

# PROGRESS

RETAIL

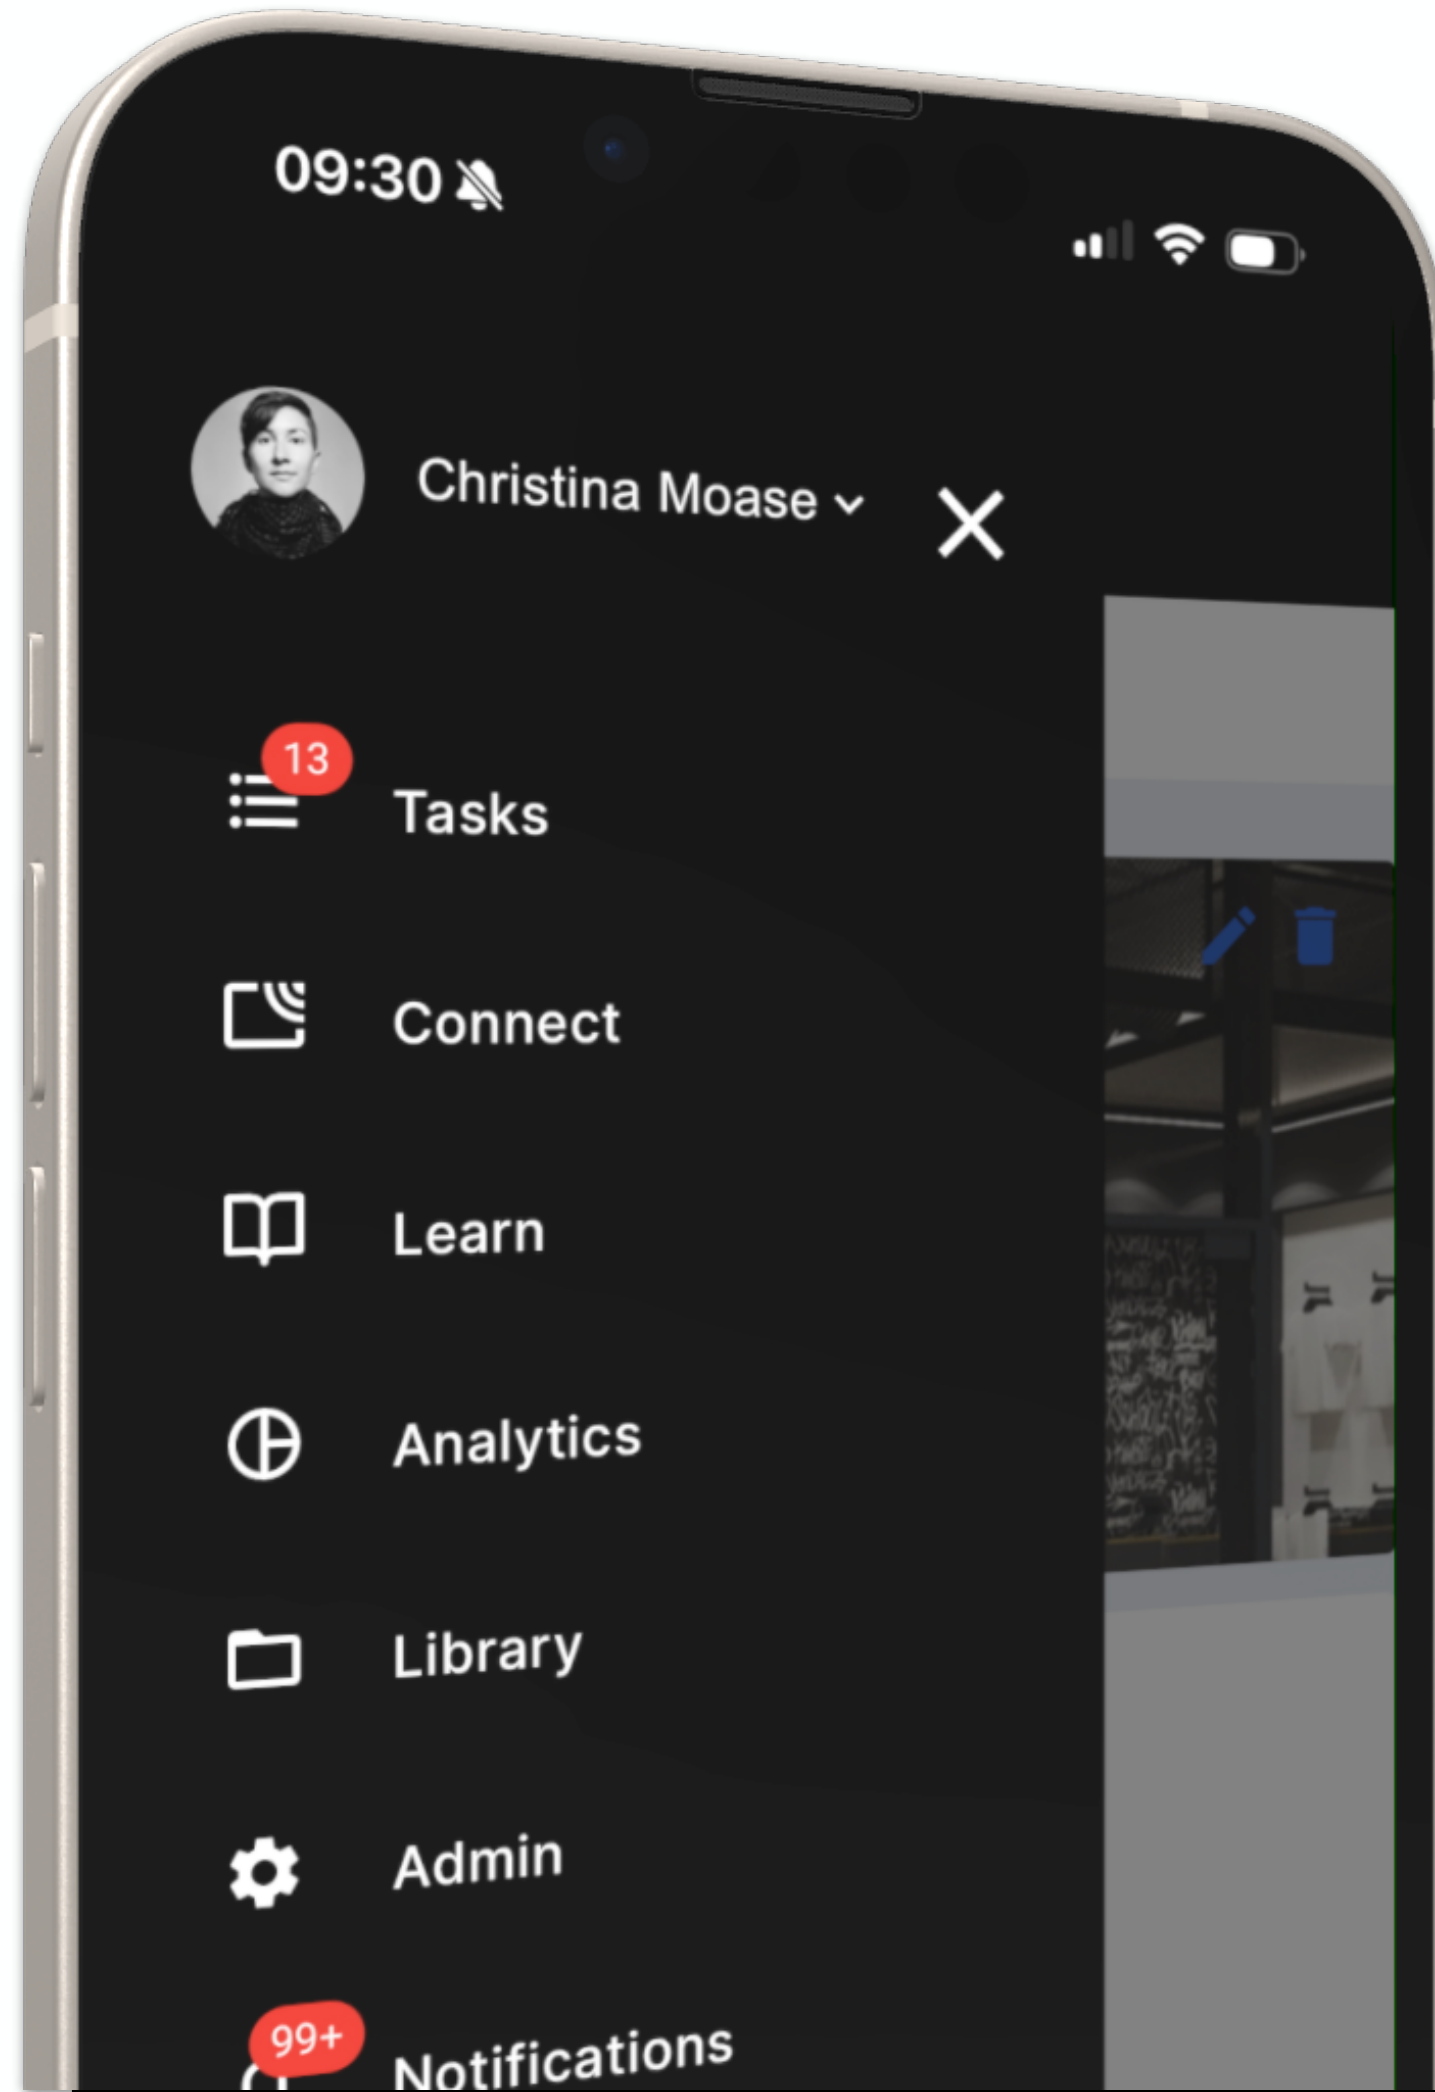

## THE RETAIL OPS SUPER APP

STORE TASKS • LEARNING • COMMS

**Unlock** your retail  
team's productivity  
potential.

Progress Retail combines the **core retail operations functions** of dynamic learning and analytics, retail task execution, and company communications in an all-in-one platform- **built for retailers by retailers.**

Bring your content to life, remove the ambiguity from store operations, and create scalable foundations for retail success.

