

CONTINUOUS. SCALABLE. EFFECTIVE.

Penetration Testing as a Service (PTaaS)

PTaaS is a **modern approach to penetration testing** that delivers **ongoing security assessments**, not just once a year. It combines **automated scanning** with **manual testing by experts**, all delivered through a real-time platform with on-demand support.

Why Switch from Traditional Pentesting?

| TRADITIONAL TESTING | PTaaS |
|---------------------------|------------------------------------|
| Once a year | Continuous, on your schedule |
| Static PDF report | Live dashboard & real-time updates |
| Limited retest window | Included with subscription |
| Limited access to experts | Talk to testers anytime |
| Snapshot view | Ongoing attack surface coverage |

WHAT'S INCLUDED?

- Manual penetration tests by certified experts
- Monthly vulnerability scans
- Continuous attack surface monitoring
- Real-time dashboard & reporting
- On-demand retesting (no extra cost)
- Support for external, cloud, web, API, and internal environments

WHO IT'S FOR

- Startups & SaaS needing fast, affordable security
- Growing teams under pressure to meet compliance
- Mature orgs with cloud, internal, and app complexity
- Anyone who's tired of expensive, one-off pentests

KEY BENEFITS

- // **STRONGER SECURITY COVERAGE**
Find and fix vulnerabilities faster, across web apps, APIs, cloud, internal and external systems.
- // **FASTER FIXES, LESS RISK**
Get findings and fix recommendations as they're discovered—not weeks later.
- // **BUILT FOR AGILE TEAMS**
Works with your dev cycle. No delays, no PDF bottlenecks.
- // **AFFORDABLE, PREDICTABLE PRICING**
Simple monthly plans—no surprise fees.
- // **COMPLIANCE-READY**
Supports SOC 2, ISO 27001, PCI-DSS, HIPAA, and more.

HOW IT WORKS

- // **ONBOARD**
Define scope & assets
- // **TEST CONTINUOUSLY**
Monthly scans + expert testing
- // **TRACK IN REAL-TIME**
See findings in your dashboard
- // **FIX & RETEST**
Validate fixes as you go
- // **REPEAT**
Improve your security posture every month
