Key Features

Coro AI Complete

Coro AI
Generates AI-powered summaries of key trends and recommendations with prompts and product-doc links

Device Posture
Sets device policies according to device vulnerabilities

Telemetry Tab
Collects and organize forensic details from devices

Process Graph
Visualizes process lineage and parent-child relationships to trace threats

Allowlist / Blocklist
Creates allowlists and blocklists for files, folders, and processes to reduce tickets triggered by unknown activities

Mobile App
Enables Zero Trust Network Access (ZTNA) or Virtual Private Network (VPN) protection and DNS filtering on iOS and Android

API-Based Cloud Email Protection
Integrates directly with API-based email providers with no installation or hardware required

Zero Trust Network Access
Applies granular, identity-based access control, ensuring that only authorized users or devices can access specific resources

Trusted Networks
Automatically disable Secure Access Service Edge (SASE) on office networks to improve on-site latency and performance, with protection re-enabled when offsite

Device Management
Remotely wipes data from compromised devices, marks devices for disenrollment to remove profiles and policies, and removes devices that are inactive or disenrolled

Lost Mode
Locks supervised devices, shows custom contact info, and tracks location when powered on

Application Policy
Defines and enforces rules for app use, including install / remove restrictions, blocking in-app purchases, and locking system defaults

Sensitive Data Detection
Leverages country-specific infotypes, including Germany, Canada, France, Italy, USA, Australia, and the Netherlands to detect and alert on sensitive data

Coro Insights
Provides key security insights, including top vulnerable users and workspaces and ticket trends, with filtered ticket logs for fast review

Multi Factor Authentication
Prevents unauthorized access to company resources by requiring users to provide a second form of verification

Security Awareness Training
Train users to identify phishing and social engineering threats through real-world simulations

Cloud Applications
Connects, monitors and controls a range of cloud apps: Microsoft Office 365, Google Workspace, Slack, Dropbox, Box, & Salesforce

Outbound Gateway
Enables real-time monitoring and blocking of outbound emails that violate an organization's sensitive data policies

Remote App Installation
Installs required apps on employee devices directly from the console

Scheduled Malware Scans
Schedules daily, weekly, or off-hours malware scans on Windows, macOS, and Linux agents

Third Party Applications Tab
Lists and manages third-party apps connected to MS 365 and Google Workspace, offering control and visibility into app usage within the organization

Secure Web Gateway
Admins can activate domain name system (DNS) filtering and create allowlists and blocklists to control what domains are not able to be accessed while on the network

Inbound Gateway
Provides real-time detection and protection for incoming emails from all 3rd party providers at the delivery level

Impossible Traveller
Detect login attempts from distant locations in unrealistically short intervals, helping identify potential credential compromise or unauthorized access

Secure Messages
Encrypts sensitive emails and offers a secure platform to access encrypted messages

Wi-Fi Phishing
Identifies malicious Wi-Fi networks and prevents device connection

Why Coro?

High Threat Detection and Protection Rate
Achieved AAA rating from SE Labs

Easy to Maintain
95% of the workload offloaded from people to machines

Quick Deployment
Simple and quick installation, no hardware required

Fast Learning Curve
Minimal training, simplified onboarding, user-friendly interface

High ROI
No hardware costs, zero maintenance overhead, affordable pricing

High Customer Satisfaction
95% likelihood to recommend - as rated by G2

About Coro

Coro is the easy cybersecurity company. We designed a platform that every lean IT team will master. While other solutions scare people into buying complicated, confusing products, we lead with elegant simplicity. Coro is fast to deploy, easy to use, and designed not to waste your time. Once you install Coro, you'll hardly think about us. That's the point. Coro automatically detects and fixes security problems, so IT teams don't have to spend time investigating or troubleshooting. We're also one of the fastest-growing tech companies in North America, just ask Deloitte.
