

# Ocilion: Turning the channel with a digital transformation journey to the cloud

Ocilion IPTV Technologies GmbH has carved a niche in the high tech industry by delivering innovative internet protocol television (IPTV) products and services. With a mission to enhance television entertainment alongside offering a growing fiber optic network, Ocilion is committed to meeting future challenges head-on.

As the company was growing significantly, it became imperative to switch from disparate, outdated ERP systems to a cohesive and advanced solution. To address this, Ocilion remapped its IT landscape to help ensure efficient operations, improved communication, and readiness for continued expansion.

## Accelerating innovation with SAP Cloud ERP

### Before: Challenges and opportunities

- Lack of cohesive business processes due to rapid company expansion
- Reliance on a self-programmed ERP system alongside another for bookkeeping, limiting efficiency
- Need for enhanced communication and data handling across departments to streamline operations

### Why SAP and Informatics Holding GmbH

- Comprehensive, scalable ERP functionality offered by an SAP Cloud ERP solution, promoting growth through best-practice standards
- Comprehensive technology platform offered by SAP, enabling innovation with cloud-based solutions
- Expert guidance and support from Informatics Holding GmbH, enabling adherence to implementation timelines and helping ensure a successful transformation

### After: Value-driven results

- Up to 15% increase in employee productivity
- Establishment of a unified ERP system, fostering improved collaboration and data accessibility across the company
- Enhanced real-time tracking of finance, sales, and procurement processes to expedite decision-making
- Simplified and efficient order processing with clearer insights into the supply chain
- Professional and improved customer interactions through enhanced invoicing and service delivery

“Switching to SAP Cloud ERP helped us overcome fragmented processes, enabling **improved collaboration, real-time insights, and streamlined operations**—ultimately enhancing efficiency and customer service.”

Andreas Göttfert, Head of Finance, Ocilion IPTV Technologies GmbH

**75%**

Reduction in revenue tracking time, cut from 2 hours to 30 minutes

**40%**

Faster procurement cycles, cut from 5 hours to 3 hours

## Improving connectivity and increasing efficiency with SAP software

As a leader in internet protocol TV (IPTV) technology, Ocilion IPTV Technologies GmbH is redefining operational efficiency and customer engagement by leveraging an SAP Cloud ERP solution with the support of Informatics Holding GmbH. The integration of a unified ERP system marks a pivotal transformation, promoting better internal communication, swift decision-making, and real-time insights into financial and operational metrics.

The transition allows for increased transparency and accuracy in reporting across departments, heightening both employee productivity and customer satisfaction. Moving forward, SAP's adaptable and forward-thinking cloud solutions will continue to power Ocilion's dynamic growth and innovation, cementing its role as a pioneer in digital television entertainment and infrastructure development.
