

Unlock Smarter AI with Retrieval-Augmented Generation (RAG)

Syndicate + RAG keeps every answer governed, current, and true.

RAG links Large Language Models (LLMs) directly to your enterprise content, enabling precise, trusted answers. With Syndicate + RAG your AI is powered by truth, not noise.

Ensure Accuracy & Trust

Ground your AI initiatives in authoritative content to minimize hallucinations and increase confidence.

Unlock Enterprise Data

Transform static documentation into dynamic, conversational resources accessible through chatbots and copilots.

Governance & Compliance

Maintain strict control of access and content lineage for internal and regulatory requirements.

Enhance Productivity

Reduce employee search time and support tickets with instant, context-aware answers.

Future-Ready AI Enablement

Deploy AI tools and intelligent assistants powered by proprietary content and lay the foundation for an AI-driven innovation roadmap.

Unified Knowledge Hub

Unify content silos across your organization to create a single, trusted knowledge source for all AI applications.

Key Capabilities

Transform AI from a guessing game into a knowledge engine powered by Syndicate.

Syndicate RAG Retriever API

A secure retrieval service that feeds proprietary, enterprise-approved knowledge into LLMs, agentic AI, and chatbots.

Semantic Analysis

Embeds meaning into your content as it's published, enabling accurate retrieval, multilingual understanding, and future content-intelligence features.

Intelligent Content Retrieval

Uses Syndicate's semantic foundation to quickly deliver the most relevant and accurate results across all AI tools—understanding context, not just keywords.

Fine-Tuned Governance

Role-Based Access Control (RBAC) and metadata-driven policies ensure that users only see the content they're authorized to access.

Create + Syndicate Synergy

Create authors and versions content; Syndicate governs and distributes it. Together, they deliver an AI-ready lifecycle, from authoring to application.

AI Search Enablement

Improves search precision and smarter discovery by recognizing context and relationships across your content, helping users and AI tools find what truly matters.

Trusted by Global Leaders

Enterprise Ready Performance

- Scales to support 500–700 simultaneous RAG users
- Global reach with multilingual semantic search
- Integrates seamlessly across AI stacks, chatbots, and enterprise systems
