

AssetWatch

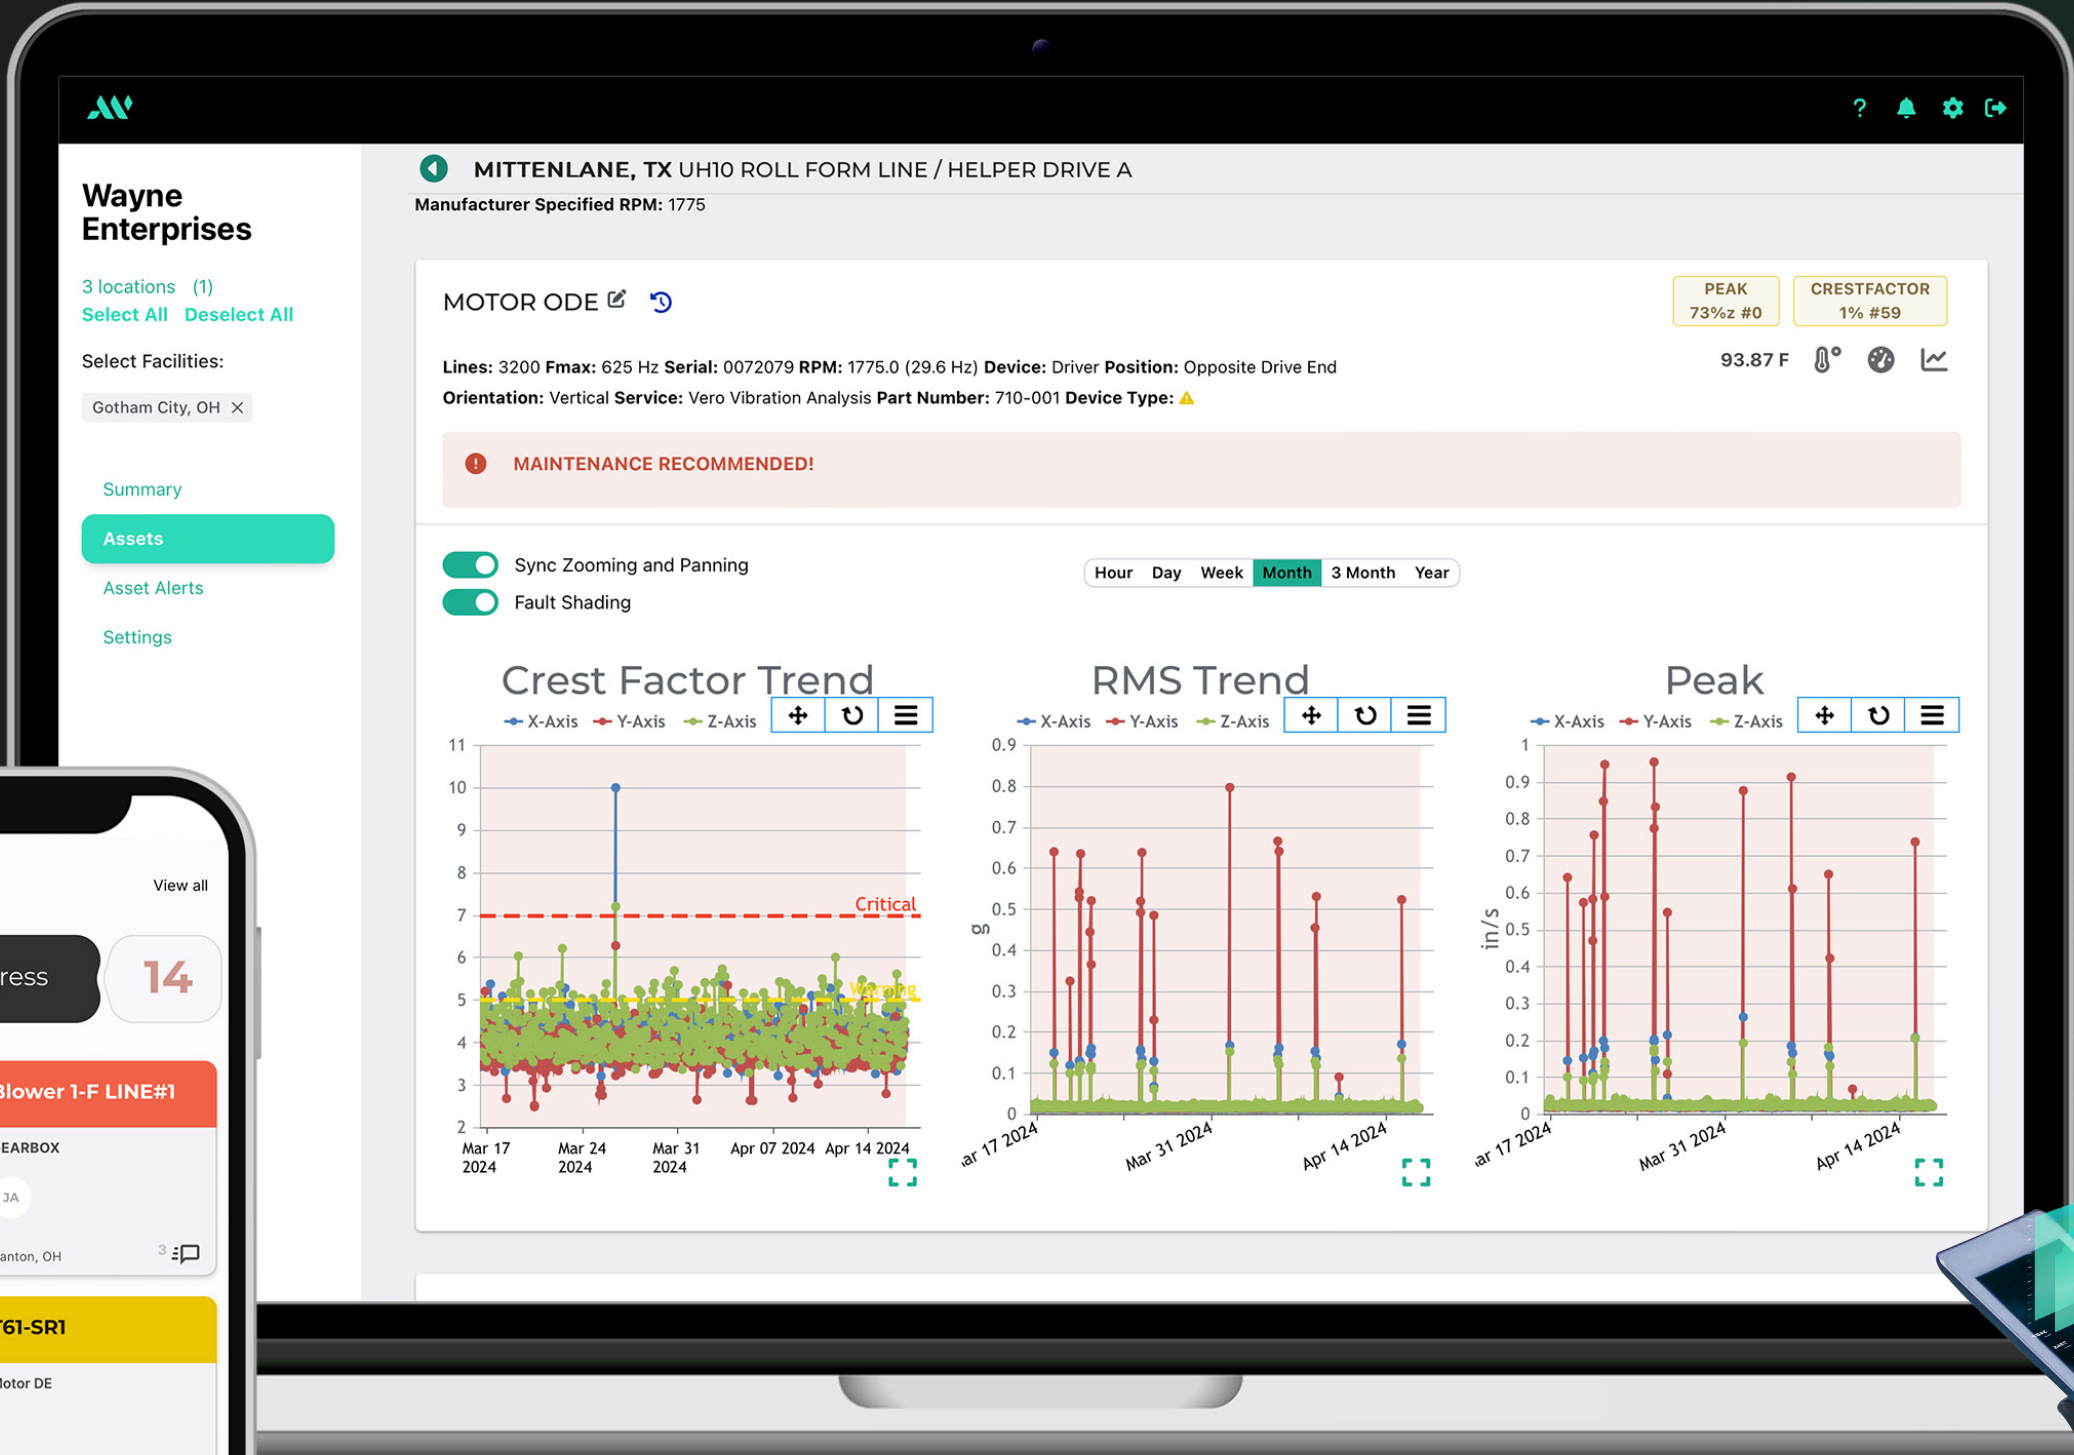

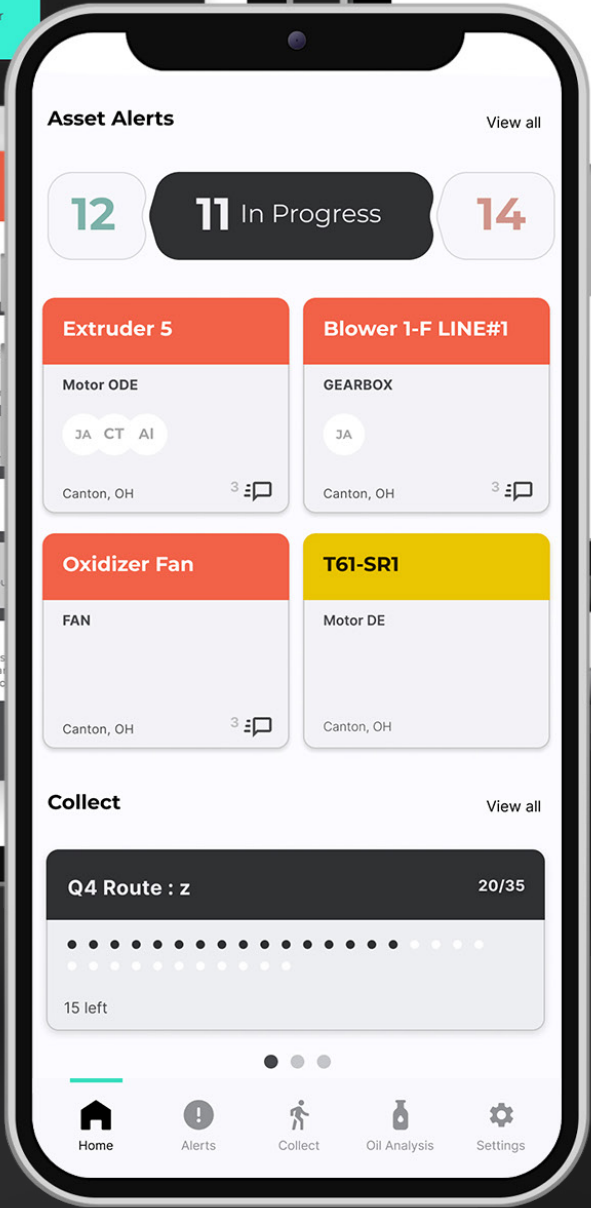

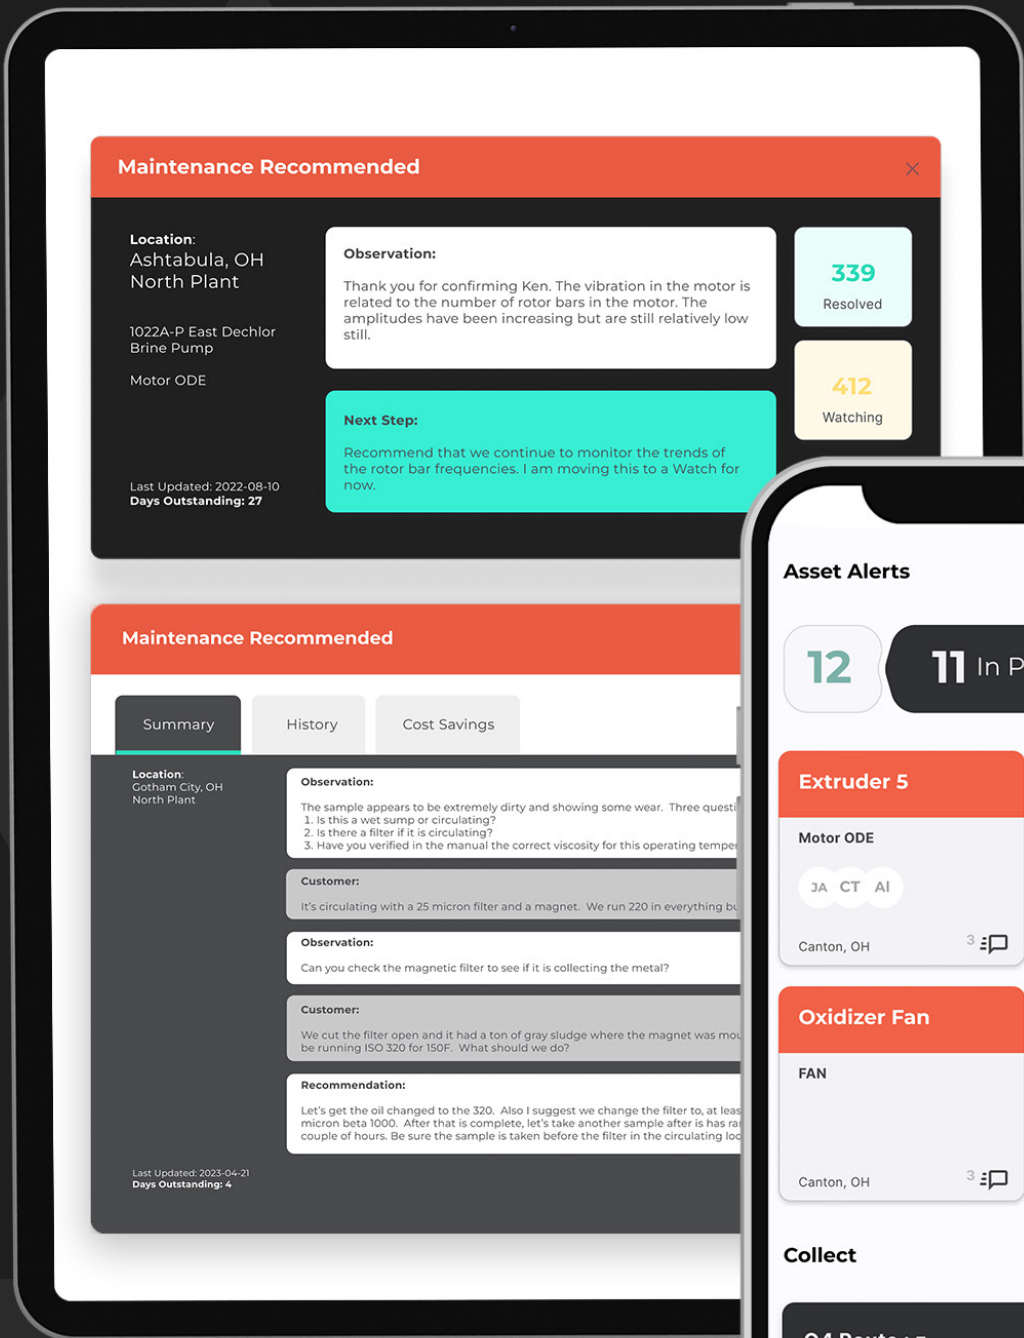

AssetWatch offers a premier end-to-end remote condition monitoring solution, reducing unplanned downtime for global manufacturers. We bundle wireless sensors and advanced software with expert condition monitoring engineers. Using AI-driven analytics and prescriptive insights, we shift maintenance from reactive to proactive, going beyond mere 'pass/fail' evaluations, to truly partner with and transform maintenance teams.

