Commercial

High-rises

We have the best ranked product and support

Supporting ESG

At Parcel Tracker, we have taken it upon ourselves to carbon offset the last leg of each parcel's journey that is scanned through Parcel Tracker. To date, we've carbon neutralized over 1 million deliveries and planted 10,000 trees in partnership with the Eden Reforestation Project.

We understand the role we play in keeping our planet green and safe for future generations!

Learn More Here

Our Unique technology

Cutting edge OCR

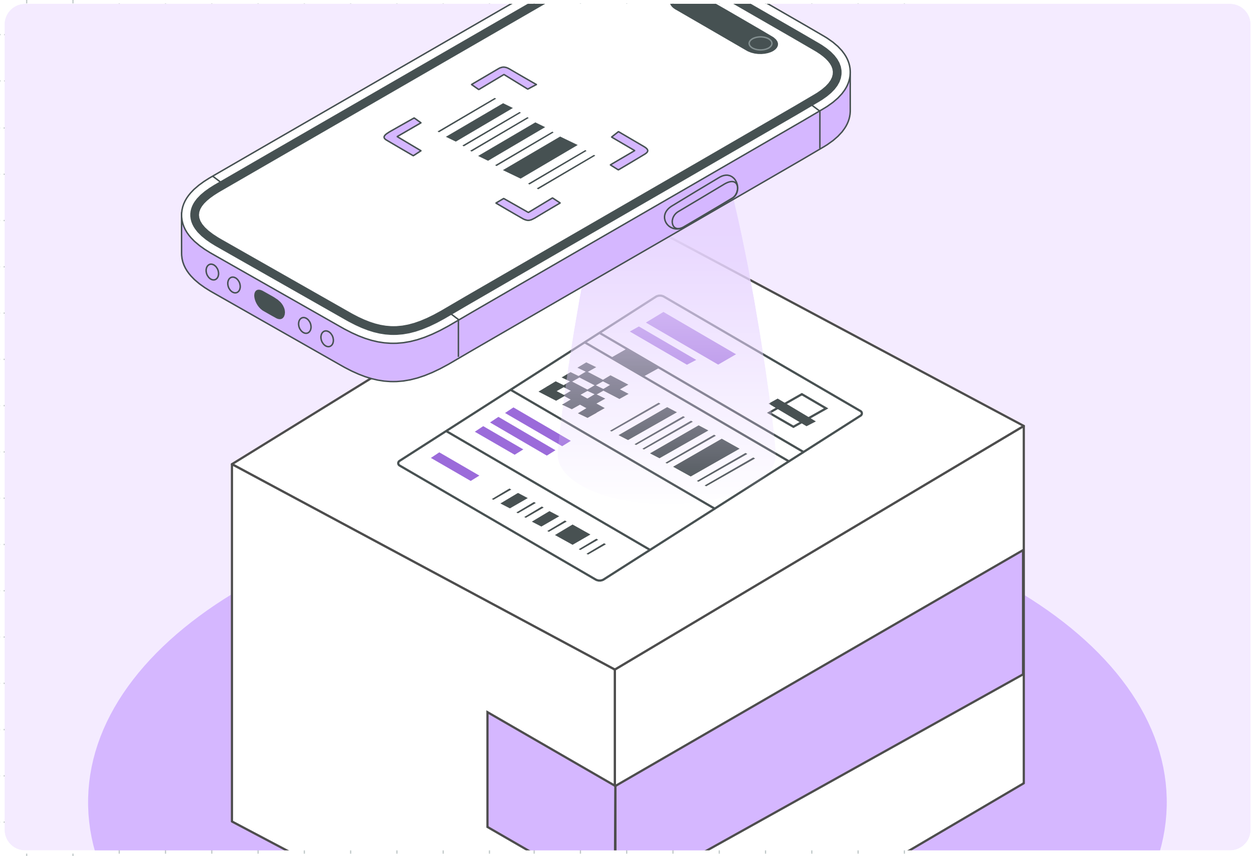
Parcel Tracker uses our leading Optical Character Recognition (OCR) technology to remove manual data entry.

Improve accuracy

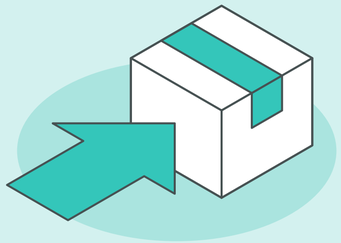
Computer vision and OCR drastically improve the consistency and quality of the data extracted

Extract rich data

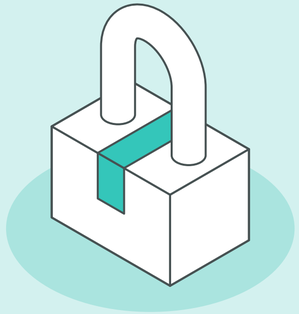
Extract recipient name, carrier details, barcodes, tracking numbers, photos and even more with a single scan.



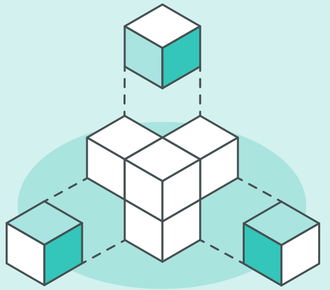
Some of our Capabilities



Log Inbound Deliveries

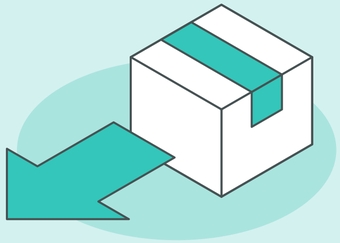


Secure Hand-off

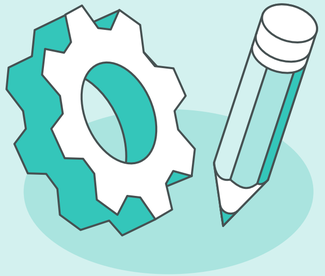


Extensive Integrations

Parcel Status and Tracking



Log Outbound Deliveries



Tailored Workflow Configuration
