Salesforce Backup for Compliance

Compliance Starts With Control

If you're operating in a regulated industry like healthcare, finance, education, or government, your Salesforce data must be protected – not just as a best practice, but as a requirement. Between GDPR, HIPAA, SOX, and internal governance policies, you're expected to retain records, respond to audits, and restore data when it's needed most.

That's where Sesame Software comes in.

Our Salesforce Backup & Recovery solution gives you the tools to safeguard sensitive data, define your own retention policies, and restore records in minutes – all while keeping your data in your control.
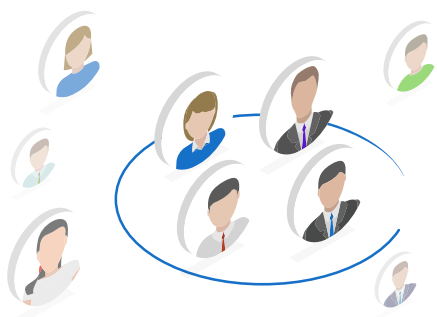

Common Compliance Pain Points

• Backup options that only run once a day, leaving data gaps
• Restore processes that are slow, limited, or incomplete
• Vendor-controlled storage with little transparency or access
• Difficult to respond to audits or retention policy requirements
• No way to validate or report on backup status over time

How Sesame Software Helps

• **Near real-time backups** protect Salesforce data as it changes
• **Store data where you want –** in your cloud, on-prem, or both
• **Set custom retention policies** to align with your regulations
• **Restore specific records or entire objects** quickly and intuitively
• **Direct SQL access to backup data** supports audit prep, exports, and verification
• **Simple reporting** and full visibility into backup health

Who This Is For

• Compliance and risk teams
• Salesforce admins and IT managers
• Regulated orgs that must meet industry-specific standards

Need a solution that makes compliance easier – not harder?

Let's talk about how Sesame can help.