Communicate with our team through 4 easy methods:

Human generated prescriptive maintenance recommendations sent directly to your team!

EMAIL
Programmable & customizable automated alerts

WEB
Desktop app with in-depth data visualization

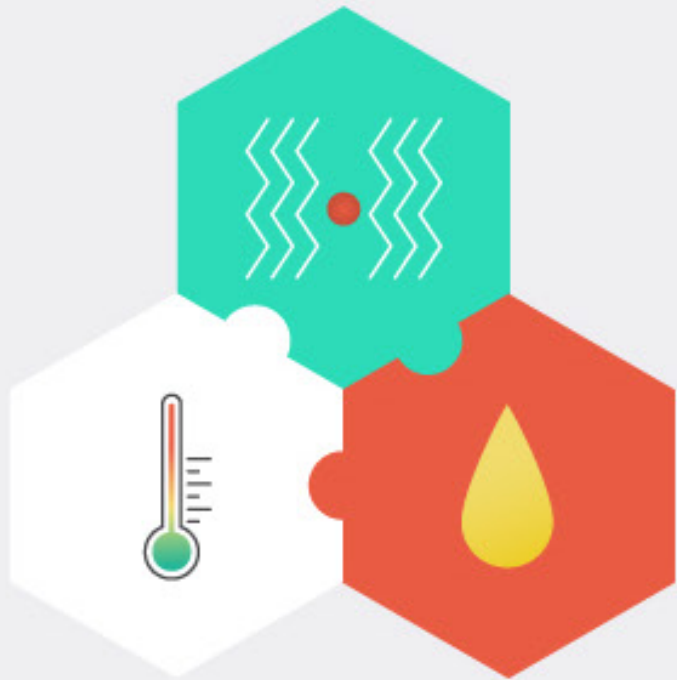

MOBILE
Intuitive iOS and Android app for when you're on-the-go!

WORK ORDER AUTOMATION
Complimentary integration to push work orders to most CMMS/ERP platforms

