

Singularity™ Complete

AI-Powered Endpoint and Cloud Security

Challenged with increasingly complex security architectures and data sources, limited resources, and more sophisticated attacks, security teams are struggling to stay ahead of the barrage of AI-powered attacks. Modern defenses require machine-speed protection, detection, and response to effectively safeguard the expanding attack surface.

Singularity Complete provides market-leading, AI-powered endpoint and cloud workload protection capabilities all in a centralized platform. Gain visibility across your endpoint and cloud infrastructure by using a unified agent architecture to correlate endpoint and cloud alerts, detect and stop attacks in real-time, and take immediate action. Embedded with **Purple AI**, Singularity Complete empowers security analysts to operate with efficiency and precision by augmenting threat investigation and response with the power of generative and agentic AI.

Singularity Complete's capabilities are rooted in a lightweight agent that operates out of kernel space. This approach offers security teams a faster, stabler, and more resource-efficient approach to protecting endpoint and cloud surfaces.

Protect User Endpoints

Protect endpoints from malware, ransomware and other threats with autonomous, machine speed prevention powered by on-device AI.

Secure Cloud Workloads

Deploy AI-powered runtime threat detection and protection built on the eBPF framework for servers, VMs, containers, and serverless containers.

Detect, Hunt & Investigate with AI

Detect novel threats and zero-days with behavioral AI and expedite threat hunting and investigation with Purple AI natural-language hunting and event summaries.

Rapidly Respond & Remediate

Automate with policy or use remediation actions including patented 1-click rollback.

Scale and Manage with Ease

Optimize operations by automating deployment of resource-efficient user space agents. Get 24/7 support with an always-on interactive AI support agent.

Key Benefits

Unified Visibility

A unified agent architecture provides correlated endpoint and cloud telemetry mapped within a central console and further enriched by first- and third-party data sources.

Machine-Speed Detection and Protection

Autonomously detect malicious behaviors and protect endpoints and cloud workloads in real-time against malware, ransomware, container drift, and more.

1-Click Rollback

Automate incident response by remediating all affected endpoints and workloads with automated or one-click remediation and rollback.

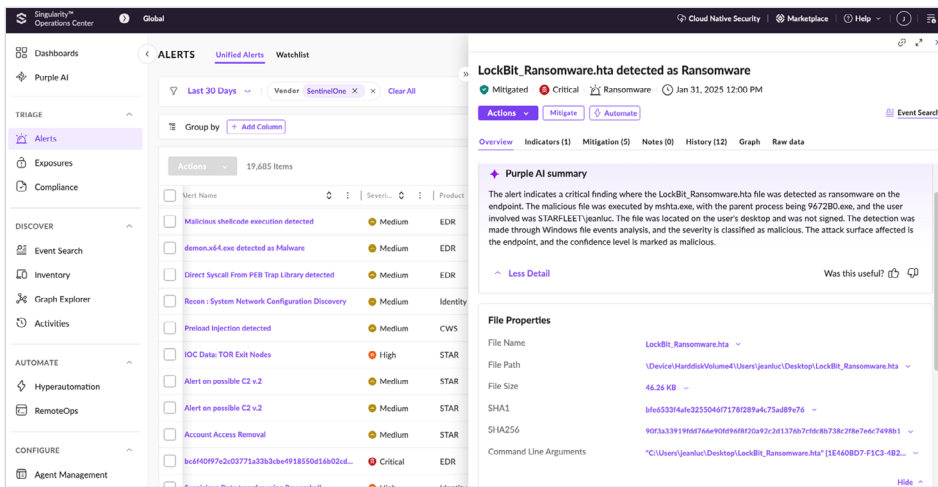

Maximize Analyst Efficiency

Accelerate threat hunting and investigation with Purple AI's natural language querying and automated event summaries.

Save Time and Reduce TCO

Optimize your security budget and resources by consolidating vendors, simplifying deployment, and aggregating data ingestion through a unified endpoint and cloud protection platform.

Endpoint Prevention, Detection, Response, and Remediation (EPP, EDR)

[Singularity Endpoint](#)

Best-in-class prevention, detection, response, and remediation capabilities to simplify endpoint security.

Cloud Workload Protection (CWPP)

[Singularity Cloud](#)

Cloud workload protection (CWPP) for servers, cloud VMs, and containers across public, private, and hybrid clouds.

AI Security Analyst

[Purple AI](#)

Accelerate threat hunting and investigations to stay ahead of attacks with the generative and agentic AI capabilities included in Purple AI Foundations.

Detection and Protection that Scales With Your Expanding Attack Surface

Singularity Complete is your AI-powered security solution for endpoint and cloud workloads. It is designed for customers seeking enterprise-wide protection, detection and response capabilities, and augmented by the intelligence and speed of Purple AI. Singularity Complete provides game-changing advantages in analyst efficiency and comprehensive endpoint and cloud workload protection. With Singularity Complete, security organizations can scale detection, protection, and response across their expanding attack surface.

Solution Highlights

- + 100% detection coverage across MITRE ATT&CK framework
- + Unified agent for streamlined endpoint and cloud workload management
- + Behavioral AI models detect malicious and suspicious patterns on workstations, servers, and workloads
- + Correlate endpoint and cloud telemetry data to form visual Storylines of events for rapid threat hunting
- + Remediate threats with automated or 1-click response and rollback actions
- + Purple AI provides analysts with critical context through natural language threat hunting and AI-powered event summaries
- + Best-in-industry coverage for Windows, macOS, Linux OS, and cloud workloads within AWS, GCP, Azure, or private clouds

Innovative. Trusted. Recognized.

A Leader in the 2025 Magic Quadrant for Endpoint Protection Platforms

Industry-leading ATT&CK Evaluation
+ 100% Detections. 88% Less Noise
+ 100% Real-time with Zero Delays
+ Outstanding Analytic Coverage, 5 Years in a Row

96% of Gartner Peer Insights™ EDR Reviewers Recommend SentinelOne Singularity

About SentinelOne

SentinelOne is the world's most advanced cybersecurity platform. The SentinelOne Singularity™ Platform detects, prevents, and responds to cyber-attacks at machine speed, empowering organizations to secure endpoints, cloud workloads, containers, identities, and mobile and network-connected devices with intelligence, speed, accuracy, and simplicity. Over 11,500 customers—including Fortune 10, Fortune 500, and Global 2000 companies, as well as prominent governments—all trust SentinelOne to Secure Tomorrow.
