Top Companies Who Trust ProShip

Tailor ProShip to **Your** Unique Needs

To truly optimize your shipping operations, you need a solution that adapts to your specific needs. ProShip offers the flexibility to customize your shipping processes, from deployment to execution, resulting in streamlined operations, reduced costs, and higher customer satisfaction.

ON-PREMISE OR PRIVATE-HOSTED CLOUD

Deploy ProShip where it works best for you, whether it's on your own servers or in a secure cloud environment. This flexibility allows you to **choose the deployment model that aligns with your IT strategy** and security requirements.

GUI OR API

Choose how you interact with ProShip. **Use our intuitive user interface** to empower your operators to hand-apply labels, integrate with automation like Print and Apply conveyors, or reprint shipping labels on pick slips. Alternatively, leverage our robust API to integrate seamlessly with your existing systems and extend shipment recommendations into your OMS and eCommerce suites.

CARRIER NETWORK & CONNECTIVITY

Access a wide range of domestic and international parcel and LTL carriers, via on-platform engines, API's, or a combination of both (hybrid), to optimize your shipping costs and delivery times. **Our extensive carrier network**, containing national, international, same-day, and next-day options, and carrier-agnostic approach allow you to choose the best carrier for each shipment, based on factors such as cost, transit time, and service level. We don't resell rates, ensuring you always get the best possible recommendations and pricing.

INTEGRATION FLEXIBILITY

Integrate ProShip with your existing WMS, OMS, ERP, and other systems to streamline your operations and reduce manual effort. Our flexible integration options allow you to **connect ProShip to your enterprise software stack**, eliminating the need for manual data entry and reducing the risk of errors.

CUSTOMIZABLE BUSINESS RULES

Create and manage complex business rules to automate tasks, enforce compliance, and improve overall efficiency. Our powerful business rules engine allows you to **tailor your shipping processes to your specific needs**, ensuring accuracy and consistency.

VERSIONLESS ARCHITECTURE

Adapt to changing business needs with ease. ProShip's flexible versionless architecture allows you to **scale your operations up or down as needed** while avoiding downtime with automatic updates. Whether you're experiencing seasonal fluctuations or rapid growth, ProShip can handle it all.

TAILORED WORKFLOWS

Bolster workflow efficiencies by taking full advantage of shipment execution speed. With ProShip, **you aren't boxed into standard workflows**. For example, API-only solutions only allow you to print labels in batches upstream, which does not allow for real-time rate shopping. This requires the shipper to have accurate system weights and DIMs upstream versus using actual weights and DIMs at packing downstream, for real time rate execution.

ADVANCED RATE SHOPPING

Leverage ProShip's advanced rate shopping capabilities. Our powerful rate shopping compares rates from multiple carriers, factoring in additional details to **guarantee on-time delivery at the best possible price**. Not only does this advanced functionality include filters for basic rate shopping and time-in-transit rate shopping, it also considers 6 other data sets, to ensure it meets the delivery promise to the customer, accounting for non-transit days per carrier service level, label creation time, trailer pull times, and more.

SCALABLE INFRASTRUCTURE

Choose the scale that fits your business. ProShip's scalable infrastructure **ensures that your shipping operations can grow with your business** regardless of volume or complexity.

ADVANCED TRACKING AND NOTIFICATIONS

Deliver faster and more accurate shipments to **improve customer satisfaction and loyalty**. With ProShip, you can provide your customers with real-time shipment tracking, proactive notifications, and accurate delivery estimates, leading to increased customer satisfaction and loyalty.

SUPERCHARGE YOUR SHIPPING STRATEGY WITH PROSHIP

Ready to take control of your shipping operations? ProShip offers the flexibility, scalability, and customization you need to succeed.
