

# Security Awareness Training

## PRODUCT OVERVIEW

Right-Hand’s platform delivers automated, gamified, and personalized security awareness training year-round—engaging employees, reinforcing key behaviors, and reducing human risk across the organization.

If you’re spending too much time, resources, or money on a security awareness program that underdelivers, we have the solution for you.

## BENEFITS

- ✔ **Bite-Sized Content:** Educate employees with micro-modules via Slack, MS Teams, and email.
- ✔ **AI Content Creation:** Leverage AI agents that convert policies, reports or any document into training content.
- ✔ **Mobile Friendly Training:** Give admins and employees 24/7 access to our mobile-friendly training.
- ✔ **Extensive Library:** Explore a large SCORM compatible Security Awareness training content catalog.
- ✔ **In-Depth Analytics:** Track risk scores and performance metrics across all your users, teams, and organization.
- ✔ **Gamification:** Boost employee engagement and learning with leaderboards, points, and rewards.

## PRODUCT FEATURES

- ✔ **User-Friendly**  
Boost engagement with interactive, bite-sized training delivered in formats that mirror real-life scenarios and drive lasting behavior change.
- ✔ **Automated**  
Reinforce training based on employee behavior—no manual effort required—using laser-targeted, behavior-based automations.
- ✔ **Personalized**  
Say goodbye to one-size-fits-all training. Each employee gets content based on behavior and knowledge gaps.

## HOW IT WORKS

### Select

Select a module from our large training catalog.

### Send

Launch trainingh to your target audience.

### Analyze

Analyze performance and generate tailored reports.

### Reinforce

Boost retention with automated follow-ups.

## CUSTOMER REFERENCE

"We integrate Right-Hand’s training together with their phishing simulations, allowing for immediate employee risk mitigation while giving our security team visibility into employee behavior every step of the way."