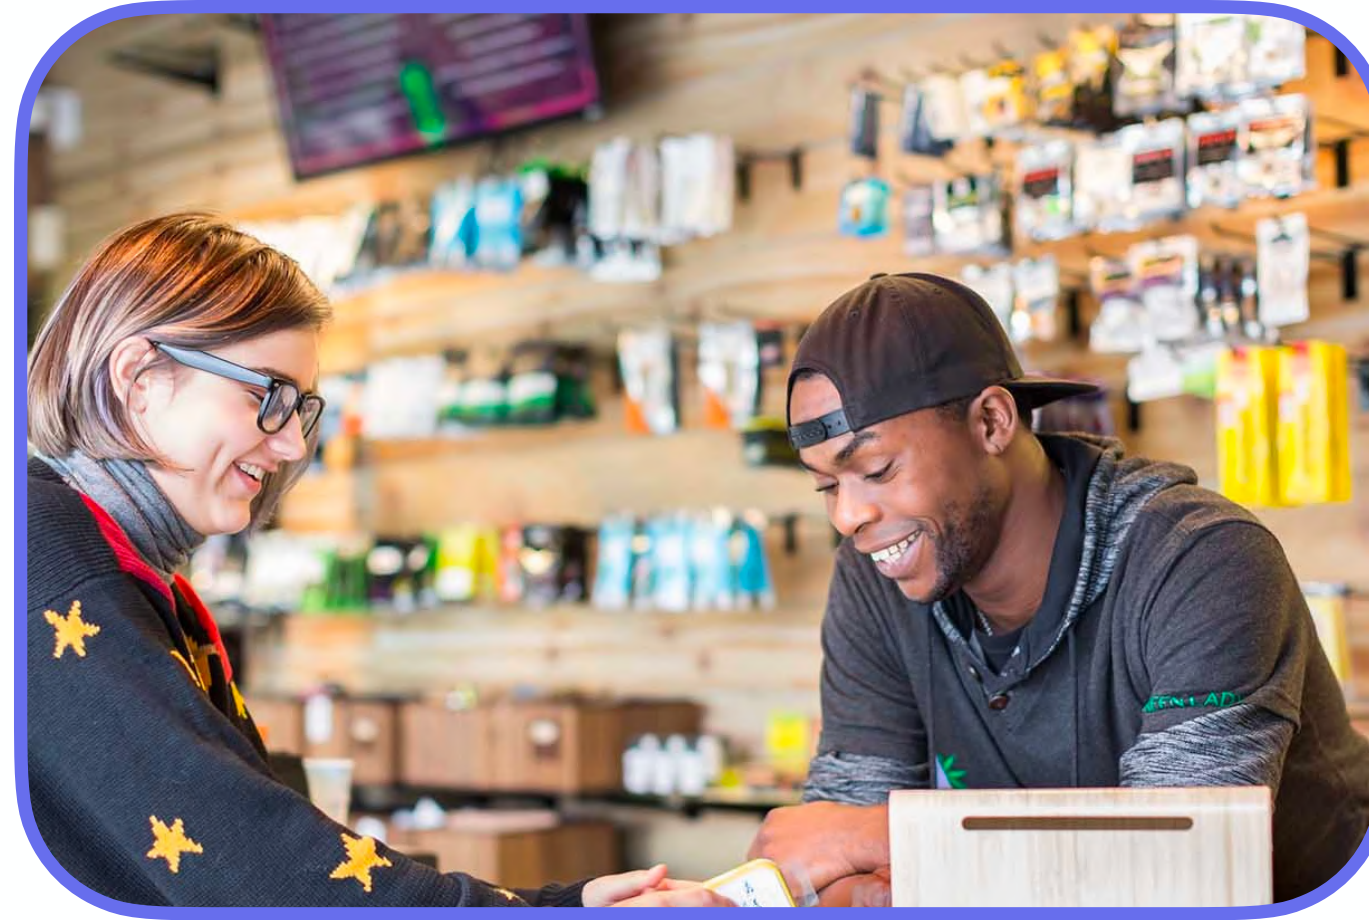

**Ineffective**, Manual,  
& Untrackable Training

*Creating dynamic content  
that gets results?*

**Gaps** in Sales  
& Service Experience

