Insights

Quinyx makes it simpler to follow up on your business's most important key performance indicators, such as sales figures, number of scheduled or worked hours and staffing costs. This allows you to respond quickly to new trends and changes within your workforce. Quinyx Insights is a tool for following up your business's most important key performance indicators, such as sales figures, number of scheduled or worked hours and staffing costs.
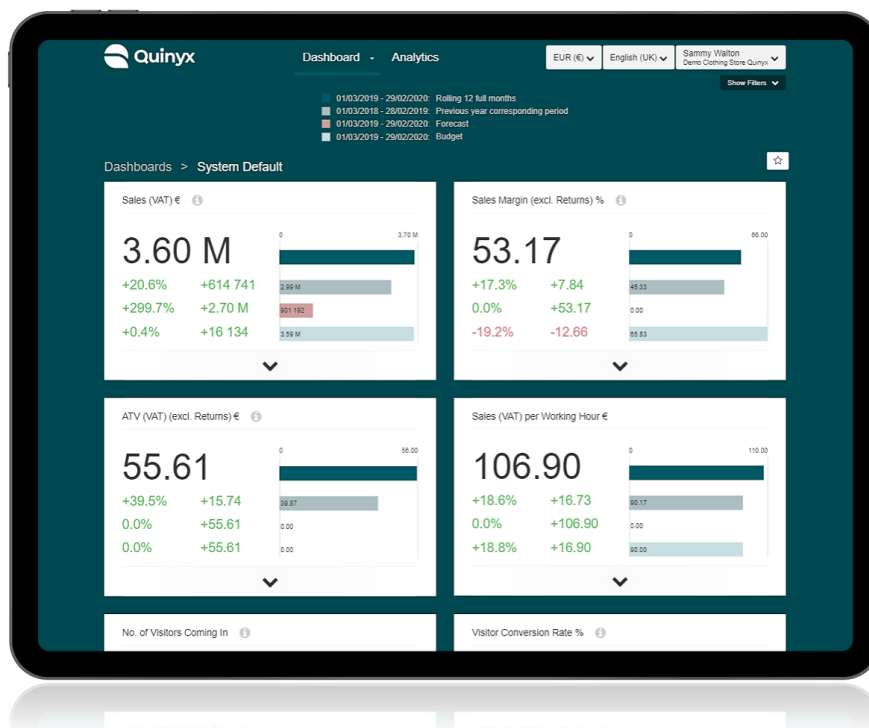

It allows you to build custom reports with graphs, tables and other graphical components to present your data in the most intuitive way possible. Your reports can be shared globally or restricted to specific roles.

Overview

- Full overview of your business' performance at all times
- Act fast and early on unexpected changes
- Spot new trends early to adapt your business in time
- Identify new data relationships by combining variables any way you want

Reports

- Create completely custom reports
- Share your reports with your team
- Aggregate data across units and regions
- Ensure that everyone in your organization only sees data for their business units

Forecast

Accurate and effective forecasting can mean the difference between turning a profit to making a loss. With advanced forecasting in Quinyx, you can create optimal schedules based on your forecasts and historical data. Balance your planned costs against results to create the most profitable resource plan.
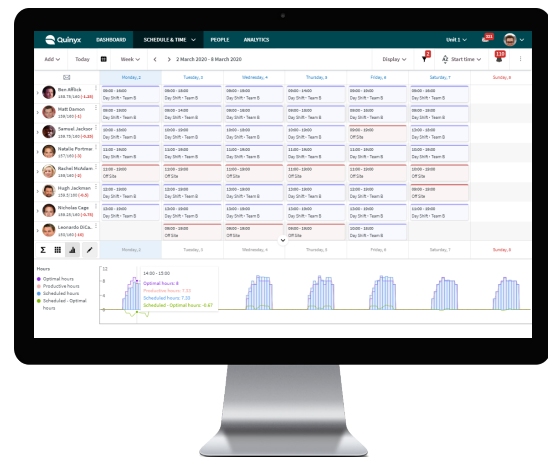

Overview

- Review sales activities and budgets
- Allows an overview of footfall and sales on a more detailed level
- A staff planning system which can be fully integrated with Point of Sales systems or other business tools
- Edit daily forecasts
- Easily predict future needs with the help of historical data
- Rapid and efficient scheduling based on multiple selectable variables and KPIs

Optimization

- Transparent and detailed information about outcome compared to forecast and budget, which provides a greater opportunity to influence the end result

- Survey and compare previous years' sales with tomorrow's forecast
- Create an optimal schedule with the help of advanced forecast algorithms and rules

Reports

- Compare outcome with expected sales or footfall

Task

Easily plan recurring tasks for your whole organization.

Improve efficiency by creating workflows for your employees, and enabling managers to track these to ensure important daily tasks are being completed.
