# Complete Compliance Management Software

The most comprehensive and affordable safety and compliance solution on the market. Choose from over 25 customizable tools that will not only help you score better on your next safety audit but also ensure that your health & safety program is effectively communicated to your workers.

# Workhub

Respect the Improbable

# A **complete** system of components designed to optimize your workflow.

## Online Training

Over 60 safety courses included for free or add your own custom courses with quiz.

## Safety Policies

Host your policies with version control and have your workers digitally sign off upon review.

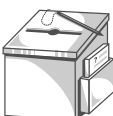

## Bulletins & Alerts

Keep workers up to date on alerts and updates with automatic read receipts to assess readership.

## Safety Meetings

Schedule safety meetings, create a digital paper trail of what is discussed and track attendance.

## Suggestions

Allow workers to provide you with ideas that can make your workplace better.

## Polls

Make decisions a democratic endeavor by polling your workers for their preferences.

## Workplace Screening

Regulate access to your locations with custom screening forms and track visitor data over time.

## Operating Procedures

Host your safety procedures and track which workers have reviewed them.

## Certificate Tracking

Track any third party certifications for a worker from professional designations.

## Competency

Assure your workers are competent by completing pre-requisite tasks and assessing performance.

## Incident Tracking

Track incidents, hazards, near misses and gather all your incident documents in one place.

## Inspections

Schedule required inspections on assets, document findings and assign action items on issues.

### Behavior Observations

Assess your workers' behaviors to identify and assess any unsafe working habits.

### Forms and Records

Track vehicle inspections, safety meetings, incident form and more with numerous submission types.

### Contractor Orientations

Host your orientations with convenient prime contractor access and track completion.

### Action Items

Action items can be logged and assigned on various components so you can easily track completion.

### Audit Preparation

Run a self audit using popular audit protocols and check for deficiencies. Invite your auditor.

### Perception Surveys

Deploy anonymous surveys to your workers to find out how they feel about your safety program.

### Branded Apparel

Make completing safety requirements a priority by incentivizing workers with rewards.

### Worker Management

Implement worker hierarchy and allow supervisors to oversee compliance progress for their team.

### Safety Data Sheets

Add your SDS manual and ensure workers have access to it on the go right from their phone or tablet.

### Whistleblower

Protect your reputation and workers by allowing anonymous submission of alleged policy breaches.

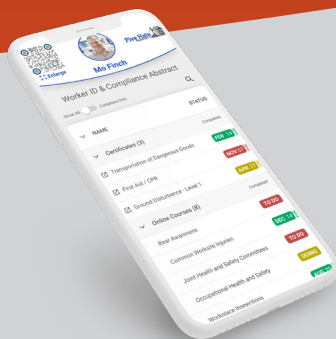

### Scratch Cards

Scratch cards are an exciting way for workers to earn points towards branded apparel and other rewards.

### Legislation Hosting

Our library contains legislation from all around the world which can be enabled in just a few clicks.

and much more!

# WorkerID

The WorkerID app is included for free with all Workhub subscriptions. Access all your safety and compliance information wherever you go – even offline. Quickly scan in to work sites and safety meetings with your unique QR code or check in to locations using the embedded Location Access tool. Compliance on the go!
