

Rever: Activating the Frontline to Drive Operational Performance

Rever is a smartphone app that unleashes the untapped potential of your frontline workers by empowering them to drive improvements, address acute issues, and solve problems leveraging standard methodologies, collaborating across teams, and tracking impact on performance. All activity generated by your frontline is consolidated onto easy to read dashboards showing real-time analytics.

Empower the Frontline

Empower those closest to the action with the ability to not only report ideas and problems, but to take action. 80% of improvement ideas come from the Frontline.

Continuous Improvement for Innovation

- Guided PDCA Workflow

Quick Action for Issue Resolution

- Guided Quick Fix Workflow

Problem Solving for Root Cause Analysis

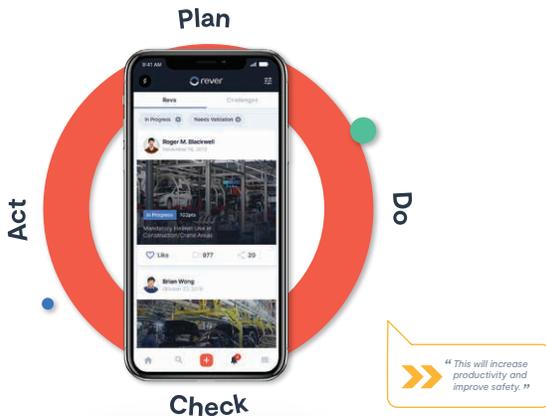

- Guided 8D Workflow

Approval & Accountability

Enforcement of authorization responsibilities, flows, and requirements.

Track Impact on Business Performance

Capture data on operational performance at the frontline to recognize contributors and analyze ROI.

Connect individuals to collaborate, share, and learn together. Building an engaged workforce when 70% of the US workforce is disengaged is a competitive advantage.

Access via Mobile/PC

Mobile technology already in the hands of the frontline with easy to use features. On the PC for those at a desk to dive into problem solving, data analysis, and reporting.

Virtual Teams to Collaborate

Assign the right people from across the company to implement ideas and solve problems. Collaboration is easy with notes, attachments, and access from anywhere anytime.

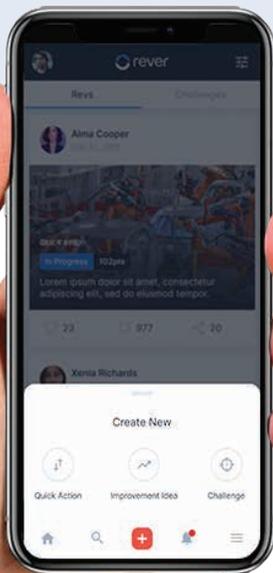

Share Ideas & Solutions

A central data source eliminates information silos and the reinventing of solutions by sharing ideas and learnings across the organization.

Engage Frontline in Industry 4.0

- Drive** programs that engage employees, centralize data, and provide actionable insights by leveraging technology already in the hands of the Industry 4.0 frontline.
- Campaigns to Align Associates**
 Campaigns focus efforts by recognizing and rewarding those contributing to the targeted objectives.
- Recognize & Reward**
 Gamification drives engagement by assigning points to participant activity and allowing leaders to recognize those making an impact.
- Real-time Insights & Dashboards**
 Real-time visibility to measure and report on the activity and results that matter.
- Leverage Frontline Data Insights**
 Centralize data to uncover insights, make better decisions, and improve with machine learning.

“I can kick off different types of innovation and problem solving activities.”