*Have you trained on  
behaviors?*

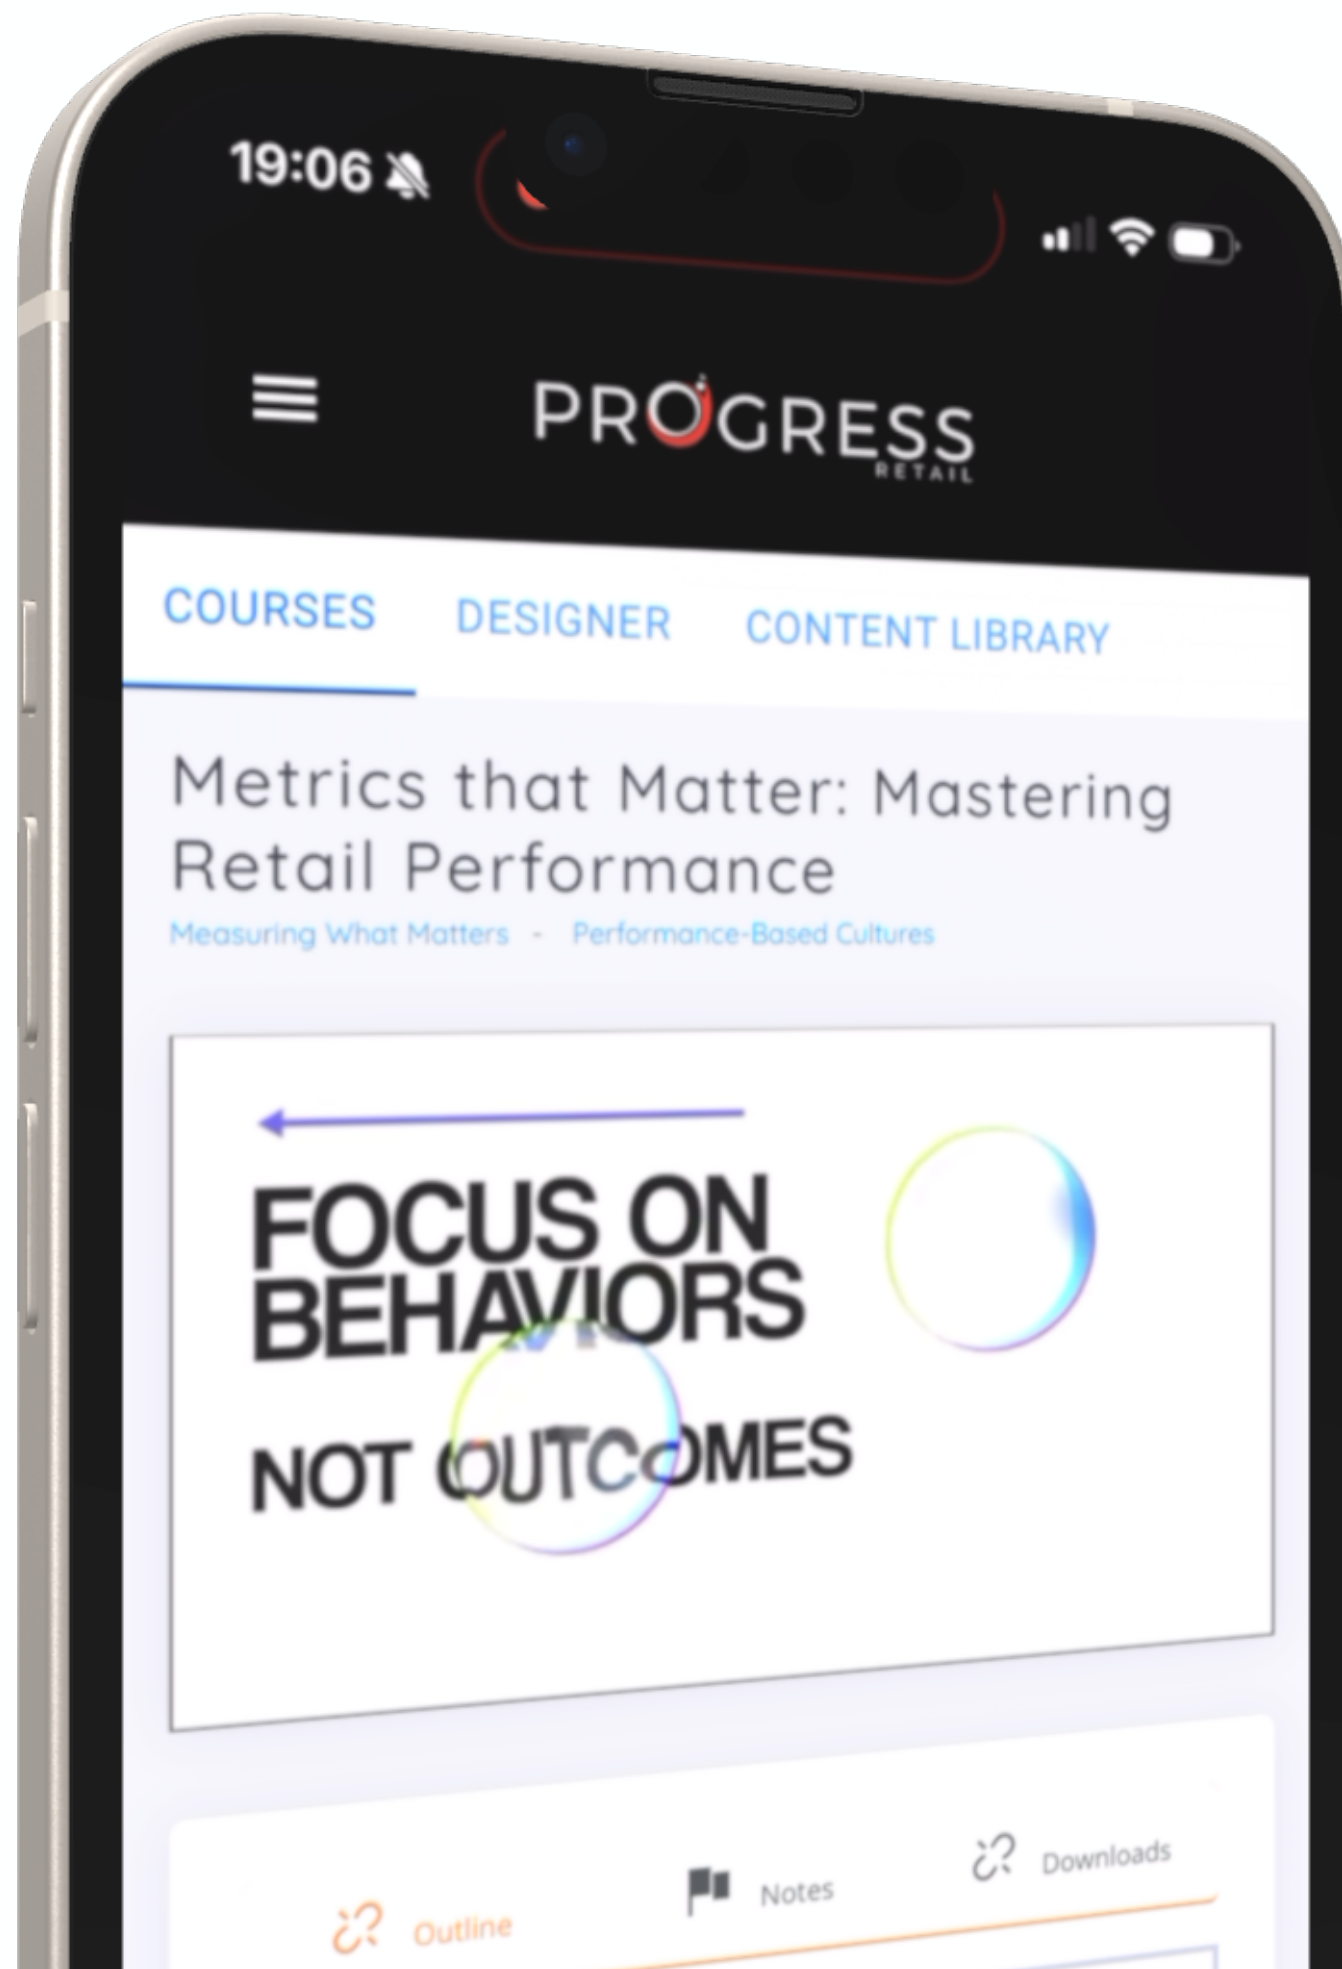

**Broken** Store Comms  
& Task Workflows

*Are you drowning in  
store email?*

