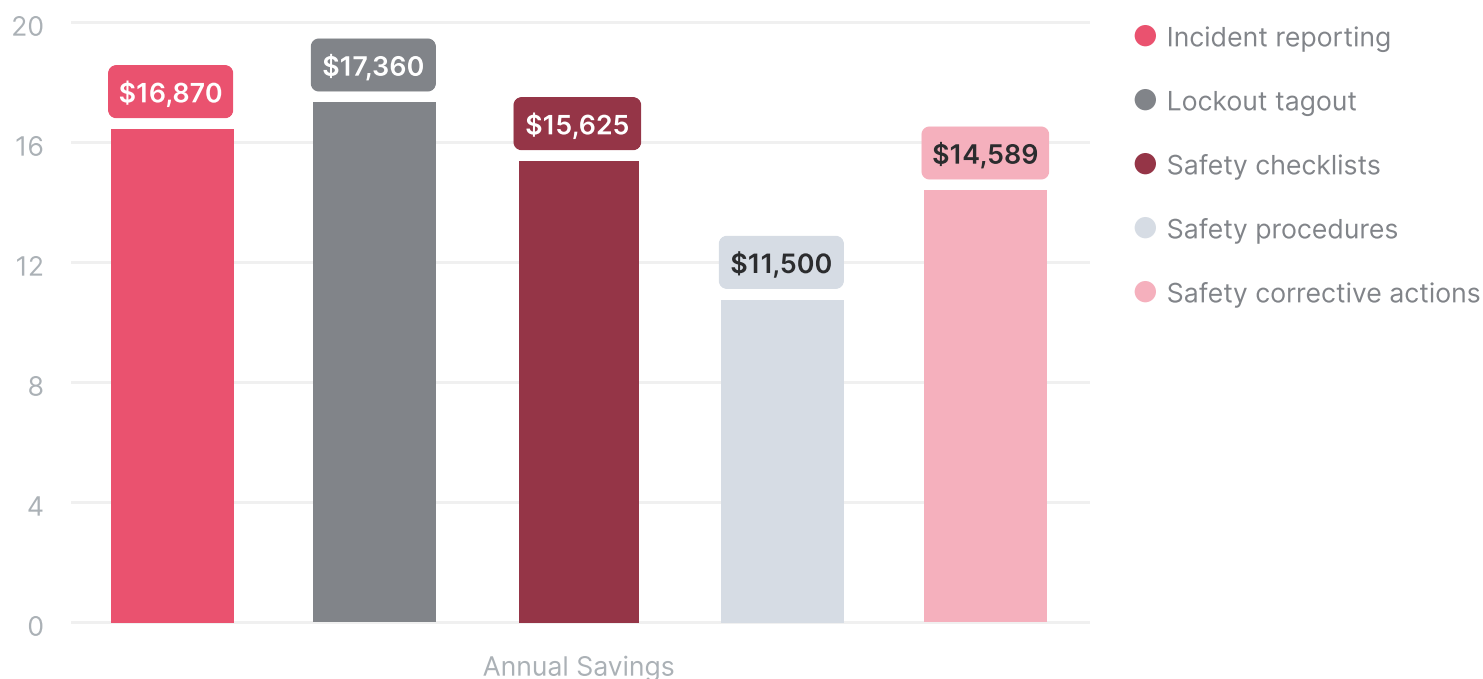

Manufacturing is hectic, typical workdays involve several employees cycling in-and-out, running into new issues, and performing multiple activities.

WorkClout helps keep your employees safe so they can focus on reaching benchmarks. WorkClout helps by automating safety inspections and enabling instant communication of incidents across teams.

The bar graph on the left shows an example of potential time saved per safety activity per month.

- Incident reporting
- Lockout tagout
- Safety checklists
- Safety procedures
- Safety corrective actions

### Annual Savings by Safety Activity

\*Calculated based on 300 employees making a national average salary of \$16/hour

# WorkCloud Use Cases

## Productivity

### Process Improvement

- Increase changeover speeds
- Increase line speeds
- Increase output per employee
- Reduce machine downtime
- Increase yield output

### Daily Management

- Perform preventive maintenance
- Perform work instruction and procedure adherence
- Collect data from work activities
- Collect data from machines, tools, other systems
- View data trend analysis for OEE
- Communicate with workers and teams

## Quality

- Reduce inventory wastes
- Reduce operating costs
- Reduce excessive quality defects
- Prevent quality incidents from recurring

- Perform quality inspections
- Perform process audits
- Report quality incidents and defects
- Perform quality checklists
- Log nonconformance escalation
- View statistical process control (SPC)
- Report quality corrective actions

## Safety

- Reduce safety incidents
- Prevent safety incidents from recurring

- Report safety incidents
- Perform lockout tagout
- Perform safety checklists
- Perform safety work instructions
- Report safety corrective actions

**“I have saved so much time by using Workclout - not only have I noticed my workers being able to get much more done in a day, but also I feel like our team dynamic and culture building has strengthened by far.”**

- Jason Walia, Operations Manager at Flex

The #1 Process Improvement Software helping manufacturers build a problem-solving culture that lasts.
