

Redefining health and safety compliance in highways and civils

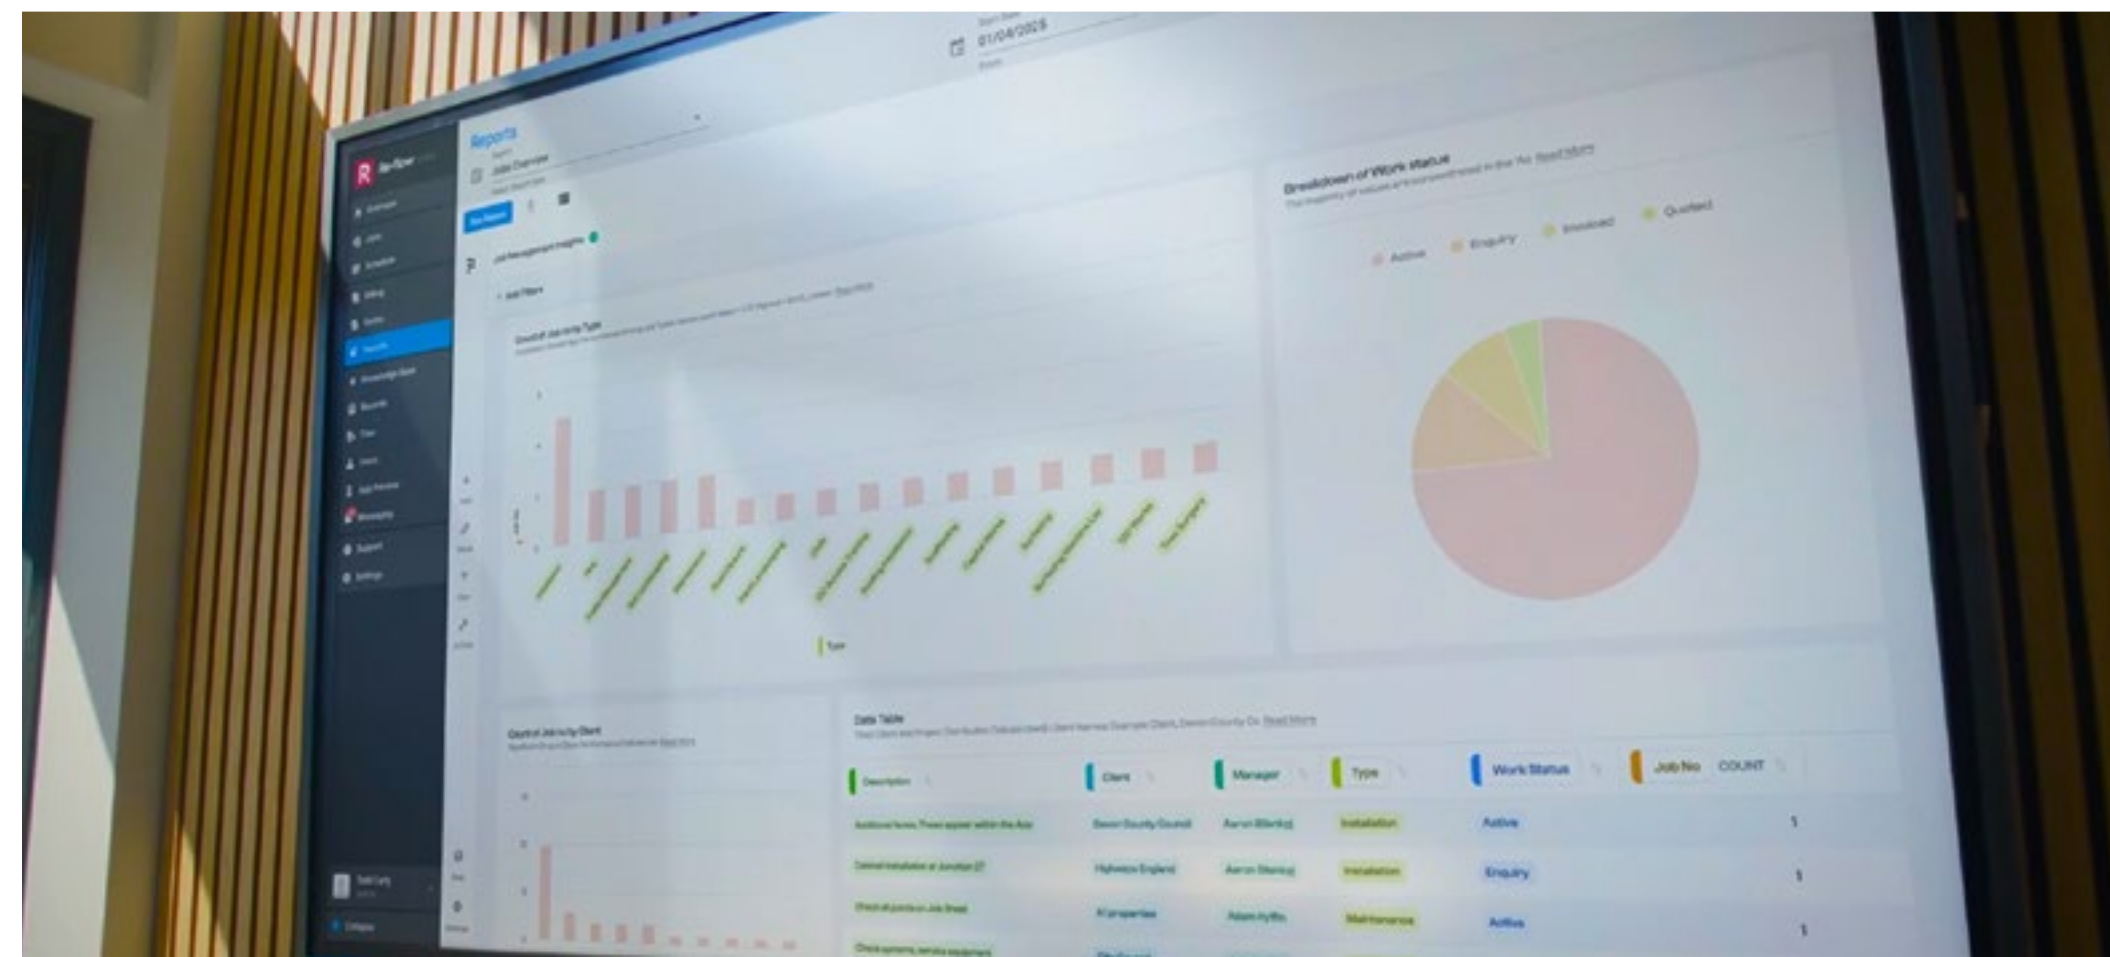

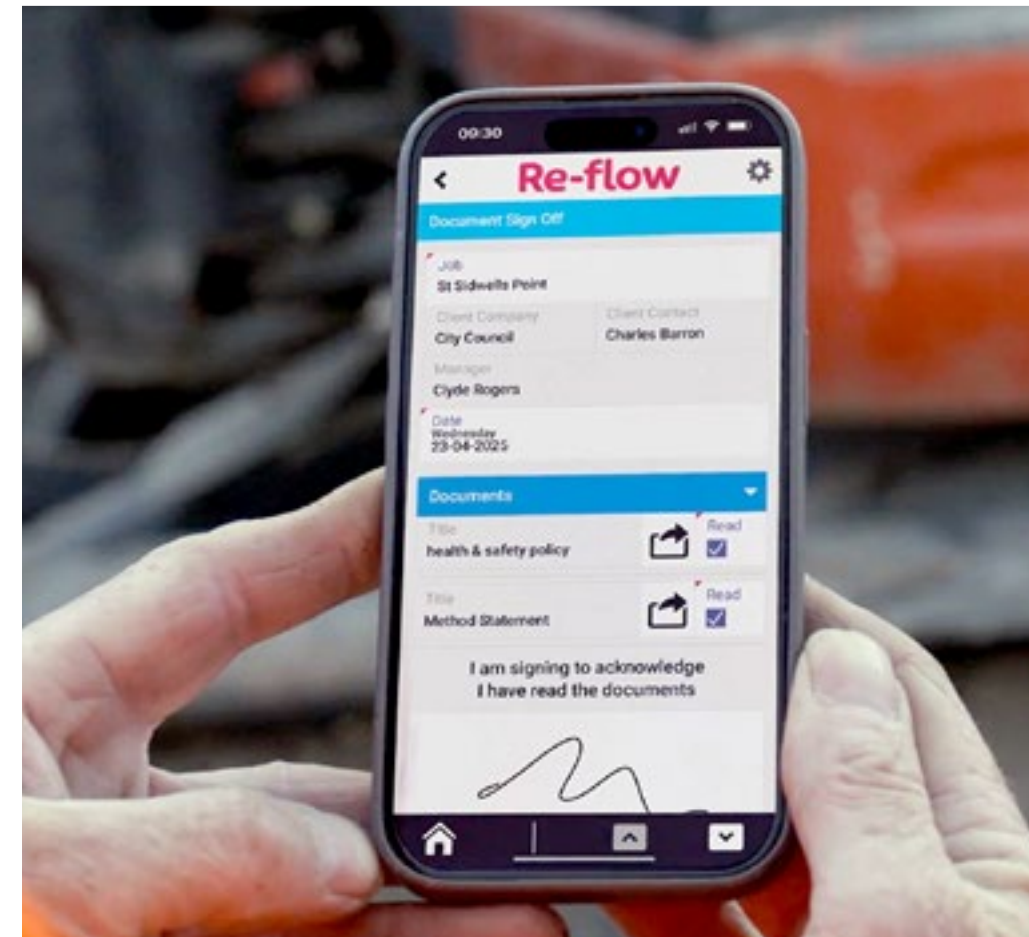

Re-flow[®]
Field Management

Proud to be associated with:

Streamline operations, improve compliance, and work smarter and safer.

“

We target our staff on reporting near hits, so we can learn from any potential risks and mitigate them at the earliest possible opportunity.

Since implementing Re-flow, our near hits have been at their highest level, which means that we can actually react to the risks out there.

We've been really impressed with Re-flow and we'd be happy to recommend them to anyone looking to improve their compliance.

Mark Salmon
Finance Director
Toppesfield

What is Re-flow?

Re-flow is an intuitive, flexible, and powerful end-to-end field operations platform built in partnership with UK highways and civils organisations. It brings together every stage of an infrastructure workflow, from planning and managing assets and projects to generating reports.