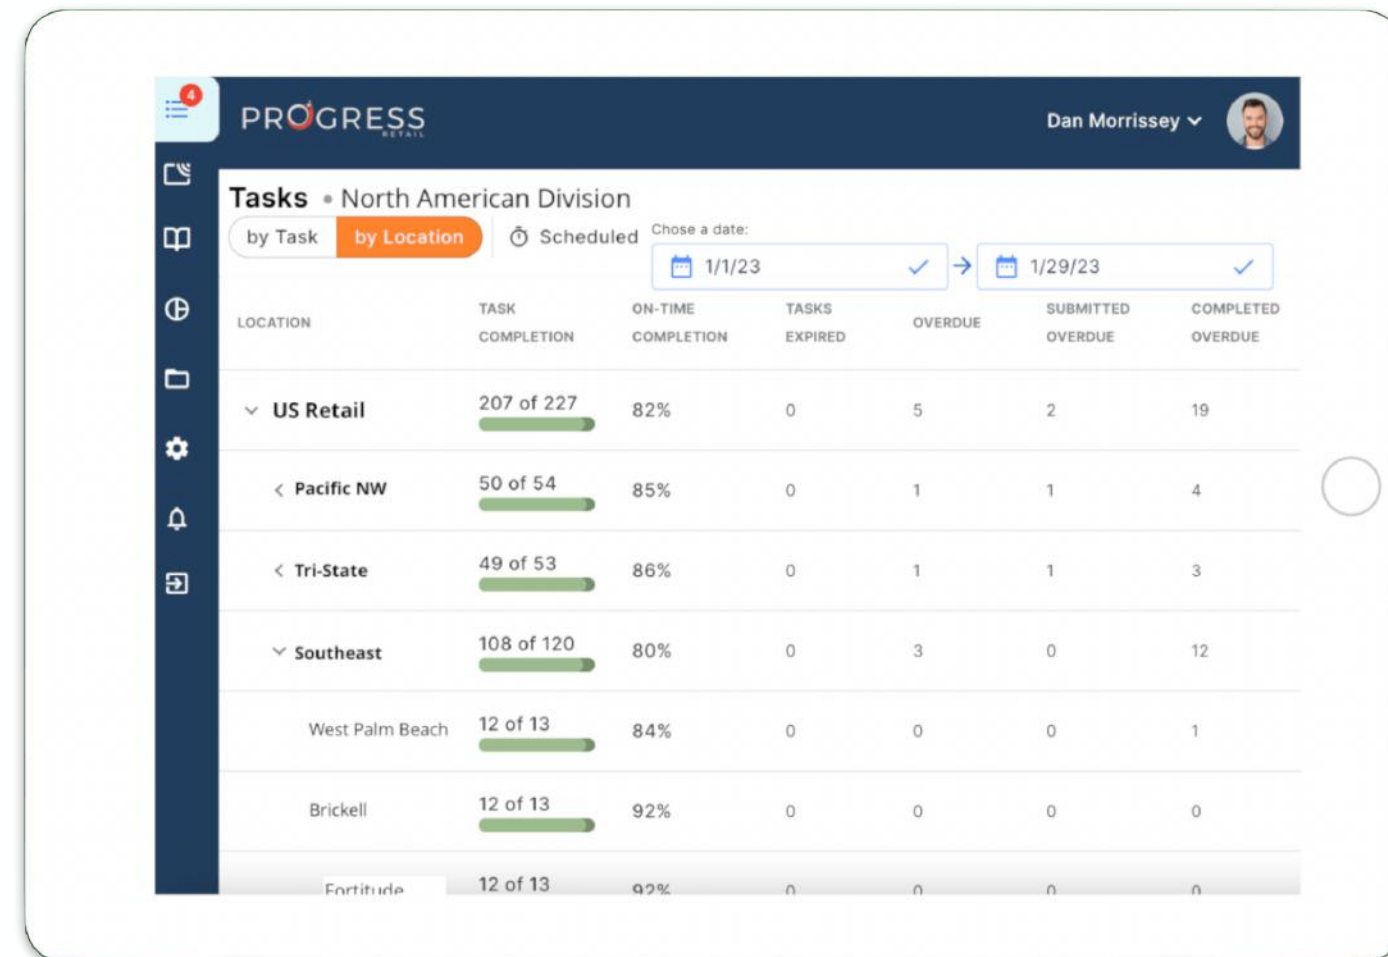

Engage your team with dynamic learning and measure comprehension with robust analytics designed exclusively for retail.

