LinkEye

Your Network Co-Pilot

RELIABLE. SCALABLE. INTELLIGENT NETWORK MANAGEMENT

Centralized Monitoring

Real-Time Insights

Efficient Troubleshooting

AI-Assisted Troubleshooting

- AI-driven diagnostics for resolving issues
- Accelerated accurate root cause analysis
- Reduced MTTR and seamless operations

Co-Pilot insights ✕

✓ Checking the SSID Configuration of the Wireless Network

✓ Verifying SSID Broadcast

✓ Checking Current AP Capacity by Model

✓ Checking Client Association Table

✓ Checking Client Authentication Methodology

✓ Checking Radius Server Reachability from AccessPoint

✗ Checking Client Authentication Status

Client Association was successful But Dot1x Authentication failed . External Radius Server is configured . Please check the Logs in the External Radius Server.

`OK`

SLA Compliance & Enforcement

- Gain real-time insights and generate compliance reports
- Track Service Provider performance and measure uptime, latency, and SLA

Real Time Security Audits

Vulnerable Details: 12

#	CVE ID	Severity	Description
1	CVE-2024-46666	Medium	FG-IR-24-250 Unchecked boundary length causing multiple logic flaws
2	CVE-2024-46665	Low	FG-IR-24-326 Exposure of sensitive information in RADIUS Accounting-Request
3	CVE-2024-54021	Medium	FG-IR-24-282 File-Filter Bypass in Explicit Web Proxy Policy
4	CVE-2024-46669	Low	FG-IR-24-267 Integer Overflow in ipsec ike

- Instantly identify vulnerabilities with automated CVE reporting
- Maintain compliance with real-time security assessments
- Fortify the network against evolving threats

Centralized Remote Network Management

Single cloud platform to manage WAN, LAN, and Wi-Fi networks

Monitor, detect, and enforce network requirements with zero on-site intervention
Digital Experience Monitoring

Track Application health, network and ISP performance

Tracepath Analysis for detecting connectivity issues

Full Network Visibility

Real time view of the complete network topology

Instantly track devices, connections, and traffic flow

Simplified and faster troubleshooting

THE LINKEYE ADVANTAGE

SOC –2 Certified Security
- ⊘ Regulatory compliance and data security
- ⊘ Protect sensitive data with strict access control and encryption

Vendor Agnostic Integration
- ⊘ Unified network management with no vendor lock-in
- ⊘ Integrate with over 100+ OEMs using SNMP, API, and streaming telemetry

Data Driven Decisions

Make critical, data-backed decisions swiftly and confidently to stay ahead of the competition.

Guaranteed SLA Adherence

Ensure consistent SLA adherence with continuous monitoring of ISP performance.

Reduced Downtime & Network Cost

Prevent downtime and slash operational costs with automated troubleshooting and analysis.