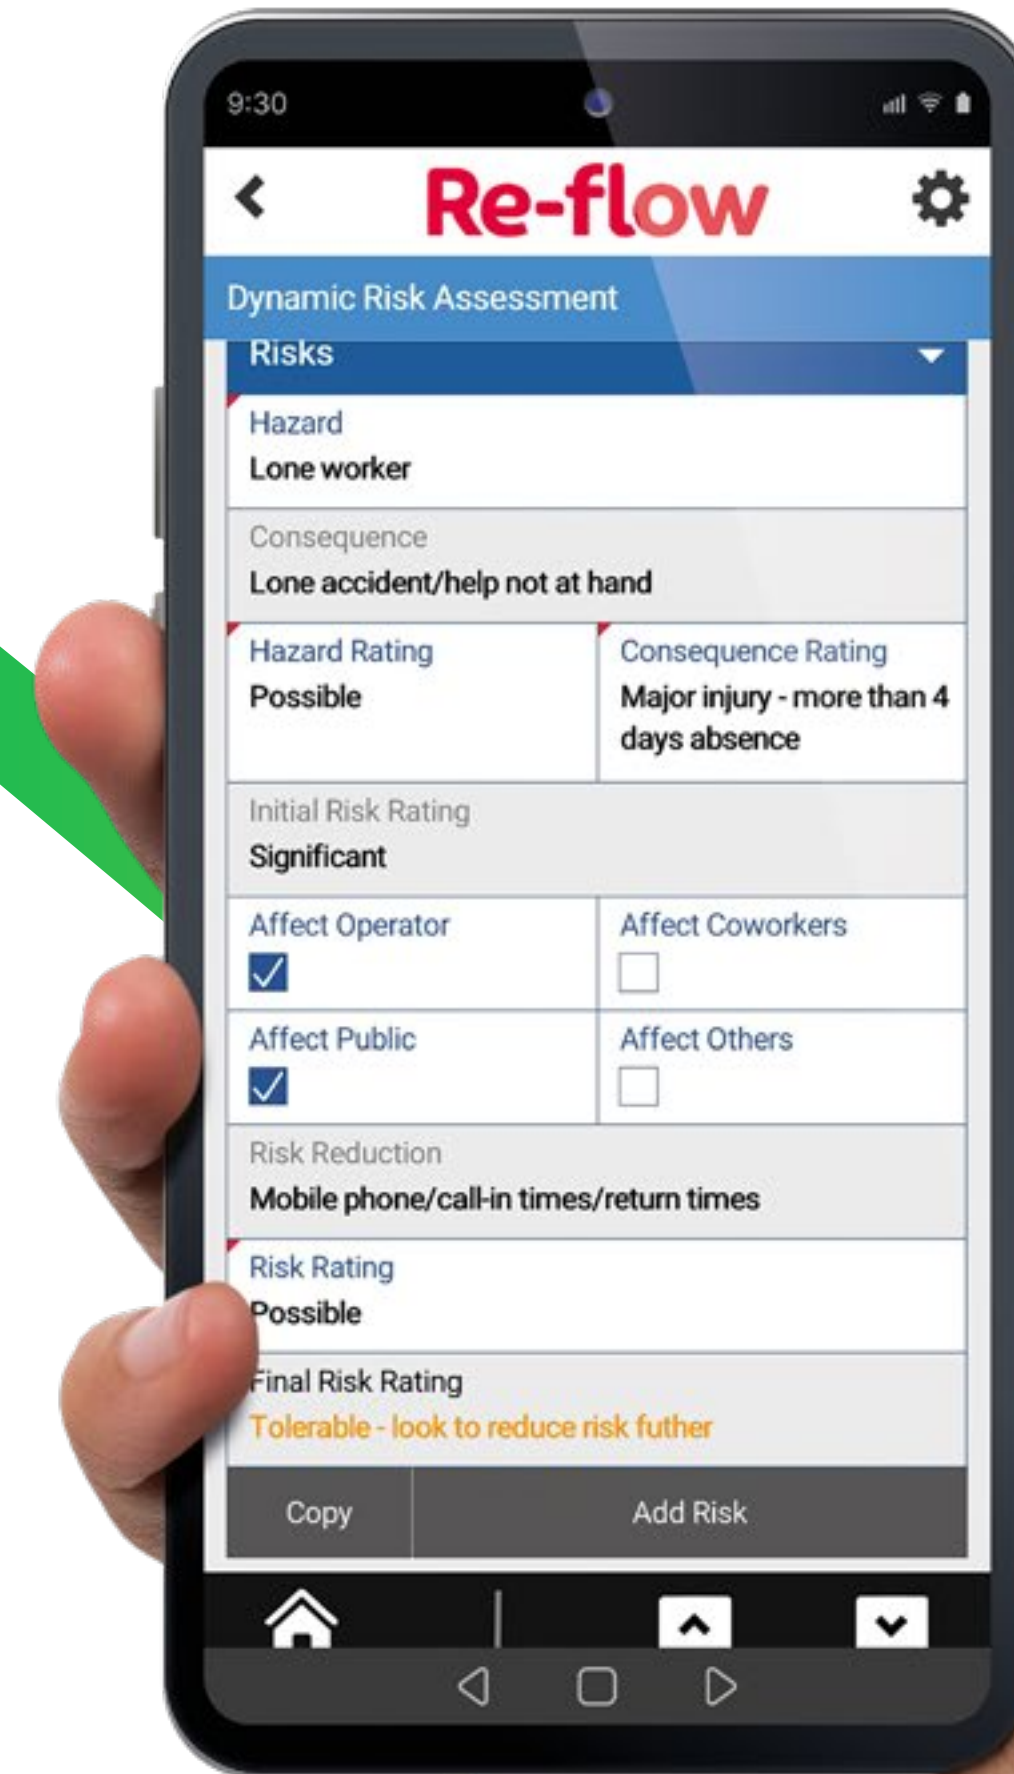

The software unites offices and sites, provides full visibility through dashboards, automates processes, and revolutionises worksite safety culture.

Intuitive,
flexible,
powerful.

Highways and civils case studies

See how Re-flow helps large organisations improve compliance while working smarter, safer, and more efficiently across their field workflow.

Glanville Environmental

50%
reduction in
time loss

90%
reduction in
paperwork

70%
increase in
HSE reporting

60%
increase in
communication

Glanville Environmental are a civil engineering and drainage company spread across six depots. They needed a scalable and user-friendly system to consolidate all their operational processes into one platform.

