

HiHello Enterprise Email Signature Manager

Transform every email your team sends into a professional, on-brand, measurable marketing or sales touchpoint

HiHello's Automated Email Signatures make it easy for companies to create, manage, and deploy beautiful, consistent email signatures at scale, without relying on employee copy/paste or manual updates.

Professional, Branded Signatures — Deployed Instantly

- Seamless integration with Google Workspace and Microsoft Outlook
- Automatic insertion into every team email—no user action required
- Easy, one-time setup for effortless company-wide rollout
- Push updates instantly to one user, a team, or your entire company
- Create unique signature templates for every team and department.

Enterprise-Grade Security, Included

HiHello Enterprise is designed to meet the highest standards for security, compliance, and scalability.

- SOC 2 Type II certified
- GDPR-ready
- Privacy-first by design
- Registered under the Data Privacy Framework
- Seamless IAM integration with Azure AD, Google Workspace, Okta, Workday, and more

HiHello Enterprise

Email Signature Manager

Powerful Design & Customization Options

HiHello's Email Signature Manager gives your brand, marketing, and IT teams full creative and administrative control:

- **Multiple Signature Designs**

Build a unique signature for each department and team that is compatible across all common email providers.

- **Fully Customizable Signatures**

Toggle signature fields and information on or off to match your brand guidelines and team needs.

- **Assign Signatures at Scale**

Select groups of users by team or department and instantly apply your signatures.

- **Dynamic Content Controls**

Manage legal disclaimers and important links, and add seasonal promotions or banners all in one place.

Frequently Asked Questions

How do I automate email signatures for my team?

Automated deployment of email signatures company-wide with HiHello's Email Signature Manager is simple. Integrate HiHello with Google Workspace or Microsoft Outlook to automatically add email signatures to every email your team sends.

Are email signatures secure for large teams?

HiHello is the most secure platform. HiHello is SOC 2 Type II compliant, GDPR ready, and uses enterprise-grade best practices to protect customer data. Learn about our security practices on our [security page](#).

Can my team customize their email signatures?

HiHello's email signatures are generated from the information on your team's digital business cards. You can choose what information your team can customize on both their digital business card and email signature by granting edit access.
