

What's the ROI of digitising your ISMS or ISO 27001 certification?

What is the real monetary benefit of getting rid of all those unlinked excel spreadsheets, automating important task reminders and digitising your ISMS?

We take a look at the workload time saving, but there are many more ways ROI is returned - such as providing you with a more robust ISMS and an improved culture to reduce the likelihood of a data breach.

✓ Commercial and Competitive Advantage

✓ Easier Certification Management

✓ Reduce Risk

Benefits

Commercial and Competitive Advantage

Being able to ensure you maintain your ISO 27001 certification will help your business win and retain more customers. Showcase that you manage your ISMS in a streamlined digital system and easily add more certifications over time with ease.

Easier Certification Management

Hicomply makes it easier to manage all of your standards in one place. Efficiency and cost savings come through providing full transparency of what needs to be done, and the automation of Policy Management and admin tasks.

Reduce Risk

A more robust ISMS enables better risk management, reducing the risk of loss or damage to your assets as well as the risk of losing your certifications. Additional risk mitigations include the likelihood and impact of data breaches, as well as reducing the risk of your supply chain impacting your business.

Improve your infosec culture, empower your team

With a platform that's easy to use and accessible, Hicomply fosters a culture of transparency, responsibility and accountability. This helps to ensure employee compliance and ease of onboarding new staff, ultimately leading to higher levels of staff and key stakeholder buy-in.

Learn how Coyote Software digitised its ISO 27001 processes

"The fact that Hicomply could not only help the company get its certification but could also ensure that it kept it going forward, plus the fact that there was a centralised repository for their ISMS documents, was the clincher in achieving Coyote's business."
