gPanel® by promevo™

# All-In-One Google Workspace Management

gPanel is a robust Google Workspace management and reporting solution developed by Promevo, providing organizations and their IT administrators with all the tools they need to effectively manage users in their domain while safeguarding their data.

gPanel Features

Not only does gPanel give you the ability to oversee files, email communications, and other internal processes within your company, but it also **empowers you to take precise administrative action.**

With gPanel, you can:

- Streamline user management with easy control of Docs, Groups, Gmail, and more

- Modify Gmail signatures for anyone in your organization

- Sync contacts between different users

- View and manage the devices users have access to

- Create custom policies to automate onboarding, offboarding, and decommissioning

- Search text in any Drive document owned by any user in the domain

- Generate comprehensive reports for documents, emails, groups, and more

- Customize user and admin roles and specify the actions they can take
