# Why you need a dedicated expense solution

Late or incomplete reports. Missing receipts. Coding errors. These issues keep your finance department busy, instead of guiding organizational growth. And these are exactly the challenges that a dedicated expense solution can eliminate—with the right type of integration.

Growing organizations know that **agility is essential** to staying competitive in a global economy. Used by organizations worldwide, Oracle NetSuite offers a unified, cloud-based platform to manage everything from supply chains to advanced financials for organizations of all sizes. The real-time insight provided from a single, fully-integrated system empowers finance leaders to make strategic decisions—fast.

But how can your finance team offer strategic guidance if they're still using time-consuming solutions to track expenses?

While cloud-based Enterprise Resource Planning software is an excellent way to maintain a single source of truth company-wide, their built-in expense management tools aren't always the best fit for growing organizations.

Even more, **difficult to use expense solutions** stifle growth by decimating employee productivity, reducing user adoption, and hindering accurate reporting.

The difficulty becomes finding a solution that empowers both end users and approvers, while seamlessly integrating with Oracle NetSuite.

In five steps, we'll cover everything from mapping the needs of every user and department, to navigating solution vendors and product demonstrations. You'll have the knowledge and tools to compare the myriad of solutions available with a clear path to selecting a T&E solution that connects seamlessly with Oracle NetSuite.

# Start with a goal in mind

The motivation behind investing in process improvement is an evergreen challenge for every department. As organizations grow, what once worked, doesn't anymore—and the impact can be far reaching.

According to data from [Levvel Research](#) (formerly PayStream Advisors)\*, the cost to process a single expense report for best-in-class organizations is \$6.85. Comparing this to a manual process, where the cost to process a report is nearly four times more costly at \$26.63, you can see how T&E inefficiency can eat away bottom-line revenue.

Even if you're only processing 500 expense reports a month, the difference in cost between a manual and automated system could be over \$118,000 per year. And that doesn't account for the lack of compliance, lost productivity, or incomplete visibility into spending—problems with serious, long-term impact.

## QUALITIES OF BEST-IN-CLASS EXPENSE SOLUTIONS

- ✓ Accessible anywhere, from any device
- ✓ Improves expense report submission
- ✓ Eliminates paperwork, errors, and lost productivity
- ✓ Streamlines approval workflows and reviews
- ✓ Educates spend culture with granular policy controls
- ✓ Automates everything from receipt capture to credit card feeds
- ✓ Provides deep insight and reporting into company spend
- ✓ Secures data to the highest standards
- ✓ Scales as the organization grows

This makes setting **FAST goals** even more important. By focusing on your desired outcome for all users, you'll have a more efficient evaluation process as you discover and review vendors.

But what are the qualities of a best-in-class expense process, and is it attainable for any organization?

\*PayStream Advisors 2016 Travel and Expense Management Report

# Map your current process

You can't improve what you can't completely see. Start by benchmarking your current expense process to better understand its impact on every user and department.

Data from our **2019 T&E Management Trends Report** showed that nearly 50% of organizations surveyed don't track expense reporting costs. Without knowing the cost to process a report end-to-end, finance departments can't determine if T&E spending is effective.

Mapping your current process provides a point of comparison against industry benchmarks.

You'll know the impact of your current process, making it easier to gather requirements, identify top priorities, and support your business case.

Top solution providers typically guide you through this process and offer best practices to streamline your workflow. These figures will be invaluable in calculating the return on investment for your future expense solution.

## TOP 5 T&E PAIN POINTS

- 53%** Employees losing receipts/submitted without receipts
- 41%** Employees' failure to submit reports on time
- 35%** The time to reconcile, review, and approve reports
- 27%** Errors on the report (incorrect codes, payment amounts, etc.)
- 26%** Reconciling travel and expense data

# Map your current process

**Map your expense process end-to-end for every user to understand the time it takes to create an expense report.**

Multiplying the time it takes each role to create and submit an expense report by their hourly wage will give you a rough estimate of expense report processing costs.

## END USERS

1. Document expenses and attach receipts
2. Categorize and code expenses, cost centers, etc.
3. Create expense reports (print spreadsheets and staple documentation), make copies
4. Sign and date, submit to manager for approval
5. If errors, correct report and resubmit
6. Wait for reimbursement

Time spent \_\_\_\_\_

Average hourly rate \_\_\_\_\_

Total cost to user \_\_\_\_\_

## APPROVERS

1. Receive reports from submitters
2. Review expense reports for receipts, coding and categorization, policy compliance, etc.
3. If errors exist, document and return to employee to correct and resubmit. Wait for resubmission
4. Approve report and route to next manager or finance department

Time spent \_\_\_\_\_

Average hourly rate \_\_\_\_\_

Total cost to user \_\_\_\_\_

## FINANCE DEPARTMENTS

1. Receive 'approved' reports
2. Review expense reports for receipts, coding and categorization, manager approval, policy compliance, etc.
3. Match receipts with expense items, verify all charges, dates, vendors, and coding
4. If errors exist, document and return to approver to have submitter correct and resubmit. Wait for resubmission
5. Manually enter expense data into Oracle NetSuite
6. Initiative reimbursements, or manually enter data from Oracle NetSuite to payroll for reimbursement

# Identify what type of integration you need

Oracle NetSuite has an extensive network of integrations to major solution providers. But not every integration offers the same value to finance departments.

