

Sage Intacct Cloud Accounting Software for Healthcare Organizations

Powerful accounting and financial management for growing data-driven healthcare organizations

Healthcare organizations face a myriad of unique challenges, including declining reimbursements, diversifying sources of revenue, cost containment, regulatory changes, M&A activity, security concerns and the need for detailed measurement and reporting on critical KPIs to key stakeholders, to name a few. Relying on a cloud-based, HIPAA-compliant accounting system can allow you to better understand your healthcare organization and position it for future success.

At Sage Intacct, we're passionate about building accounting software that helps you better understand your business, maintain HIPAA compliance, and succeed in the ever-evolving healthcare marketplace.

Built for healthcare

As healthcare grows in complexity, so does your organization. You're managing multiple locations, service lines, or practices, navigating changing reimbursements, and initiating cost reduction initiatives, while labor shortages and manual processes are draining your productivity. You need to be able to analyze financial, operational and clinical data to gain the clearest picture of the true cost of delivering patient care at your organization, and we've built our healthcare accounting software with this in mind, delivering HIPAA-compliance and

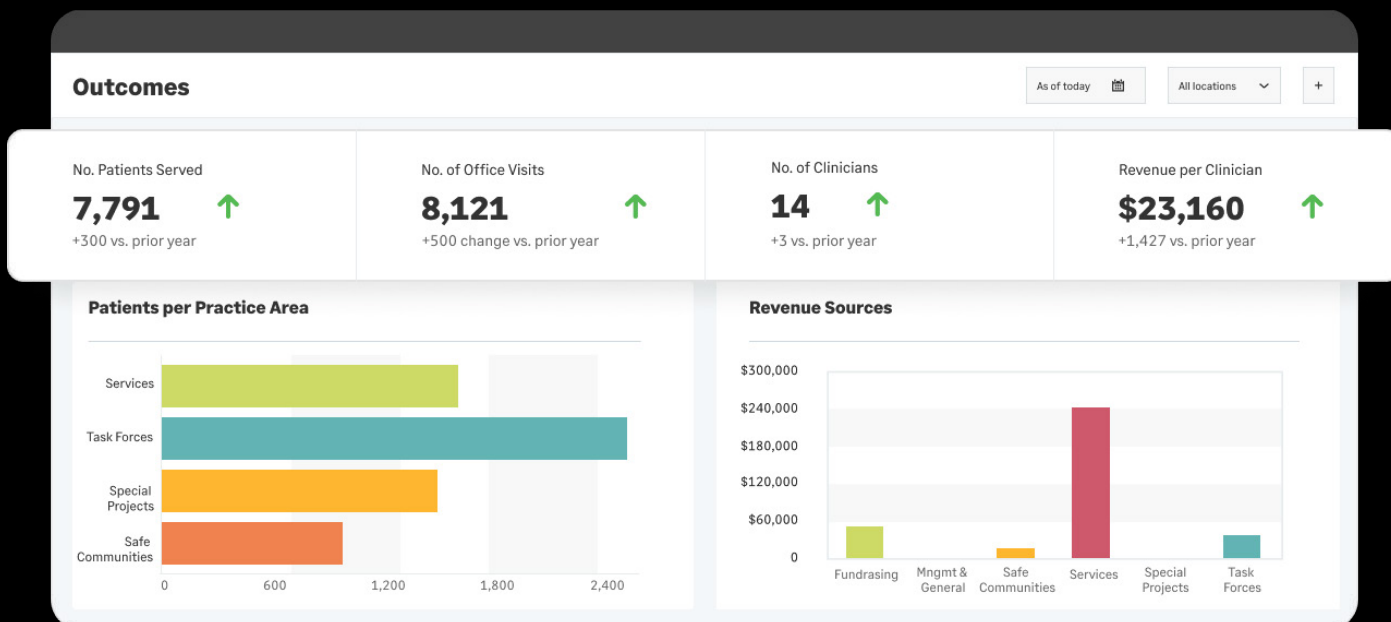

“With Sage Intacct, we’ve saved one million dollars from having better spend visibility and can now track so many business trends that were simply impossible to track before.”

Sean Mintz, CFO, Banyan Treatment Center

integration tools designed for connecting your Electronic Medical Record (EMR) or practice management system with Sage Intacct.

As a result, Sage Intacct's healthcare customers have increased profitability by 30% with better insight for informed decisions, supported double-digit business growth without adding finance team headcount, realized more than 25% improvement in efficiency gains, and taken departmental reporting from days to minutes.

Sage Intacct provides visibility into the critical clinical, financial and operational metrics that matter most to your healthcare organization. This information is displayed on interactive dashboards using customizable performance cards, charts and tables, making them easy to consume by your organization's key stakeholders to aid in decision-making.

Real-time visibility and insights

The Sage Intacct's real-time reporting capabilities allow you to understand and measure performance for both financial and operational outcomes – even in the context of clinical metrics that are important to your organization. Because every transaction in the system can be tagged with dimensions, healthcare finance professionals can sort, view, filter and report on the specific information they need. With the ability to have deeper, more targeted insights available in real-time, our healthcare customers consistently report much faster decision-making in response to business and market conditions, have reduced board budget reporting from 3 weeks to 1 hour and have improved revenue per physician by up to 6.5%.

True cloud technology with open API

As an innovator in the cloud space, the Sage Intacct multi-tenant, true cloud foundation brings robust technology infrastructure to your organization, without the high costs of managing servers.

Our open API lets you connect to existing systems or those you are considering in the future. This means you can leverage key data from electronic medical records, payroll, budget, CRMs (including Salesforce), and other systems to track key performance indicators.

“With the advanced reporting features from Sage Intacct, we send beautiful and reliable month-end close reports to each physician, and we start every monthly governance board meeting by reviewing the board-specific dashboard.”

Christopher Hopeck, Practice Administrator & CFO, Millennium Physicians Group

“My staff are able to do their daily bookkeeping, reconcile bank statements, upload payroll entries directly from ADP and revenues from our clinical system, and print checks to pay vendors—all of which is effortless in the platform. Meanwhile, I just approve things online and can close the month in four days. In all, Sage Intacct's easy-to-use workflows have made us about 45% more efficient.”

Kent Spear, CFO, Pavillion Treatment Center
