

The screenshot shows the Axway B2B Integration Platform interface. At the top, there is a toolbar with various icons. Below the toolbar, a navigation menu on the left lists: Summary, Properties, Certificates, Routing IDs, Contacts, Transport users, Messaging IDs, Agreements, Application delivery, Application pickup, Delivery Settings, Processing, Message validation, Collaboration Settings, Trading pickup, and DMZ settings. The main content area is titled "Summary" and shows information for the "Community: Tech". It includes fields for "Contact name: Admin Tech" and "E-mail address: admin.tech@tech.local". Below these fields are two buttons: "Trading summary" (highlighted in blue) and "Trading configuration". Under "Trading summary", there is a section for "Trading statistics for the last 1 hour" with an "Update" button. A message states: "No statistics have been gathered. Click update to retrieve them." In the bottom left corner of the main content area, there is a "Related tasks" section with three items, each preceded by a checked checkbox: "Add a partner to this community", "Show community-to-partner collaboration settings", and "Change an embedded transport server".

## SOLUTION BRIEF

# Axway B2B Integration Platform. Secure, API-enabled EDI in the cloud.

Unleash innovation with a B2B integration solution that combines EDI, APIs, modern VAN connectivity, web, and cloud services

## One solution. Total flexibility and control.

Axway B2B Integration Platform provides a secure, API-enabled approach to EDI that lets you respond faster to evolving business demands. Engage customers and partners securely across your entire digital ecosystem with flexible deployment on-premises or cloud. Always-on service supports the latest regulatory standards, cutting operational risk and costs.

### Platform benefits

Axway B2B Integration Platform gives you the advantages you need to improve business application reliability and capture new opportunities.

#### Speed

Reduce manual involvement and improve response times by implementing DevOps-friendly configuration, operational APIs, and low-code/no-code integrations. Cut onboarding time to minutes.

#### Agility

Streamline traditional EDI and modern API-driven flows for maximum agility with more connection options, including:

- New industry protocols and formats required to ensure regulatory compliance and support new business interactions and data sets
- A growing set of APIs to support innovation and integration with new applications and other systems

#### Simplicity

Axway's experience and expertise take the complexity out of integrating your systems. We can manage your environment for you so you can focus on more strategic initiatives. Avoid missed-SLA penalties with a support architecture that reduces downtime to near zero. Support new integration patterns by combining APIs, cloud, and on-premises services into a single solution.

#### Security

Leverage stringent security protocols, data integrity checking, and guaranteed delivery across a wide range of B2B messaging protocols, including EDIINT AS1, AS2, AS3, and AS4, RosettaNet RNIF, OFTP, and ebXML ebMS.

#### Control

Gain total visibility and control of your B2B transactions and processes and enhance business application reliability. The platform helps your organization be more proactive to new opportunities while improving your SLAs.

### Unleash innovation

Stay ahead of the competition and drive business growth

- Interact across your business, supply chain and trading community with one B2B integration solution
- Reduce human involvement and speed responses with DevOps-friendly configuration and operational APIs
- Integrate cloud apps with low-code/no-code integrations into your B2B processes
- Scale to meet changing workload demands using containerization
- Streamline onboarding and open opportunities for expansion into new markets

*Thanks to automation, we're saving thousands of hours a year that now can be spent on value-added services for our trading partners.*

Scott Marshall, Sr. Director, IT Project Lead,  
EDI at Cencora

## Axway B2B Integration Platform capabilities

From partner and community management to B2B managed cloud services, Axway gives you the power to integrate, collaborate, and innovate.

### **Partner and community management**

Quickly onboard and provision your vendors and their endpoints. Axway supports self-service onboarding and enrollment, partner SLA tracking, testing, and endpoint management.

### **B2B communications**

Connect your enterprise to all your partners to quickly communicate using their preferred EDI and API-driven standards and protocols, all with the highest levels of security and availability.

### **Mapping and orchestration**

Quickly and easily onboard new trading partners using one of the richest libraries of B2B application formats and adapters on the market, along with a powerful map designer and wizard-based integration solution.

### **Real-time visibility**

Gain real-time EDI visibility into everything that is happening among all applications inside your enterprise and throughout your B2B ecosystem to meet SLAs and optimize business operations.

### **Invoicing compliance**

More and more countries are making e-invoicing mandatory. Axway allows you to handle e-invoicing in a global, standards-driven, and always up-to-date manner, consolidating EDI, API, and e-invoicing processes. You can rely on Axway eInvoicing for archiving, clearance, and Peppol exchanges in countries where you operate.

### **Modern VAN connectivity**

Gain business agility and supply chain resiliency by choosing the most appropriate partner from EDI point-to-point and value-added networks. Axway Business Network simplifies partner community roll-out and partner migration, especially in ground-to-cloud migration.

### **B2B Managed Cloud Services**

Axway Managed Cloud Services gives you the power of a cloud platform with the business and technical expertise of a world-class team. Reduce operational costs by letting our experts manage your needs in a highly secure cloud environment.

### **WebEDI Supplier Portal**

Give web access to suppliers who don't have their own EDI solutions. Simplify doing business with you through EDI.

### **Don't compromise on security**

Be safe, secure, and confident with Axway B2B Integration Platform

- Meet all industry regulations with a solution that's certified for AS2 and AS4 interoperability
- Transparently support tough security protocols, data integrity checking, and guaranteed delivery
- Avoid penalties of missed SLAs with optional multi-cluster support that virtually eliminates downtime
- Use containerization to get latest updates and stay current with latest security features and patches

“

For integration we do have two technologies EDI and API, and our partner Axway are one of the key enablers to help us on this integration. We operate them in 160 countries where we are distributing so all around the world.

Bérangère Tomsin, Supply Chain and Purchasing IT Platform Manager at Moët Hennessy

## Full point-to-point EDI and VAN connectivity

End the complexity of managing hundreds of point-to-point EDI connections and avoid the high cost and slow pace of using traditional value-added networks. By using Axway B2B Integration Platform with Axway Business Network, you get a single, consistent B2B integration solution that handles the EDI and internet-based protocols you're used to, while providing all the capability of a modern, API-driven VAN.

Axway B2B Integration Platform with Axway Business Network significantly improves operational simplicity by offering you the flexibility to communicate with business partners using point-to-point EDI, VAN connectivity, or both so you can do more, pay less, and ensure total security.

Whether you're the head of EDI, supply chain, logistics, infrastructure, operations, or IT, Axway B2B Integration Platform with Axway Business Network provides what you need to:

- Choose **point-to-point or VAN communication** for each particular partner case
- Boost **operational efficiency** and mitigate the sprawl of multiple vendors for EDI, API, eInvoicing, VAN, and other B2B integration processes
- Comply with relevant **B2B market and security standards**
- Reduce the time and costs of **partner onboarding and security/profile management** and simplify profile changes
- React quickly to supply chain disruption with greater **resiliency to prevent business losses**
- **Gain business agility** in partner onboarding, migrating point-to-point and VAN partners, and consolidating partner communities

## Compatible with your partners and processes

Axway B2B Integration Platform lets you engage your customers and partners across digital channels. You can support new integration patterns in an ecosystem that combines APIs and cloud services into a single solution. Axway consultants have a rich set of delivery accelerators, best practices, and the expertise needed to advance your business goals.
