

How Business and Enterprise Teams Can Customize Fonts in HiHello

Bring Your Brand to Life

Your brand is more than a logo. From colors and layout to typography, every element plays a part in creating a unified professional identity. That’s why HiHello gives Business and Enterprise administrators the tools to ensure that every new digital business card reflects the brand, right down to the font.

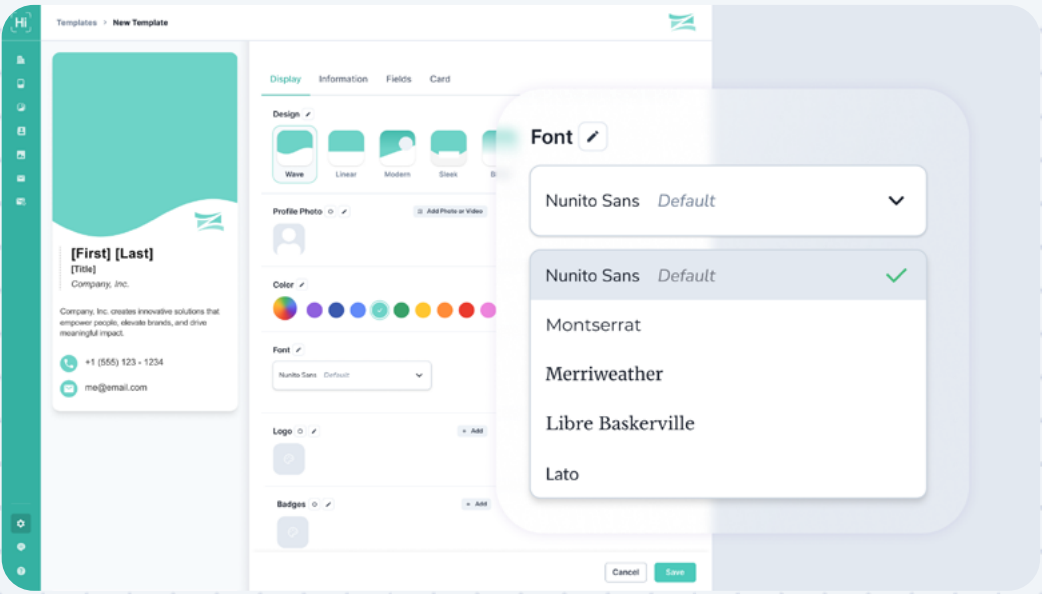

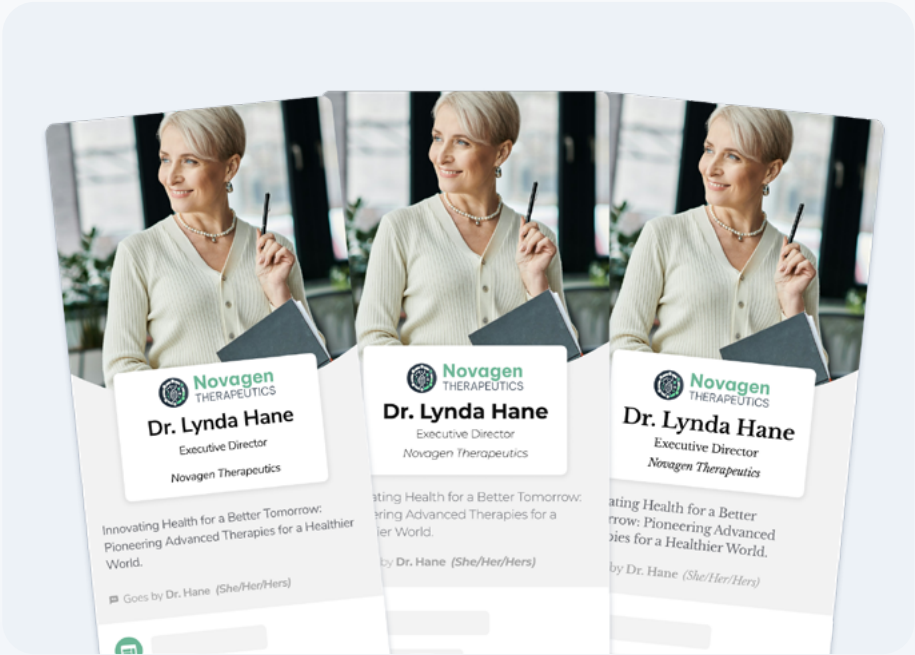

With Default Company Fonts and Custom Fonts, you can standardize typography across your entire organization—making sure every card is on-brand from the first share.

