LOOKING FORWARD IS EASIER WHEN ADP HAS YOUR BACK

Get peace of mind with 24/7 support from certified payroll experts

Did you know 900,000 small business owners like you trust RUN Powered by ADP® (RUN) to support them while they focus on their business? With 24/7 support from payroll, compliance, HR and tax experts, ADP understands the unique challenges of small businesses, and we are ready to partner with you!

"There are so many reasons why I like ADP. **The 24/7 payroll support from ADP experts is perfect.** They go out of their way to provide information even if I didn't specifically ask for it but they know I need it."

Tricia LeAnn Franklin
Office Manager
Winnebago Motor Homes & Trailer Sales, Inc.

"The RUN Powered by ADP platform is very intuitive and easy to use. I can do almost everything myself, but **ADP's excellent customer service helped with prompt response** when I've had an issue requiring assistance."

Mark Picillo
General Manager
United Check Cashing

"One of the best things about ADP is their service. Whether it's walking me through how to process a special type of payroll, making corrections or accessing reports, **ADP's service team is excellent at helping me resolve my problems.**"

Sushant Garg
CFO
T3RA Logistics

"I'm extremely busy and if I have questions, calling a customer service line is not an easy option with my schedule. **The chat feature in RUN Powered by ADP makes getting the answers I need easy** and allows me to work on other things simultaneously."

Erika Herman
Vice President
Cornerstone Chem-Dry & 1-800 Water Damage

"One of the main things that drew me to ADP was the fact that **I can always access a live representative when I need help on something,** and that's not something everyone still offers these days. When I bring on another employee, that adds another variable, and I might have questions. But I'm not worried about it because ADP doesn't run me around in circles with an AI chatbot."

Therise Edwards
Founder & CEO
Teshley Solutions, LLC

"Since RUN Powered by ADP is super user-friendly, I usually don't need help, but when I do, **I just put in a service request and a support person will reach out almost immediately to help me.**"

Tina Pope
Controller
Systems Design International, Inc.