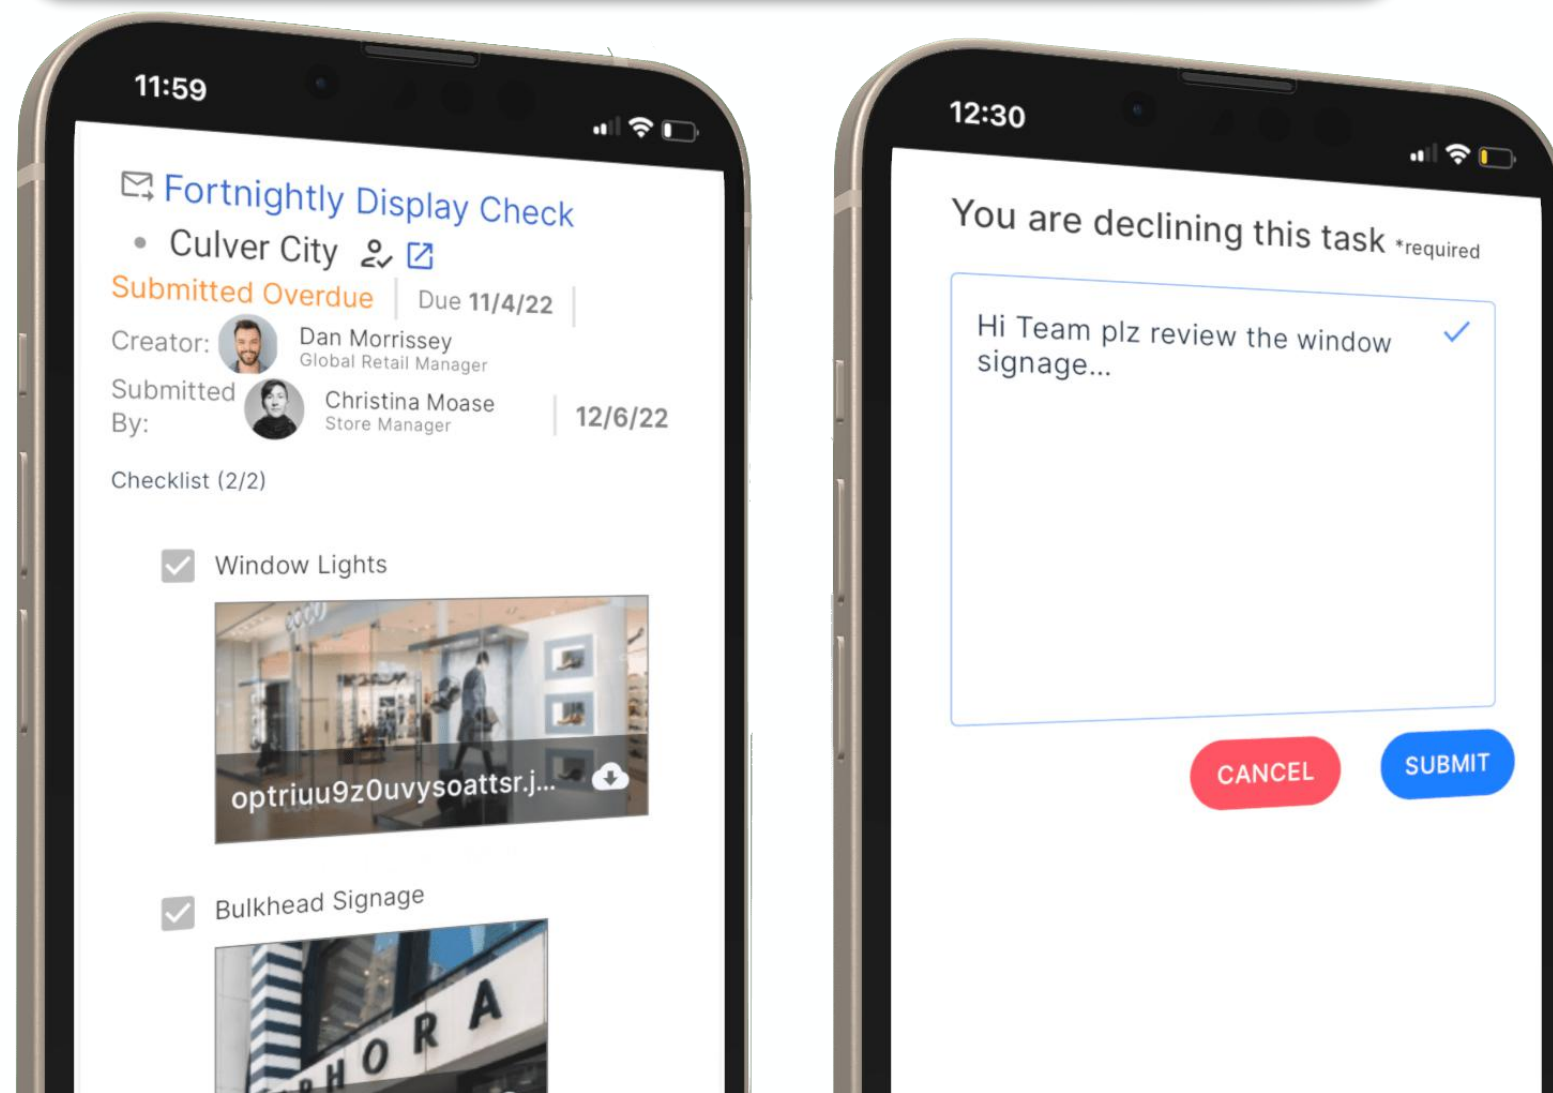

- **Easy** course design, content uploading, and quiz creation.
- **Effortless** course assignment by role.
- **Agile** course edits and updates- no need to “break” the course package, or create learning record discrepancies.
- **Learn anywhere and anytime**- platform and browser agnostic.
- **Leverage** a curated library of education from Progress Retail, or have support in building your own **for free** through our Partner Success Program.

