dead? no  
evolving? yes

Outbound is changing

1 to 1 --> many to many

button pushers --> strategic thinkers

segmentation of the sales role --> flexibility across segmented roles

These are just a few examples of how we're seeing the world of sales evolve.

The main driver? The shift in how buyers want to be treated and buy.

Is this the death of the SDR? Sequence? Predictable revenue?

is it the death of anything?

... no 🤨