Set a Default Company Font for Brand Consistency

HiHello Business and Enterprise accounts include the ability to set a Default Company Font, allowing organizations to standardize branding from day one.

Admins can choose from HiHello’s curated font library, which includes:

- Lato
- Nunito Sans
- Merriweather
- Libre Baskerville
- Montserrat
- Any Custom Font uploaded (Enterprise only)

Tip: Set your Default Company Font early, so every new card starts off on-brand.

When a Default Company Font is selected, it becomes the pre-filled font for all new cards and templates created within your organization. This change won’t affect existing cards, giving admins control over when and where updates are applied.

How Business and Enterprise Teams Can Customize Fonts in HiHello

Adding Custom Fonts to Digital Business Cards

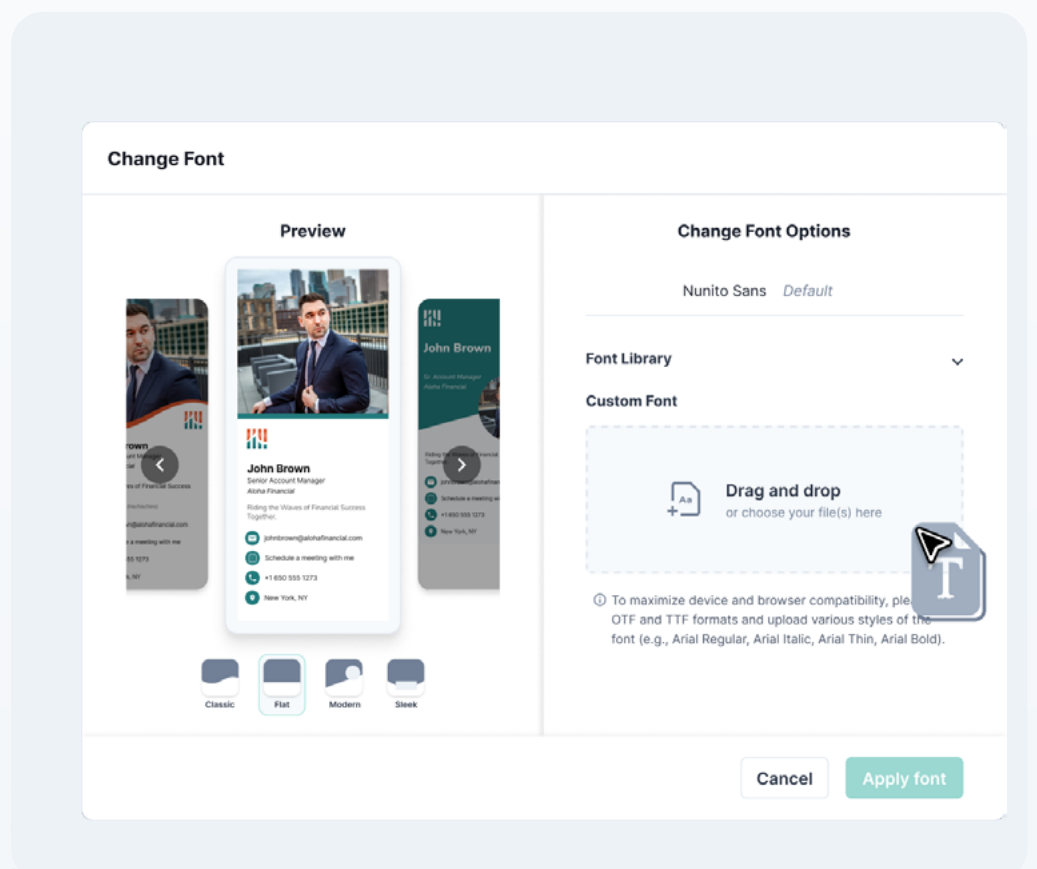

For HiHello Enterprise, admins can upload and set Custom Fonts across the organization.

Custom Fonts let you use licensed, brand-approved typography by uploading font files directly into your organization's font library. Once uploaded, Custom Fonts can be applied to:

- Individual cards
- Templates
- The Default Company Font setting

How to Upload a Custom Font

From an Enterprise admin account, go to branding settings, upload your font file, and save it to your brand settings. This ensures your proprietary typefaces and typography standards are maintained across departments.

Ready to Update Your Organization's Fonts?

From first impressions to lasting impact, typography plays a key role in professional presence. Whether you're choosing from HiHello's font suite or uploading a custom corporate typeface, HiHello makes it easy to align your digital business cards with your brand.
