

## Purpose-Built Tools for Better Behavioral Health Outcomes

At Alleva, we build tools that don't just support care—they elevate it. Our platform was designed by clinicians for clinicians, with a focus on streamlining workflows, ensuring compliance, and giving time back to those who need it most. From documentation to billing, every feature helps your team deliver efficient, effective, and client-centered care.

### Powerful Reporting at Your Fingertips

**Make informed decisions with customizable reports, on-demand data pulls, automated alerts, and in-depth analysis** across every area of your organization. Whether you're tracking compliance, billing KPIs, or client engagement, Alleva Insights keeps you in control.

### Echo AI: Streamline Session Notes Without Sacrificing Quality

**Alleva Echo is our HIPAA-compliant AI assistant** that listens to sessions and **generates structured clinical notes** in real time. It supports DAP, SOAP, UR, and more—helping reduce burnout, ensure compliance, and free up valuable time for direct care.

### Compliance-Driven Documentation

**Alleva ensures documentation stays accurate and compliant.** Clinical notes must meet required fields before submission, eliminating incomplete entries and reducing back-and-forth between staff and QA teams.

### ETT: Faster Reimbursements Through Smart Billing Rules

**Our Encounter Transmission Table (ETT) links documentation directly to billing.** Once a note is completed, the system automatically applies payer-specific billing rules—turning encounters into clean claims with less manual work and a higher approval rate.

### Travis AI: Instant Help Inside the EMR

**Travis AI is your 24/7 assistant safely within Alleva.** Powered by AI and connected to our knowledge base, Travis answers questions, helps with shortcuts, and guides users without disrupting their workflow.

## Exceptional Service Model

**We back our technology with unmatched human support:**

- **White-glove implementation** led by experts in behavioral health
- **Dedicated Customer Success & Support Teams** focused on your long-term growth
- **Personalized onboarding & training** to meet your team's needs