Before you send another dreaded store email, ask yourself: *"Is this a task?"*

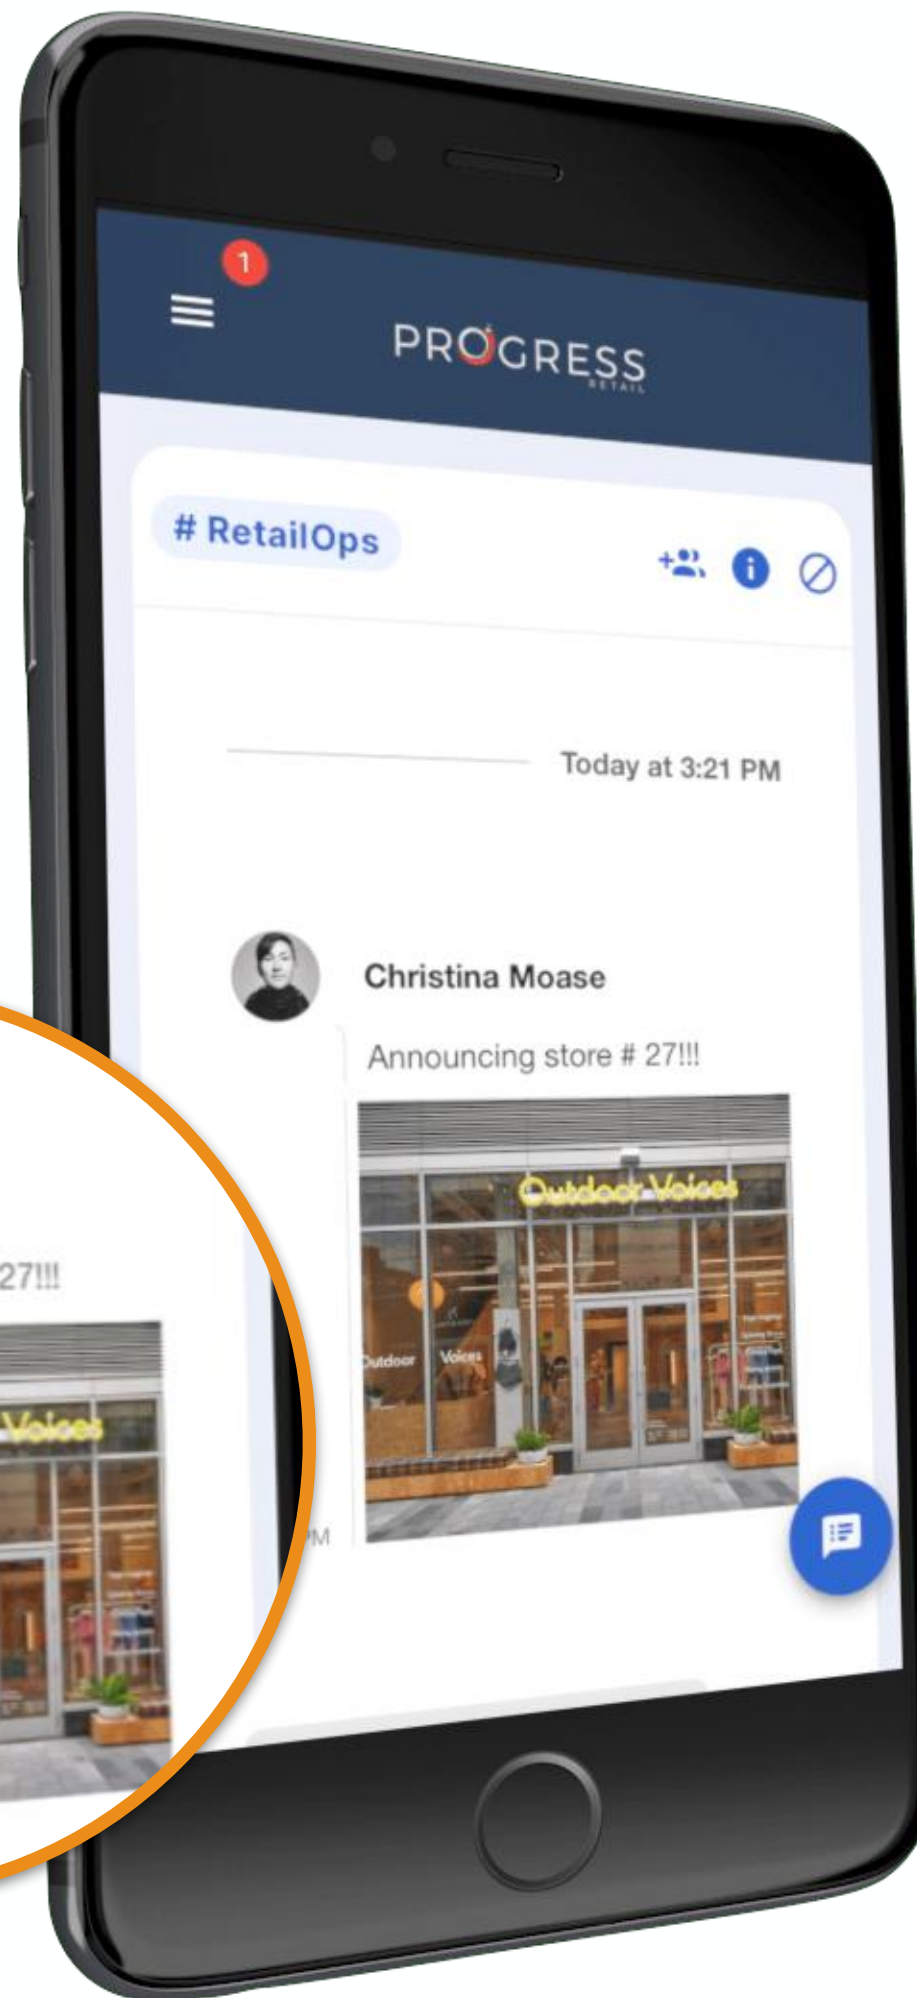

- Seamless task creation by store or store groups.
- Require photo/video uploads for task submission.
- Rapidly approve or decline tasks and provide feedback with automated workflows.
- Automate recurring tasks to save time and create a proactive culture.
- Benchmark stores with actionable insights and metrics relative to compliance and task completion statuses.
- Top-rated interface that store teams love to use because it makes their jobs easier!

## Increase engagement and commercial speed with two-way communication.

- **Effortlessly** create communication channels by role- ensuring the right team members have access to the right communication channels at the right time.
- **Customize** notifications by role and by type of communication behavior, and by communication channel: SMS, Email, & In-App.
- **Supports** any type of attachments and media.
- **Freeze** channels enabling read-only access for non-admin users to minimize extra-long threads and noise.