Seamless integration between an expense solution and Oracle NetSuite is essential to get the most value and information from your expenses.

Some solutions require users to manually download, format, and upload files to Oracle NetSuite—increasing close times and the potential for human error. Other third-party connectors sync on a pre-defined schedule, but could be limited by configurability, scalability, and longevity.

To get the most value from your T&E spending and Oracle NetSuite, you need an API-based integration with a bi-directional sync.

## Dialogue, not monologue

A bi-directional sync between Oracle NetSuite and an expense solution provider offers unmatched usability and visibility. The two solutions can send data to each other, adding more granular control and insight into expense data while keeping your chart of accounts secure.

Choosing an expense solution that syncs against custom fields in Oracle NetSuite instantly add more depth to expense items by tracking charges against Customers, Vendors, Items, Classes, and more.

## Faster setups that scale

Other key benefits of an API-based integration comes from faster setup times and decreased administrative upkeep. Since the two systems speak with each other, all information from Oracle NetSuite can be transferred to configure your chosen expense

solution. This significantly cuts down implementation times and easily adapts as the organization changes.

## Together long term

When moving to a SaaS-based expense solution, typically the vendor—not your finance or IT department—will maintain the system for you. Unlike homegrown solutions or on-premises technology, your expense vendor becomes a partner for the long term. Which makes it even more important to find a solution with a proven track record.

### ESSENTIAL ELEMENTS FOR INTEGRATING ORACLE NETSUITE

- ✓ SuiteTalk API with bi-directional data sync
- ✓ Multi-entity functionality
- ✓ Multi-currency capability with global tax support
- ✓ Control over export segments and custom fields
- ✓ Built for NetSuite verified

# Find the right fit—fast

Data from research firm IDC expects the worldwide T&E solutions market to reach \$2.7 billion by 2022\*—making it a perfect time to invest in new technology.

With so many **new expense solutions** coming to market, it can be a challenge sifting through the options. The key is to remember the qualities of best-in-class expense solutions and your organization's unique needs when selecting a vendor. Finding the perfect product fit is essential to **achieving rapid ROI** and improved visibility into company spend. Even with sophisticated technology like expense management software, the basic process for finding and vetting a vendor is pretty standard.

## Research your options

Take your search online with a shortlist of potential vendors. For real-world reviews from actual users, check out user review sites such as **Capterra**, **G2**, and **Oracle NetSuite's marketplace**. You'll get a pulse for the different solutions which will help narrow your options.

## Use your expense solution comparison checklist

Use the **checklist** at the end of this ebook to rate potential vendors against your top priorities. That way you can check off features you need before investing time in sales calls or product demonstrations.

## Include your employees

Bringing together a cross section of users for a product demonstration is invaluable in the buying journey. By having someone to represent each use case, you'll not only uncover any potential shortcomings of a solution, you'll also streamline stakeholder buy-in across the organization.

Attending a live product demonstration also has a hidden benefit. You'll gain a good sense of how the solution provider operates at the administrative level—which is very important with SaaS-based solutions.

\*Permenter, K., Jewell J., Rizza M.N. (2018). Worldwide Travel and Expense Management Software Forecast, 2018-2022: Improving User Experience Is Key to Growth

# Find the right fit—fast

A break down of what each user group wants from a dedicated expense solution.

## WHAT MATTERS TO USERS?

**End users want a simple tool that makes expense reporting quick.**

- Anytime, anywhere access
- Ease of use (adding expenses, receipts, and documentation creating, submitting, editing reports)
- Digital receipts capture and expense reporting
- Fast reimbursements

## WHAT MATTERS TO APPROVERS?

**Approvers want to review only expenses that need attention.**

- Powerful compliance controls
- Flexible approval workflows
- In-app communication with submitter
- High employee adoption rates
- Self-service help center

## WHAT MATTERS TO FINANCE DEPARTMENTS?

**Having accurate expense data available in real time, with little administration.**

- Increased policy compliance
- Greater insight into employee spending
- Airtight audit trails for compliance and reporting
- Full-service or guided implementations
- Scalable integrations that adapt with the organization
- Reliable solution with minimal downtime

## WHAT MATTERS TO IT/ENTERPRISE?

**Staying secure without maintaining a new tool.**

- Reliable solution without maintenance
- Highest standards for security and compliance
- Complete help center
- Network of reliable partners

# Bring everything together

Now that you're armed with the information you need to select an expense solution for Oracle Netsuite, it's time to put ideas into action.

## Evaluating and comparing vendors

After you've narrowed down potential solution providers, it's time to set up product demonstrations. By now, you've used the steps in this guide to understand where your current expense process stands, the qualities of efficient T&E management, and the needs of each user.

Use the checklist to evaluate each vendor during the product demonstration to ensure their solution will help you achieve your goals.

**Will your vendor grow alongside you as your business evolves? How often do they release new features? When was their last system update? Take care in finding a vendor that is a good long-term partner—and they'll always be by your side.**

## What's next?

Using an expense solution that integrates with Oracle NetSuite will give your finance department fewer errors, higher compliance rates, better visibility into company spending—and much more productive employees.

The right tool can deliver immediate value company-wide to improve employee productivity in every department, reduce T&E processing costs, and arm finance with the information they need to adapt to change.

Your entire organization will have a solid, streamlined expense management process that will help them grow for years to come. And with the right solution, you'll have a dependable partner you can always count on.
