

Sesame Software for Salesforce

Connect, store, protect and analyze your Salesforce data with a single platform.

One Platform, Endless Possibilities.

Sesame Software for Salesforce combines data warehousing, integration, replication, ETL / ELT, and compliance capabilities to cover all of your Salesforce needs. In minutes, your data is moving and centralized – all while maintaining complete security and control.

Take Control of Your Salesforce Data

Connect Salesforce Anywhere, Anytime

Easily connect and unify all of your data to the destination of your choice - on-premise or in the cloud!

Gain a 360 Degree View

Get a complete view of your critical business data across your entire organization to drive actionable insights.

Keep Your Salesforce Data Fresh

Stay in sync with automated bi-directional data synchronization keeps data fresh and perfectly mirrors your Salesforce application.

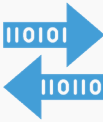

Integrate Your Data

Integrate your Salesforce data with any data source including databases, ERP / CRM systems, and custom applications to ensure data consistency for reporting and analytics.

Data, On Demand

Replicate all new and modified data to the schema as often as five minutes, or use Real-Time option (RTO) for selected objects.

Accelerate Data Movement

Ensure your data moves at the fastest possible speed with hyper-threaded bi-directional technology.

Safeguard Data

Safeguard your data from deletion and corruption, with a fully compliant solution that meets all industry standards.

Prevent Data Loss

Protect your data with automated backups and rapid, stress-free recovery - restore data to the exact point-in-time.

Key Features

 Data Warehouse Fully automated bi-directional data warehouse that is a perfect mirror of your Salesforce Application.	 Data Archive Automatic data extraction for any Salesforce managed packages or applications – one-time or trickle feed.
 Data Replication Rapid replication of your data, no matter the size or volume.	 Data Integration Data integration and synchronization to manage data growth – capturing data that is constantly changing.
 Data Backup/Restore Continuous daily backups and complete restoration of your data, including metadata, at any scale and level of granularity.	 Data Recovery On-demand recovery of all of your Salesforce data, including metadata, attachments, related records, etc.
