

# LSM

## Lab Service Manager

LSM Add-on brings a complete LIMS/LIS to the LabCollector platform, fully and easily configurable to fit all types of analytical and other service labs.

Quality Control  
labs

Medical  
labs

Analytical  
labs

Metrology  
labs

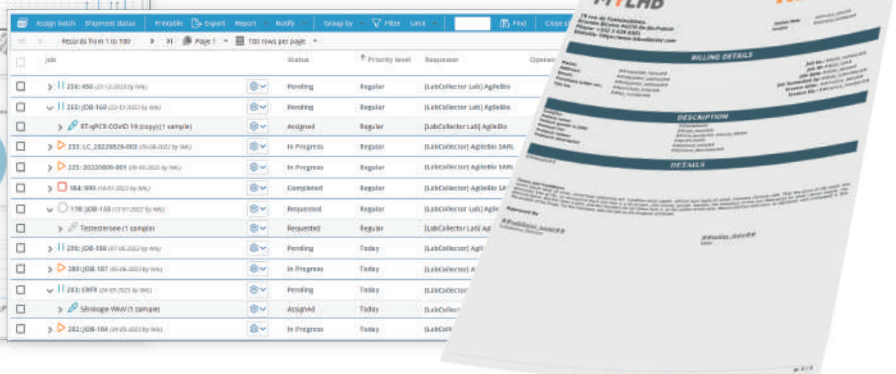

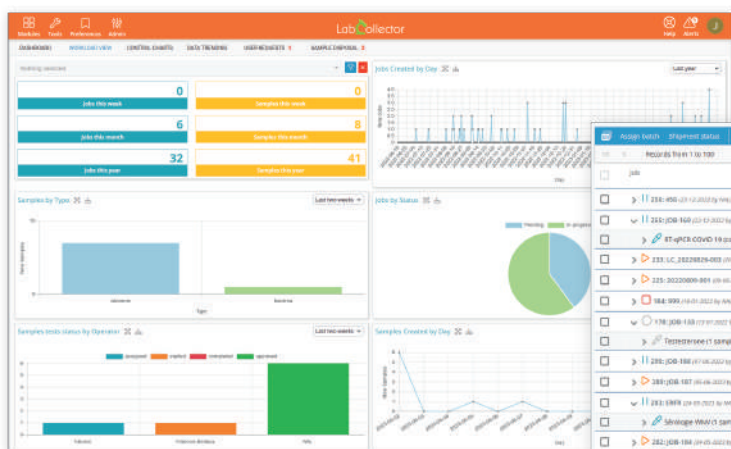

Core  
labs

## Simplifying the process from ordering to reporting

Web Portal/API

LabCollector LSM is a web solution that handles the management of test requests, sample reception, testing, reports generation and billing of services. Fully integrated management of reagents, instruments, protocols and tests makes LabCollector LSM a complete and powerful LIMS/LIS.