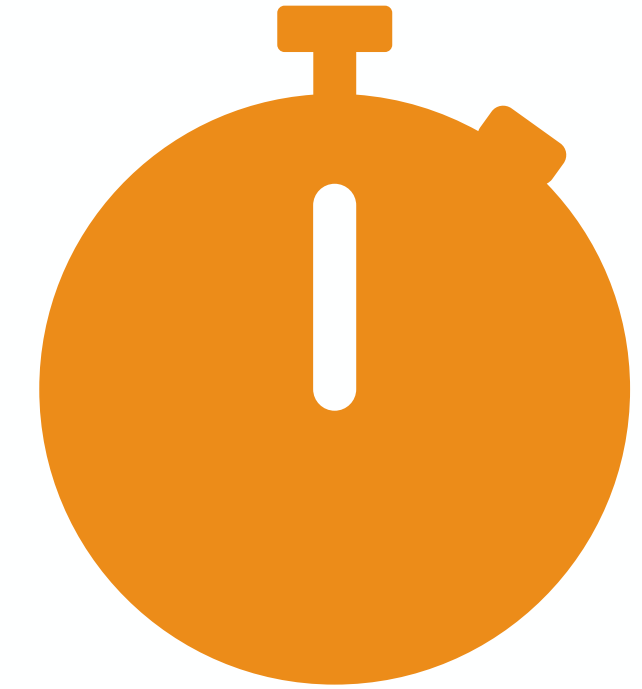

**DECREASE**  
Employee Turnover

30% - 69%  
Decreases

**INCREASE**  
Average Transaction Value

12% - 27%  
Increases

**SAVE**  
Hours at HQ & Retail

5 Hours Per  
Store

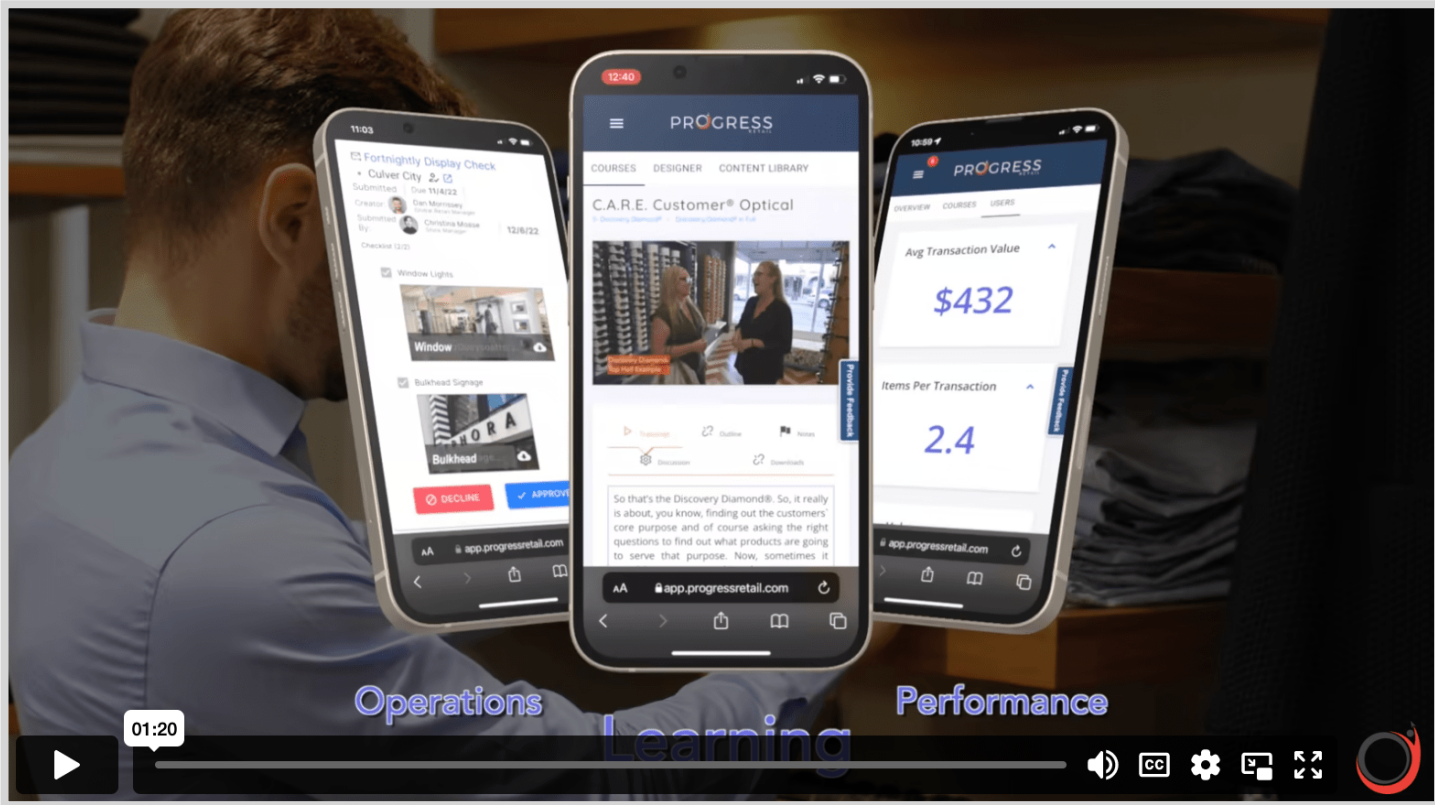

*“The product is well thought out and very intuitive. They do most of the heavy lifting of getting the process going, and importing all the stuff into the platform. Customer support is beyond normal levels.”*

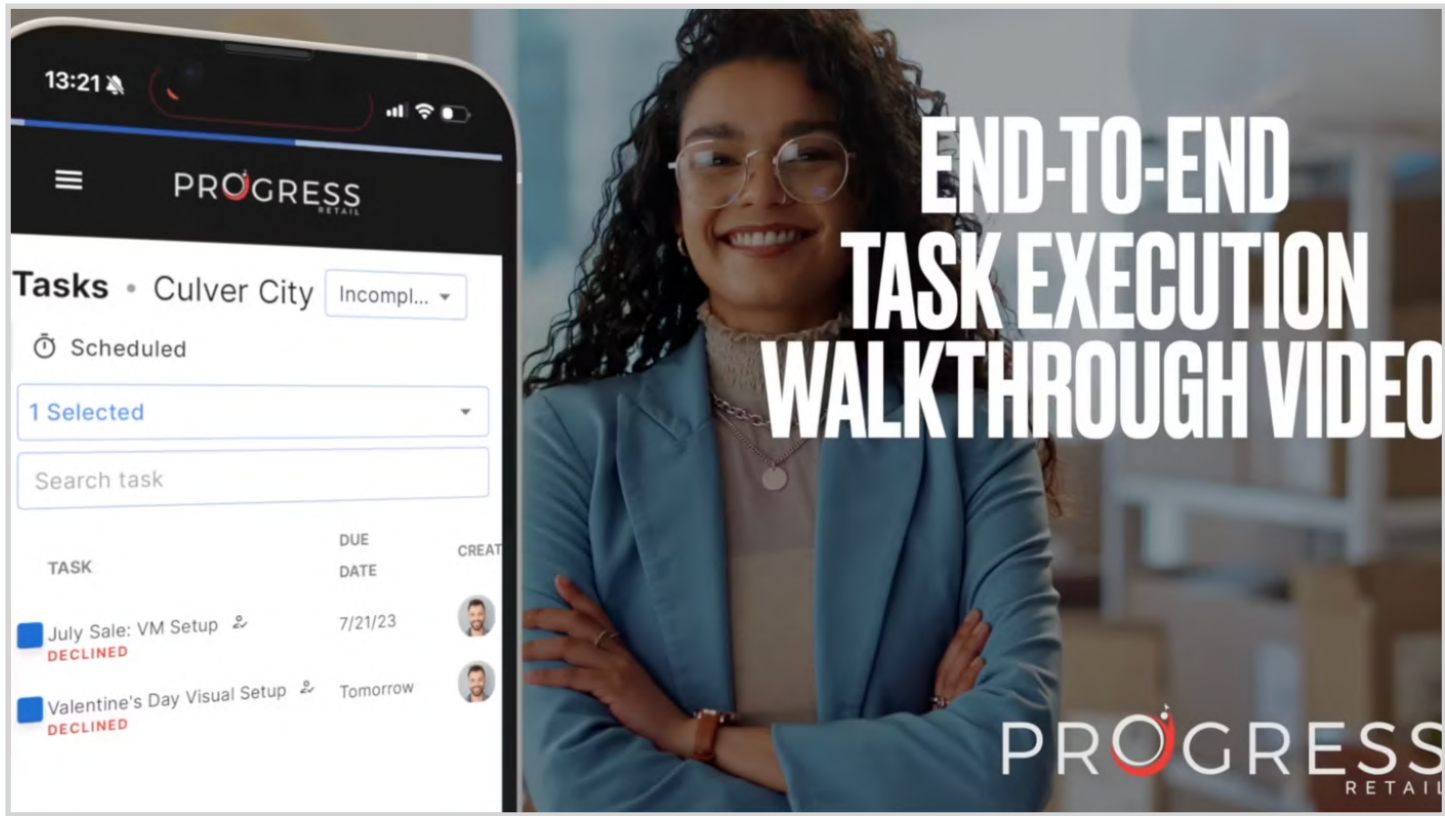

**Anthony Fleischmann**  
*Director of Technology*
