**"What made Certainty our choice was its ease of use combined with the powerful features. Certainty is an enterprise-grade software solution, which supported offline and online audits in multiple languages - allowing us to produce consistent meaningful metrics."**

Kiran Venkitesh, Platforms Manager, Supply Chain & Product Assurance

## CHALLENGES

DNV sought a scalable solution to digitize its supply chain audits, ensuring consistent processes for assessing supplier compliance. The goal was to provide clients with better visibility into supply chain risks and actionable data to drive decision-making in managing global supply chain networks.

## SOLUTIONS

Certainty Software provided DNV with a digital platform to manage supply chain audits globally. The platform offered custom audit templates, centralized reporting, and real-time data access, empowering DNV's clients to make informed decisions about their supply chain risks. With this solution, DNV strengthened its role as a trusted partner in supply chain risk management and compliance.

**Streamlined audit processes** for faster, more efficient supply chain management

**Improved data accuracy** with consistent, reliable audit results.

**Enhanced compliance visibility** through real-time risk insights.

## BENEFITS

### Global SCM Standardization

Certainty Software ensured consistent auditing standards for DNV across all of its supply chain assessments.

### Improved Operational Efficiency

Automated workflows reduced the time required for DNV to deploy and manage audits.

### Flexible Deployment

Audits were completed efficiently using both online and offline tools tailored to client needs.