Glanville love Re-flow's configurable forms, which have allowed them to streamline their operations across sites. With centralised dashboards, they've been able to improve efficiency, HSE reporting, and profitability.

“

Getting information from site immediately is a game changer. It's cut down on paperwork, and in terms of progress, I can log in and see where everything is at on site. We did a tender for a new contract a few months ago, it asked if we had a system in place to get the real-time information electronically, take photos on site instantly – and they almost didn't believe we could do all of it, on site through an app.

James Goodman
Divisional director (Civils)
Glanville Environmental

Breedon

60%
reduction in
time loss

100%
reduction in
paperwork

50%
increase in
HSE reporting

100%
increase in
auditability

Breedon Group are a FTSE 250-listed firm with over 4,000 operatives. They produce construction materials and carry out highways works across the UK and Ireland.

Breedon's surfacing division faced challenges with paper-based processes, delays in receiving site information, and high administrative costs. With real-time data access and automated workflows, Breedon have significantly improved their operational efficiency and have seen growth since implementing Re-flow.

MV Kelly

A leading provider of civil engineering and groundworks services for residential, commercial, and infrastructure, MV Kelly serve a vast geographical area through a network of regional offices.

They've redefined their processes and have full confidence in Re-flow's data infrastructure – sending **15,000** forms, **18,000** images, and capturing **10,500** signatures on average every month. All this data is stored on a secure, reliable system that operates around the clock with no downtime.

Their IT team love the flexibility and security offered by Re-flow, thanks to SSO and the software's ability to handle large volumes of data.

“

Re-flow has impacted the culture massively. Beforehand, our operatives always saw HSE as a burden – a piece of paper they were doing as a box-ticking exercise. Re-flow has made completing the forms easier, and the operatives now realise that these forms are a benefit to them as much as they are to us in the office. Now they want even more forms on site.

Sarah Duffy
Safety administration manager
MV Kelly

City TM

60%
reduction in
time loss

90%
reduction in
paperwork

City Traffic Management Services Ltd are a London-based traffic management company serving the capital and surrounding areas.

Having outgrown their bespoke system, they needed a scalable solution to support continued growth and drive efficiency. Re-flow delivered the flexibility and features they were looking for

With the software in place, back-office staff who previously only had time to manage a single role are now handling up to four.

Wainwright

80%
reduction in
time loss

90%
reduction in
paperwork

90%
increase in
communication

90%
increase in
HSE reporting

90%
increase in
auditability

Wainwright are a quarrying and surfacing company based in Somerset. To drive better compliance, they needed a solution that could capture field data in real-time, streamline administration, and present information clearly.

Re-flow offered a flexible digital platform that fitted perfectly into Wainwright's operational structure, allowing field teams to submit forms instantly and share updates in real-time. Management now have centralised oversight through an intuitive dashboard.

“

Re-flow has allowed us to demonstrate compliance from the operatives on site, and, a robust audit and information trail. We are using the system to communicate works information, site details, RAMS information, and obtain the required sign offs. The team have picked up using the system very quickly.

Tricia Green

Digital implementation checklist

Key considerations for a successful digital implementation

Digital transformation or revision, integrates a streamlined process into all areas of an organisation, fundamentally changing how it operates and delivers value to clients.

Title	Detail	Notes	Done
1. Unified strategic vision and objectives	<p>A clear strategic vision is essential. Companies must define what they aim to achieve. This includes setting specific, measurable goals that align with the overall business strategy. Whether it's improving customer experience, increasing operational efficiency, or driving innovation, having a well-defined vision helps guide the process.</p> <p>This should help achieve a single vision of where you're trying to get to and want to achieve.</p> <p>An issue during transformation is when stakeholders are unaligned, or have different expectations around outcomes. This can lead to severe project delays. Unify your vision.</p>	<p>What are your goals?</p>	<input type="checkbox"/>
2. Leadership and governance	<p>Strong leadership is crucial for driving change. Leaders must be committed to the transformation and capable of inspiring and guiding teams through the transition. Establishing a framework ensures that there is accountability and clear decision-making processes in place.</p> <p>Project management is essential when undertaking this process and having an internal project manager to work alongside Re-flow, ensures the project keeps progressing and essential stakeholders are kept up to date.</p>	<p>Who is your project lead? Who needs to be kept updated through this process?</p>	<input type="checkbox"/>