A Multi-tiered Approach to Predictive Maintenance

Vibration, Temperature & Oil Analysis Data Combined

In a Holistic Platform for Asset Health View with Dynamic ROI

With Prescriptive Insights from a Dedicated Condition Monitoring Engineer

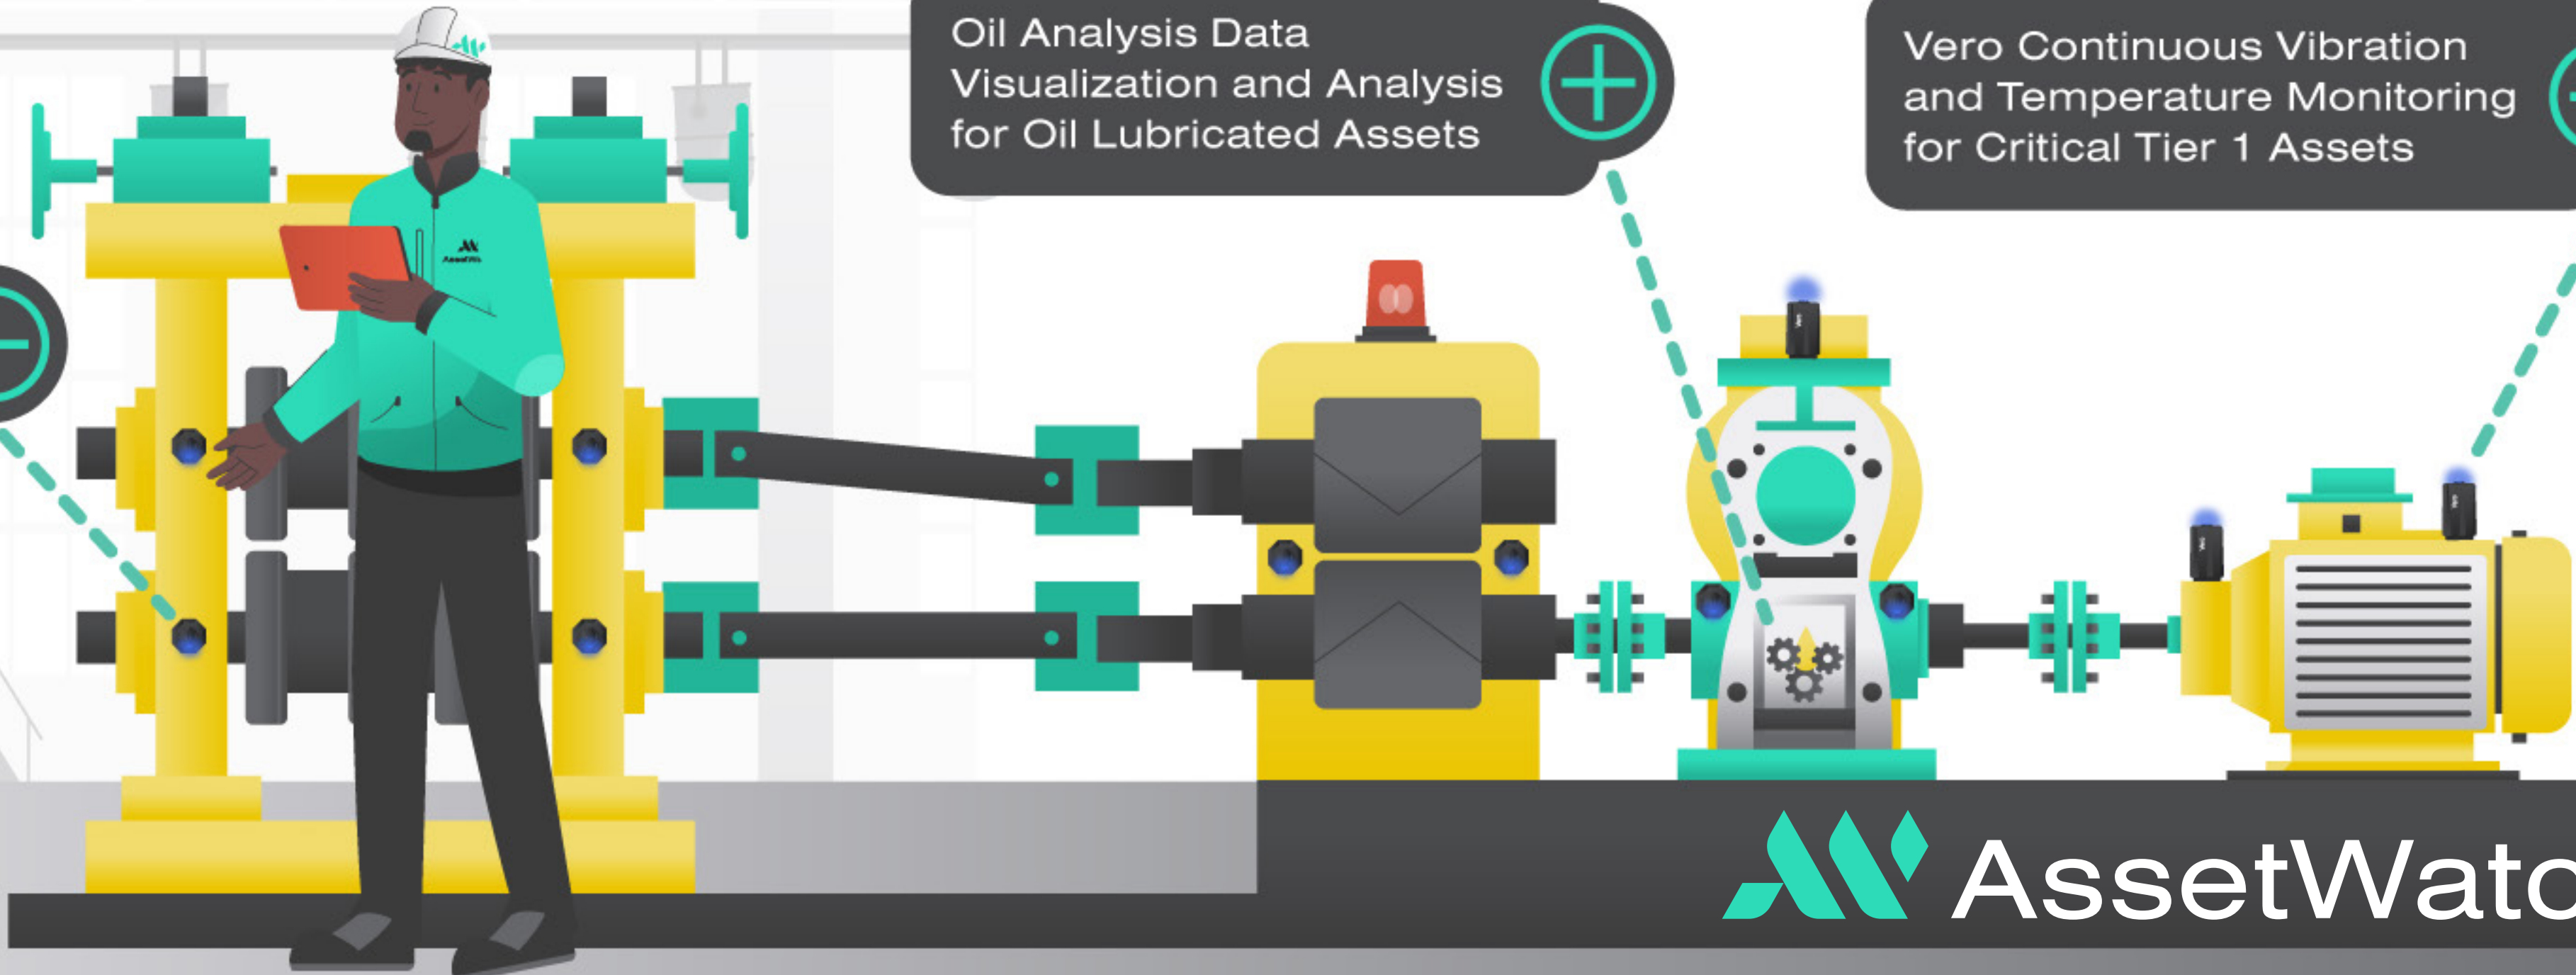

Collect Route-Based Vibration and Temperature Monitoring for Tier 2 & 3 Assets

Oil Analysis Data Visualization and Analysis for Oil Lubricated Assets

Vero Continuous Vibration and Temperature Monitoring for Critical Tier 1 Assets

Achieving a proactive maintenance culture and increasing plant reliability.

Using vibration, temperature and oil analysis data, manufacturers see a comprehensive and holistic view of their asset health, from a single monitoring point to an entire asset and from a single facility to their entire enterprise.

See how one customer achieved 10x ROI by partnering with AssetWatch

10X  ROI

Customer Savings

\$7.5M+

Potential lost margin saved with Vero

Wireless Sensors Collecting Data

1,700+

Rugged sensors collect high-quality, full spectrum vibration and temperature data

Monitored Facilities

16

Rapid system deployment enables enterprise scalability

Downtime Risks Resolved

175+

Early insights into machine health prevent unplanned downtime

Healthy Machine Assets

525+

Vero® protects all stationary rotating equipment - motors, pumps, fans, bearings, gearboxes, etc

Data Points Analyzed

5M+

Vibration & temperature readings analyzed by ML & expert Condition Monitoring Engineers

MANUFACTURER CHALLENGES

**Unplanned Costs
& Downtime**

**Reactive & Strained
Maintenance Personnel**

Varying Team Expertise

**Data Overload Data
Management Challenges**

CAPEX Burden

**Environmental
& Safety Risks**

**Securing Management
Buy-In**

ASSETWATCH SOLUTION

**Eliminate Downtime, Reduce Repair & Replacement
Costs, and Increase OEE**

**Optimized Resources Empowered With Prioritized
Asset Risks and Detailed Prescriptive Insights**

Streamlined, Repeatable Processes

**Insightful Data Interpretation & Holistic
Asset Health View**

**All-In-One Service with Rapid Deployment:
No IT Involvement, WiFi, or CapEx Needed**

Improve Safety and ESG Outcomes

Proven Value with 8x ROI Avg
