SCIKIQ Data Hub
The Fastest Path to Enterprise AI

Unify Data access, integration, transformation,
governance &BI in one seamless AI native platform

The Problem: Your Data Infrastructure Wasn't Built for Intelligence

Let's call out the elephant in the server room

At the core of the problem is the fact that most enterprise data systems were never built for intelligence. Data is fragmented across ERP systems, cloud apps, marketing platforms, and BI tools — none of which truly talk to each other.

Business users are heavily dependent on technical teams for access, KPIs vary across departments, and governance is more about audits than agility.

With no semantic consistency or real-time orchestration, even the best AI initiatives fall short. What emerges is a cycle of disillusionment: **high ambition, slow progress, and AI initiatives that look good on paper but never scale in practice.**

The Market Shift

From Stacks to Systems, from Platforms to Intelligence Layers

The enterprise technology landscape is undergoing a profound shift from isolated data stacks and siloed platforms to unified intelligence layers.

What's emerging is a new, essential layer in the modern enterprise architecture: the Intelligence Layer. This layer brings together data ingestion, semantic context, governance, and AI execution into a realtime, cross-functional system that empowers action, not just analysis.

SCIKIQ sits firmly at the center of this evolution. As a fully modular, AI-native, zero-code data platform,

What is SCIKIQ

The AI Nervous System for Enterprises — turning scattered data into intelligence at scale.

SCIKIQ is the world's first AI-native, no-code data fabric platform designed to transform how modern enterprises manage, govern, and monetize their information. By unifying fragmented data silos across multi-cloud and hybrid environments, SCIKIQ enables businesses to build trusted "Data Products" through an intuitive drag-and-drop interface—eliminating the need for complex coding. The platform features an advanced Generative AI engine that allows users to query data in plain language, turning raw insights into immediate action. With automated data quality, full lineage tracking, and a focus on speed, SCIKIQ reduces deployment times by 75%, allowing organizations to focus on innovation rather than infrastructure.
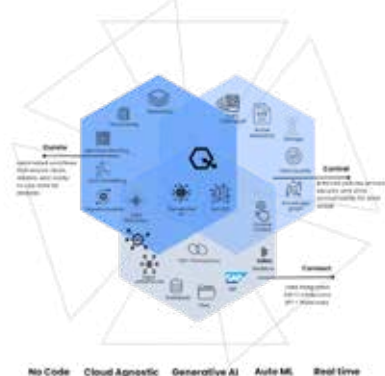

Platform Capabilities at a Glance

SCIKIQ offers a unified stack with six integrated layers:

1. Data Hub (We Make You AI-Ready)

Comprehensive data platform built on Connect-Curate-Control-Consume methodology. Integrate and contextualize your data to become AI-ready in 3-6 weeks.

- **Connect:** 167+ pre-built connectors
- **Curate:** ETL pipelines, data quality, semantic models
- **Control:** RBAC, metadata, lineage, stewardship
- **Consume:** Dashboards, APIs, NLQ interface
- Support for Data Lakes, Warehouses, and Meshes

No Code   Cloud Agnostic   Generative AI   Auto ML   Real Time

2. SAP Data Integration (Unlock Your SAP Data for AI & Analytics)

Pre-built SAP connectors and data harmonization for ERP systems. Extract and contextualize data without complex custom development.

- Pre-built connectors (ERP, HANA, BW, S/4HANA)
- Financial & Operational data integration
- Real-time and batch extraction
- SAP business glossary mapping
- 99.9% SLA Guarantee

3. Conversational AI (Ask Questions, Get Insights)

Natural Language Query (NLQ) interface powered by GenAI that sits on top of your existing data lakes (Databricks, Snowflake, S3).

- Multi-LLM support (GPT-4, Claude, Gemini)
- Automated semantic layer generation
- Context-aware query understanding
- Native Databricks & Snowflake integration
- Business glossary-powered insights

4. Data Governance Suite (Trust, Quality, Compliance at Scale)

Metadata-first governance fabric with cataloging, lineage, stewardship, policy enforcement, and data quality management.

- Metadata Management (technical & business)
- Multi-hop Data Lineage Visualization
- Stewardship & Ownership Workflows
- Access & Policy Management
- Data Quality Scorecards & DQ Engine

5. Data Product Factory (Prompt to Product to Profit)

GenAI-powered data productization engine that converts governed data into reusable, monetizable, and AI-ready data products.

- NLQ-first product generation
- Output: Dashboard, API/Export, ML Model
- Automated metadata & lineage
- Product versioning & cataloging
- Marketplace-ready publishing

Future-Ready Innovations

- GenAI Embedded Everywhere: From enrichment to prompt-based insights
- AI-Driven Governance: Auto-enforce policies, lineage, and metadata
- Unified Semantics: Common KPI layer across BI tools (Power BI, Tableau, etc.)
- Automated Data Quality & Profiling: Real-time anomaly detection
- Record-to-Report Lineage: Full traceability from raw to decision
- Real-Time Data Quality: Continuous validation and anomaly detection
- Elastic Search & Graph-Based Discovery
- SAP Data Extraction: Non-invasive ERP data sync
- AI Agent Studio: Deploy autonomous AI workflows

What SCIKIQ Delivers

Value Driver	Impact
Speed	– Go live in weeks, not quarters
Simplicity	– No-code setup for business & IT teams
Trust	– Governed, lineage-verified, semantic-rich data
AI-Readiness	– GenAI & ML infused across the stack
Monetization	– Turn data into revenue via internal/external marketplace
Flexibility	– Works with your stack, your cloud, your pace

AI

in Action:

Airline Industry Case study

SCIKIQ's Fare Rule Interpretation Engine

The world's first AI-powered solution for airline fare rule automation

Airlines lose millions due to fare misinterpretation, refund errors, and manual processes. SCIKIQ solves this with:

- AI model for fare rule parsing & automation

- Auto-detection of refund/cancellation conditions

- Accuracy-driven recommendation engine

Cut refund
cycle time by 80%

Prevent revenue
leakage on complex fares

Reduce manual
intervention and disputes

This is just one vertical. SCIKIQ can power similar intelligence in banking,
telecom, healthcare, logistics, and retail.

Join the Enterprises
Building AI Readiness with

SCIKIQ

From telecom giants to airlines, retailers to governments
SCIKIQ is powering the next generation of AI-ready enterprises.

Are you ready to simplify
your data, accelerate your AI,
and scale with confidence?

SCIKIQ Where data becomes intelligence.
