# Free advanced Apache Kafka tool for developers

A totally free instance of Lenses that allows you to access, explore, integrate and process data across two of your Kafka clusters.

Download Free

TRUSTED BY

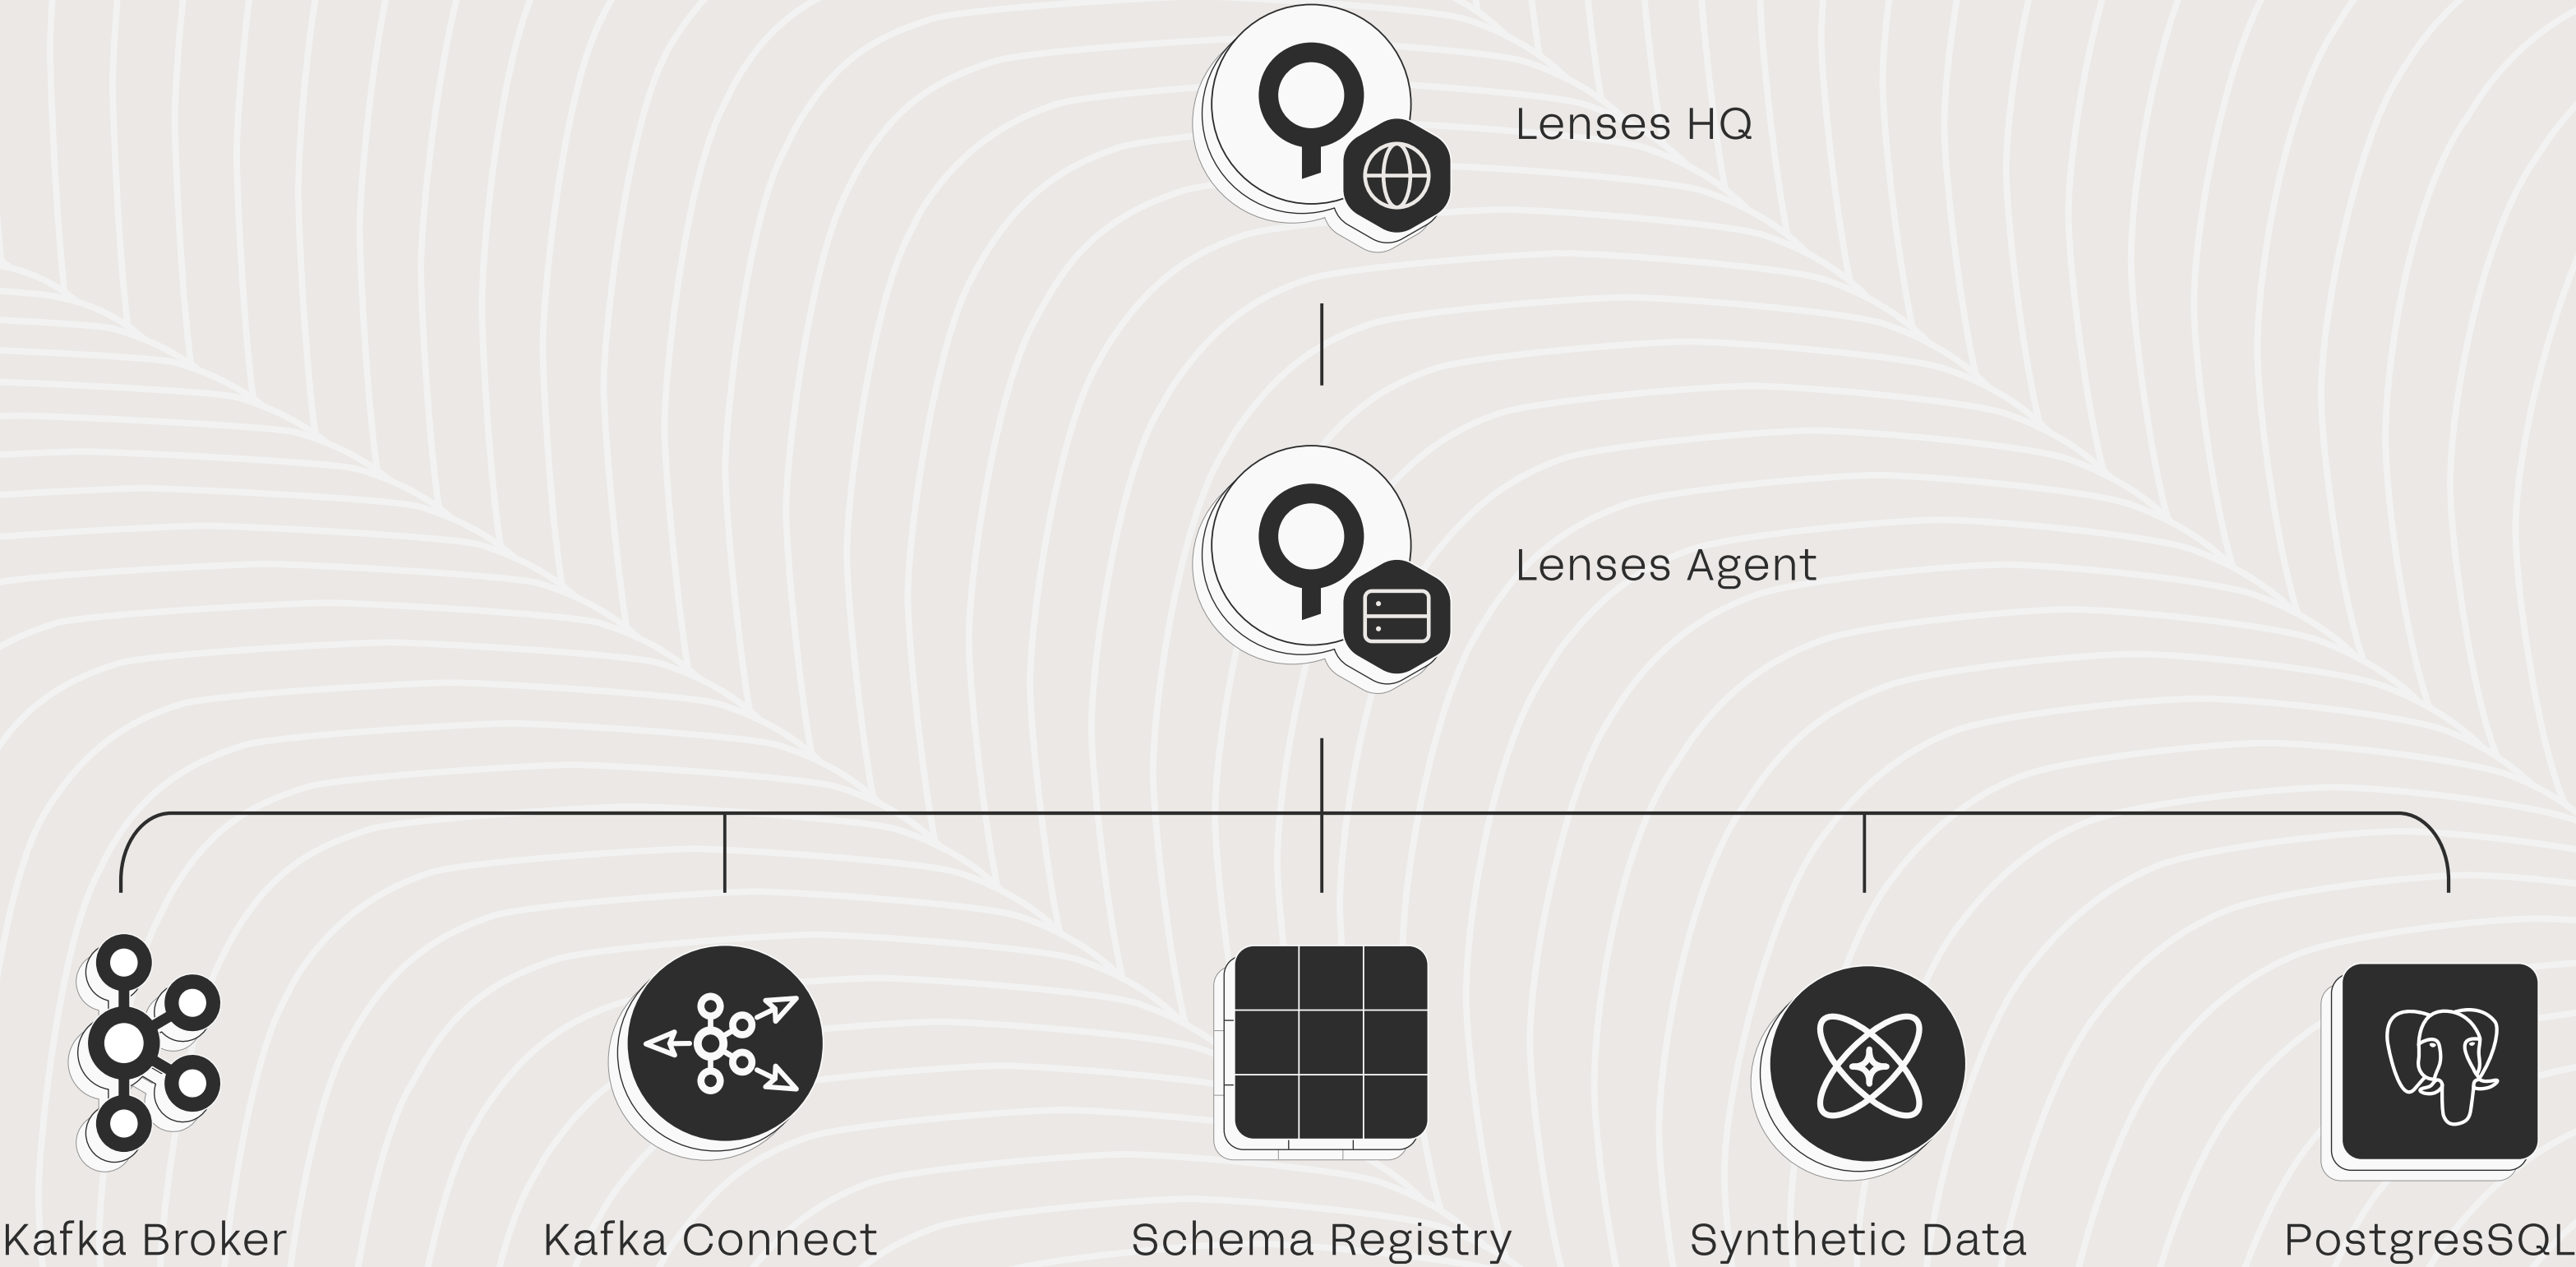

DAIMLER

**Europcar**

By default, Community Edition comes with a pre-installed single-broker Kafka cluster and some sample data, handy to learn Apache Kafka or use for localhost or dev application development. You can also connect it to your own Kafka cluster of any flavour, everything from Confluent Cloud, Redpanda and Azure Event Hubs to Strimzi.

Lenses Super Powers

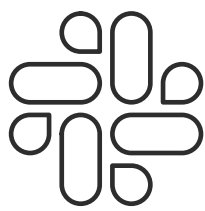

- Global IAM**  
The world's most powerful user permission model for Kafka
- Global Data Catalog**  
Intelligent discovery of real-time data across Kafka clusters
- Global SQL Studio**  
Explore & analyze data living in distributed Kafka topics with SQL
- SQL Stream Processing**  
Powerful transformation of data in a stream with SQL
- Kafka Connectors**  
Move & share data with 20+ Apache-2 Connectors
