RealCISO

Cybersecurity Compliance with a Platform not Spreadsheets

Assess, build, and manage cybersecurity compliance for your clients at scale. RealCISO is a cost-effective program management software and cyber platform built for consultants, MSPs, and MSSPs.

Real Impact. Real Simple.

RealCISO assessments are based on common compliance frameworks. **Save time. Cut costs. Embrace the simple way to assess cyber risk.**

Answer straightforward questions about the people, processes and technologies in an organization, and get actionable instruction on current vulnerabilities, along with recommendations on solutions that can resolve them.

Why Choose Us

Fast, Repeatable Assessments
Launch risk assessments in minutes across multiple clients—save time, drive consistency, and scale delivery.

Multi-Framework Support
Easily align clients to any framework—no switching tools or workarounds needed.

Client-Ready Reporting
Deliver clear, branded reports with prioritized remediation steps—help clients act, not just analyze.

Modules

RealCISO for MSPs

Deliver Scalable, Professional Cyber Risk Management Across All Clients

Why MSPs Choose RealCISO:

- Fast, Repeatable Assessments: Launch assessments in minutes across multiple clients.
- Multi-Framework Support: NIST, CIS, CMMC, HIPAA, ISO, and more—all in one platform.
- Client-Ready Reporting: Branded reports with actionable remediation plans.

Core Modules Overview

Assessment Module

- Quick deployment across multiple frameworks in under 10 minutes
- Tailored question sets based on client profile and maturity
- Automated scoring for instant insight into risk and compliance gaps
- Gap-to-goal mapping with aligned remediation recommendations

Reporting Module

- Generate branded, professional reports in seconds
- Executive summaries for business stakeholders and leadership
- Highlight critical risks with clear, prioritized remediation actions
- Track progress over time with comparative and historical views

Remediation & Risk Register Module

- Centralized risk register per client for consistent tracking
- Auto-generated, prioritized remediation tasks from assessments
- Assign tasks with deadlines and owners to ensure accountability
- Maintain audit-ready documentation for compliance and reviews

Dashboards

- Executive-ready dashboards summarizing key cybersecurity metrics
- Board-level reporting that connects risk to business impact
- Insurance-specific views to support underwriting and renewal
- Real-time visibility into posture, progress, and open risks
